**Torpedo Bombers, 1900-1950** Jean-Denis Lepage,2020-01-27 The torpedo-bomber was a very short-lived weapon system, operational for scarcely half a century from just prior WWI to the 1960s. Yet during its brief existence it transformed naval warfare, extending the ship-killing range of ships and coastal defences to hundreds of miles. The Royal Navy and Fleet Air Arm led the way, recording the first sinking of a ship by aerial torpedo in August 1915 but all major navies eagerly developed their own torpedo bomber forces. The torpedo-bomber reached its zenith in WWII, particularly from 1940-42, with notable successes at the Battle of Taranto, the sinking of the Bismarck and Pearl Harbor. It was the weapon of choice for both the US and Japanese in the big Pacific battles such as Midway. In the latter stages of the war, increasingly effective anti-aircraft fire and interceptor aircraft started to render it obsolete, a process completed post-war by long-range anti-ship missiles. Jean-Denis Lepage traces the development of torpedo bombers worldwide, describing their tactics, operational history and the aircraft themselves, including such well-loved types as the Swordfish, Beaufighter and Avenger. Over 300 aircraft are beautifully illustrated.

**U. S. Navy Dive and Torpedo Bombers of World War II** Barrett Tillman Robert L. Lawson, With their stout airframes, innovative airbrakes and near-vertical dive capabilities, U.S. Navy torpedo and dive bombers rendered Japanese deck gunners nearly defenseless and played a crucial role in Allied victory. Remarkable period color photography and quotes and anecdotes from pilots and crewmembers relate the stories behind Navy dive bombers. Included in the collection are the legendary SBD (Slow But Deadly) Dauntless, SBC Helldiver, TBD Devastator and TBF and TBM Avengers. In addition to depicting the aircraft, photos show American airmen testing and training, while first-person accounts tell of missions against Japanese vessels.

**Torpedo Bombers** Peter C. Smith,2008-03-27 This is a highly illustrated history one of the most deadly types of attack aircraft. The torpedo bomber first appeared during the later years of World War One but served their most useful role in the Second World War. The most famous attacks include Taranto, where Fairey Swordfish destroyed the Italian Battle fleet and the infamous surprise attack on Pearl Harbor by the Japanese. In both these cases the attacks were against ships laying in harbor and therefore stationary. Heavy defensive anti-aircraft fire was the greatest danger to the torpedo bombers in those circumstances but ships under way in the open sea had far more room to take evasive action. The lengthy time it took a torpedo to reach its target allowed many ships to escape destruction. However notable exceptions were the sinking HMS Prince of Wales and HMS Repulse by the Japanese during the early stages of the war in the Far East. During the hunt for the Bismarck it was an air-launched torpedo from a Swordfish that severely damaged the ship's steering gear and enabled the Royal Navy to close in for the final kill. Some of the types included are the Fairey Swordfish, Bristol Beaufort, Fairey Albacore, Bristol Beaufighter, Heinkel He 115, Marchetti SM.79, Fokker T.VIII, Grumman Avenger and the Nakajima B5N.

**Ship-Busters** Ralph Barker,2010-02-26 Epic story of low-level strikes on Axis navies in World War II One of the most dangerous forms of air attack used during the war Written by a participant This stirring book recounts how British torpedo-bombers took the war to enemy naval fleets and shipping vessels during World War II. Episodes covered include the attack by a single plane on a German battleship, the torpedoing of the Gneisenau in Brest harbor, and the vital blows against the supply lines of Rommel's Afrika Korps in the Mediterranean.

**Torpedo Bombers 1900-1950** Jean-Denis Lepage,2020 The torpedo-bomber reached its zenith in World War II, particularly from 1940-42, with notable successes at the Battle of Taranto, the sinking of the Bismarck, and Pearl Harbor. Over 300 aircraft are beautifully illustrated.

**TBF/TBM Avenger** David Doyle,2020 The Grumman-designed TBF Avenger was unquestionably the most successful torpedo bomber in the US fleet during WWII. Developed just prior to the US entry in WWII, the type made its combat debut at the Battle of Midway. Demand for the large carrier-borne aircraft, which could drop conventional bombs and depth charges in addition to torpedoes, soon outstripped Grumman's capacity. To supply the needed aircraft to the US Navy, the US Marines, and the Royal Navy, the Eastern Aircraft Division of General Motors was contracted to build duplicate aircraft, which were designated TBM. With numerous adaptations, both the TBF and TBM continued to serve militaries well after WWII. Through carefully researched photos, many of which have never before been published and which are reproduced in remarkable clarity, the history and details of this iconic aircraft are revealed and put the reader in the skies with this historic aircraft.

