Annihilation Jeff VanderMeer, 2014-02-04 A MAJOR MOTION PICTURE FROM ALEX GARLAND, STARRING NATALIE PORTMAN AND OSCAR ISAAC The Southern Reach Trilogy begins with Annihilation, the Nebula Award-winning novel that reads as if Verne or Wellsian adventurers exploring a mysterious island had warped through into a Kafkaesque nightmare world (Kim Stanley Robinson). Area X has been cut off from the rest of the continent for decades. Nature has reclaimed the last vestiges of human civilization. The first expedition returned with reports of a pristine, Edenic landscape; the second expedition ended in mass suicide; the third expedition in a hail of gunfire as its members turned on one another. The members of the eleventh expedition returned as shadows of their former selves, and within weeks, all had died of cancer. In Annihilation, the first volume of Jeff VanderMeer's Southern Reach trilogy, we join the twelfth expedition. The group is made up of four women: an anthropologist; a surveyor; a psychologist, the de facto leader; and our narrator, a biologist. Their mission is to map the terrain, record all observations of their surroundings and of one another, and, above all, avoid being contaminated by Area X itself. They arrive expecting the unexpected, and Area X delivers—they discover a massive topographic anomaly and life forms that surpass understanding—but it's the surprises that came across the border with them and the secrets the expedition members are keeping from one another that change everything.

A Search for Spectral Lines from WIMP Annihilation in the Milky Way Using the Fermi Large Area Telescope Yvonne Vassetz Edmonds, 2011 The most popular class of dark matter candidates is the class of weakly-interacting massive particles (WIMPs). The Fermi Large Area Telescope has the possibility of indirectly detecting WIMPs by the flux from their annihilation/decay products. When a WIMP annihilates or decays directly into a photon gamma and another particle Y the photons are monochromatic. Detection of the resulting spectral line(s) would provide convincing evidence for particulate dark matter and could provide the WIMP mass. In the case of no detection, knowledge of the dark matter distribution can be used to place limits on the annihilation cross section and lifetime for the WIMP(s) to Y-gamma channel. We present the spectrum from 4.8 to 264 GeV and spectral line flux upper limits, obtained from a subset of this spectrum, from 7 to 200 GeV. The spatial region of the dataset covers a large portion of the sky, the high latitudes plus the Galactic Center. We report upper limits on the WIMP cross sections for annihilation to gamma-gamma and Z-gamma and lower limits on the WIMP lifetime for decay to gamma-neutrino. We discuss the implications of the spectrum and line flux limits for several dark matter models with optimistic branching ratios for photon channels.

The Armenian Genocide Richard G. Hovannisian, 2017-07-28 World War I was a watershed, a defining moment, in Armenian history. Its effects were unprecedented in that it resulted in what no other war, invasion, or occupation had achieved in three thousand years of identifiable Armenian existence. This calamity was the physical elimination of the Armenian people and most of the evidence of their ever having lived on the great Armenian Plateau, to which the perpetrator side soon gave the new name of Eastern Anatolia. The bearers of an impressive martial and cultural history, the Armenians had also known repeated trials and tribulations, waves of massacre, captivity, and exile, but even in the darkest of times there had always been enough remaining to revive, rebuild, and go forward. This third volume in a series edited by Richard Hovannisian, the dean of Armenian historians, provides a unique fusion of the history, philosophy, literature, art, music, and educational aspects of the Armenian experience. It further provides a rich storehouse of information on comparative dimensions of the Armenian genocide in relation to the Assyrian, Greek and Jewish situations, and beyond that, paradoxes in American and French policy responses to the Armenian genocides. The volume concludes with a trio of essays concerning fundamental questions of historiography and politics that either make possible or can inhibit reconciliation of ancient truths and righting ancient wrongs.