**Royal Navy torpedo-bombers vs Axis warships** Matthew Willis,2022-10-27 Drawing on rare, historical photography and specially commissioned artwork, Matthew Willis explores the heroic feats of the few Royal Navy's obsolescent biplanes that stood between the state-of-the-art Axis warships and their objectives. Focusing on the technical specifications of both opponents, using original records, and detailed armament and cockpit views, this book explores the key attributes and drawbacks of the disadvantaged Royal Navy torpedo-bombers against the mighty Regia Marina and Kriegsmarine destroyers and raiders, covering a wide range of sea battles, from the more famous attacks such as the strike on the Bismarck, the tragic events of the Channel Dash or the clash with the Italian battle fleet at Taranto, to less covered sea battles such as the Battle of Matapan. Despite their powerful weaponry and heavy armour protection, the Axis warships proved vulnerable to a skillfully and audaciously flown torpedo-bomber, thanks to innovative commanders exploiting every possible advantage. Including rare personal recollections from the airmen who flew the torpedo-bombers and historical accounts from the Axis warship crews, this book describes each and every facet of this dramatic duel.

**Douglas TBD Devastator** David Doyle,2017-10-18 The Douglas Devastator was the US Navy's first all-metal combat aircraft, the Navy's first airplane with a fully enclosed cockpit, the first aircraft to have hydraulically folding wings, and the first US Navy torpedo bomber to see combat. Although facing staggering losses in the early stages of the war in the Pacific, the brave men flying the Devastator from the decks of such famed ships as Enterprise, Hornet, Yorktown, and Lexington held the line against the enemy. Through carefully researched photos, many of which have never before been published and which are reproduced in remarkable clarity, the history and details of this iconic aircraft are revealed. This clarity, and the large size of many of the photos, coupled with descriptive and informative captions, puts the reader in the skies with this historic aircraft.

**Ship Busters!** Ralph Barker,2012-11-15 A "vividly told" history of torpedo attacks from the air in the Second World War, by a member of the Royal Air Force (The Sunday Times). Low-level strikes against enemy shipping by torpedo-carrying aircraft were perhaps the most dangerous forms of air attack developed during WWII, and few isolated actions had such a direct impact on naval and military actions. This book tells the story of the RAF men involved, from the early attacks by single Beauforts off the Dutch and Norwegian coasts to the massed assaults of later years by the famous "strike-wings." The author, who joined the RAF in 1940 as a wireless operator/ air gunner, and served in the UK, the Middle East, and West Africa, and whose career on torpedo work ended in a crash in which his pilot and navigator were killed, includes many historic actions: the lone moonlight attack by a twenty-two-year-old flight sergeant on the pocket-battleship Lützow; the torpedoing of the Gneisenau in Brest harbor; the Channel Dash of the Scharnhorst, Gneisenau, and Prinz Eugen and the heroic Swordfish attacks; and the vital strikes from Malta in 1942 against the Italian fleet and the supply shipping of the Afrika Korps. The result is a fascinating book, vivid in its true picture of aircrew life, stirring in its descriptions of

heroic actions, intensely moving in its record of human endeavor.

**Dive and Torpedo Bombers of WWII** Barrett Tillman, Robert L. Lawson, 2001 With their stout airframes, innovative airbrakes and near-vertical dive capabilities, U.S. Navy torpedo and dive bombers rendered Japanese deck gunners nearly defenseless and played a crucial role in Allied victory. *Torpedo 8: The Story of Swede Larsen's Bomber Squadron* Ira Wolfert, 2019-07-19 Torpedo 8 is the epic story of the death and rebirth of the famous bomber squadron led by Lieutenant Harold Swede Larsen. VT-8 rose from the ashes of the Battle of Midway to become an indispensable air arm in the series of engagements for the Solomon Islands and beyond. In three months, the crack squadron carried out thirty-nine attack missions, sixteen against ships, twenty-three against ground targets. Their motto following the tragedy at Midway was Attack and Revenge.

TORPEDO 8 — The Story Of Swede Larsen's Bomber Squadron [Illustrated Edition] Ira Wolfert, 2015-11-06 Includes the Island War In The Pacific Illustration Pack – 152 maps, plans and photos. The epic story of the death and rebirth of the famous Torpedo Squadron 8, destroyed at the Battle of Midway and rose again to become a crack outfit under the leadership of "Swede" Larsen. "THE JAPS WIPED OUT THE UNITED STATES NAVY Torpedo Squadron 8 in a few minutes at the Battle of Midway. The minutes were hot and rough. The squadron was like a raw egg thrown into an electric fan, and only three men came out of the action alive. One of these is no longer fit for combat duty. His nerves are gone. They became unstrung in those few minutes, and in the ten months since then he has not been able to get them working again normally, although he has been out on the line trying his best, refusing painfully to give up. So, when Torpedo 8 was wiped out on Thursday morning, June 4, 1942, in about the time it takes to stamp out a pile of ants, it looked to those of us on the outside as if torpedo bombing were about to become a lost art. But the Navy did not agree. Nor did Torpedo 8 agree. The Navy seemed to know without asking that Torpedo 8 would not feel this way, for, without being asked, Torpedo 8 was thrown directly from Midway into the Battle for the Solomons — a series of engagements into which the Japs put about five times the naval strength they used at Midway, and much more naval strength than they used against the Malay Peninsula and Java. Torpedo 8 went into the battle with two veterans of Midway, plus remnants of the old squadron who had not got into the action there, and plus 'replacements,' as they are called. They did not, as the Japs do, blame their dead for having died. They wanted revenge for them. Up to Midway, the slogan of the squadron had been 'Attack.' On June 12, eight days after the holocaust at Midway, the squadron commander in an official squadron memorandum changed the slogan to: 'Attack— and Vengeance!'" -Introduction

**Savoia-Marchetti S.79 Sparviero Torpedo-Bomber Units** Marco Mattioli, 2014-10-20 Italy's most successful wartime bomber, the S.79 saw combat with the Regia Aeronautica in France, Yugoslavia, Greece, North Africa, East Africa and in the Mediterranean. Initially developed as a transport, the aircraft evolved into a dedicated medium bomber during the Spanish Civil War in 1936. The manufacturer then produced the S.79-II torpedo-bomber which entered service in 1939 – which primarily saw service against the Royal Navy in the Mediterranean. Illustrated with 30 full colour profiles of the main units that saw action with either the Regia Aeronautica or the ANR, this title is the first of two volumes to cover the development history and wartime performance of the S.79.

**TBD Devastator Units of the US Navy** Barrett Tillman, 2012-11-20 The first monoplane aircraft ordered by the US Navy for carrier operations, the Douglas TBD Devastator was designed to fulfil a requirement for a new torpedo bomber. Just 129 were built, and when it entered service it was the most modern aircraft of its type anywhere in the world. Its only real taste of action came on 4 June 1942 in the pivotal Battle of Midway, when 35 were shot down in a clash with Japanese A6M Zero fighters. The aircraft was replaced by the Grumman Avenger weeks later.

Luftwaffe Aerial Torpedo Aircraft and Operations in World War Two Harold Thiele, 2004 This fascinating book offers a rare account into the operations of the Luftwaffe's aerial torpedo units during World War II. Often overlooked, the crews who flew in these units were highly trained and experienced and their missions involved hazardous flying against difficult and well-defended maritime targets. Harold Thiele has researched this field for many years. Before providing a detailed diary of Luftwaffe torpedo operations, he explores the origins of the aerial torpedo and offers a comparative study of its development in Germany, Britain, the USA, Italy and Japan from World War I until the outbreak of World War II. The body of the book comprises a detailed chronological diary of operations mounted off the English coast, in the Atlantic, the Mediterranean, off North Africa and in the Black Sea by the Ju 88s, He 111s, He 177s, and Ar 95s (etc.) of Luftwaffe's torpedo units, such as KG 26, KG 77 and the various floatplane-equipped Staffeln which also undertook such operations. Supplemented by color artwork, target listings, aircraft and torpedo types, units and all ships known to have been sunk or damaged by aerial torpedo attack, this work will be an indispensable reference for modelers & researchers.

*Nakajima B5N 'Kate' and B6N 'Jill' Units* Mark Chambers, Tony Holmes, 2017-06-29 Entering service during the Sino-Japanese War, the Nakajima B5N (code-named 'Kate') excelled and went on to achieve surprising and dramatic successes in the Japanese attack on Pearl Harbor. It also contributed to the sinking of the US aircraft carriers USS Lexington at the Battle of the Coral Sea, USS Yorktown at the Battle of Midway, and USS Hornet at the Battle of the Santa Cruz Islands. Its replacement, the Nakajima B6N 'Jill', while a marked improvement over its illustrious predecessor, was never able to achieve its full potential in combat due to advances in Allied aircraft, finding itself relegated to the dreaded Kamikaze strikes in the latter part of the war. Using previously unpublished photographs as well as colour illustrations, this book will cover the history of the 'Kate' and 'Jill' torpedo/attack bombers, including their design and development, as well as the combat highs and lows of the Imperial Japanese Navy's premier torpedo-bombers.

*Torpedo Bomber!* Ralph Barker, 1968

The B-26 Goes to War Stan Walsh, 2018-02-16 Steven F. Udvar-Hazy Center Mary Baker Engen Restoration Hangar Chantilly, Virginia Two complete and separate design cycles chronicles our story – The B-26 Goes to War. War fever caused authorities to forego prototype testing – the B-26 went straight from drawing board to battle. The 22nd Bomb Group, with short 65 ft. wingspan B-26s entered combat in the Southwest Pacific. The Army's Torpedo Challenge chronicles exploits in the realm of pure fantasy. Getting-it-right – Navy torpedoes on Army bombers – is intense, vivid and entertaining. Flying the "straight" uncovered deficiencies. A modified B-26B emerged with a 71 ft. wingspan. These were earmarked for combat in North Africa and Europe. For the Flak-Bait story see Appendix H. The ultramodern Martin B-26 prototype medium bomber first flown 25 November 1940 achieved a top speed of 315 mph, fastest of any U.S. bomber and narrowing the gap between its speed and that of existing Army pursuit planes. Innovations include: self-sealing gas tanks, armor plating and a full bomb load of two tons.

*The Unknown Battle of Midway* Alvin B. Kernan, Professor Alvin Kernan, 2005-01-01 Describes the devastation of the American torpedo squadrons during the Battle of Midway and discusses the reasons for their downfall, including running out of gas, having malfunctioning torpedoes, and using inexperienced pilots.
