The Elegant Solution Matthew May,2008-09-04 One million. That's how many new ideas the Toyota organization receives from its employees every year. These ideas come from every level of the organization - from the factory floors to the corporate suites. And organizations all over the world want to learn how they do it. Now Matthew May, Senior Advisor to the University of Toyota, reveals how any company can create an environment of every day innovation and achieve the elegant solutions found only on the far side of complexity. A tactical guide for team-based innovation, THE ELEGANT SOLUTION delivers the formula to the three principles and ten practices that drive business creativity. Innovation isn't just about technology - it's about value, opportunity and impact. When a company embeds a real discipline around the pursuit of perfection, the sky is the limit. Dozens of case studies (from Toyota and other companies) illustrate the power and universality of these concepts; a unique 'clamshell strategy' prepares managers to ensure organizational success. At once a thought-shaper, a playmaker, and a taskmaster, THE ELEGANT SOLUTION is a practical field manual for everyone in corporate life.

Driving from Japan Wanda James,2015-08-13 This study chronicles the success of the Japanese car in America. Starting with Japan's first gasoline-powered car, the Takuri, it examines early Japanese inventors and automotive conditions in Japan; the arrival of Japanese cars in California in the late 1950s; consumer and media reactions to Japanese manufacturers; what obstacles they faced; initial sales; and how the cars gained popularity through shrewd marketing. Toyota, Honda, Datsun (Nissan), Mazda, Subaru, Isuzu, and Mitsubishi are profiled individually from their origins through the present. An examination follows of the forced cooperation between American and Japanese manufacturers, the present state of the industry in America, and the possible future of this union, most importantly in the race for a more environmentally-sound vehicle.

The Car Bryan Appleyard,2022-09-06 A spirited, insightful exploration of our favorite machine and it's cultural impact on society over the past one hundred and fifty years. More than any other technology, cars have transformed American popular culture. Cars have created vast wealth as well as novel dreams of freedom and mobility. They have transformed our sense of distance and made the world infinitely more available to our eyes and our imaginations. They have inspired cinema, music and literature; they have, by their need for roads, bridges, filling stations, huge factories and global supply chains, re-engineered the world. Almost everything we now need, want, imagine or aspire to assumes the existence of cars in all their limitless power and their complex systems of meanings. This book celebrates the immense drama and beauty of the car, of the genius embodied in the Ford Model T, of the glory of the brilliant-red Mercedes Benz S-Class made by workers for Nelson Mandela on his release from prison, of Kanye West's 'chopped' Maybach, of the salvation of the Volkswagen Beetle by Major Ivan Hirst, of Elvis Presley's 100 Cadillacs, of the Rolls-Royce Silver Ghost and the BMC Mini and even of that harbinger of the end—the Tesla Model S and its creator Elon Musk. As the age of the car as we know it comes to an end, Bryan Appleyard's brilliantly insightful book tells the story of the rise and fall of the incredible machine that made the modern world what it is today.

Case Studies in Crisis Communication Amiso M. George, Cornelius B. Pratt, 1997-08-13 Case Studies in Crisis Communication: International Perspectives on Hits and Misses was created to fill the gap for a much-needed textbook in case studies in crisis communication from international perspectives. The events of September 11, 2001, other major world crises, and the ongoing macroeconomic challenges of financial institutions, justify the need for this book. While existing textbooks on the subject focus on U.S. corporate cases, they may not appeal equally to students and practitioners in other countries, hence the need to analyze cases from the United States and from other world regions. The variety and the international focus of the cases, be they environmental, health or management successes or failures, makes this book more appealing to a wider audience. These cases examine socio-cultural issues associated with responding to a variety of crises.

Tinplate Toy Cars of the 1950s and 1960s from Japan Andrew Ralston, 2008 After the Second World War, Japanese toy makers made tinplate replicas of many American and European cars, often reaching surprising heights of realism. Today, these tin cars are the most desirable of all vintage toys, fetching prices at auction in excess of diecast cars such as Dinky Toys. Seeking out the finest examples of these toys has been a lifelong passion for Bruce Sterling of New York, who has allowed his collection to be pictured in this volume. 150 of the rarest and best

toys are shown, all of them in pristine condition with their original boxes. Cadillac, Chevrolet, Buick, Packard and many other famous American names are represented, in addition to a good selection of European vehicles. All the toys are described in detail, and background information is provided about the prototypes on which they are based. A guide to current values is also given. This is a book that will be treasured, not only by specialist collectors, but by all who are passionate about vintage toys and classic vehicles.

Winning with Risk Management Russell Walker,2013 This book develops the notion that companies can succeed on the basis of risk management, much as companies compete on efficiency, costs, labor, location, and other dimensions. The reality of risk and how it impacts companies is that it is much more definite, often catastrophic and looks more like a shock. This is striking, as a difference between firms on risk different than a marginal difference in operating efficiencies, for example. Competing on Risk Management requires a discipline, a commitment to using information and recognizing shocks and then acting upon those to redistribute assets. This book will examine how leading firms that compete on risk have done this and showcase best practices and impacts to the capital structure of firms and their organizational formation.

New World Companies Bruce Piasecki,2016-01-05 What makes a global company great? For the past few decades, more than 60 percent of Fortune 500 companies have either failed or been significantly downgraded in size, influence, or governance structures. In *New World Companies*, *best-selling author and corporate consultant Bruce Piasecki examines this sobering reality and explains why certain twenty-first century companies are likely to thrive while others fall short. New World Companies* begins with an overview of today's global business environment. Specifically, it examines the recently evolved areas of corporate concern: environmental, social, and governance (ESG) practices. It then shows how this growing trend toward social responsiveness—involving areas such as preservation of the environment, the meeting of consumer and employee needs, and the transparency of company practices and philosophies—is proving to be an integral part of a successful operation. Subsequent chapters explore the role of digital technology in bringing the people of the world together in a new era of human rights; the evolution of shared values in business networks; the new flow of money management and successful investing; the importance of innovation and sustainability; and much more. *Whether you are an investor, an executive, or a consumer, New World Companies provides you with the tools needed to measure a company's potential for growth and success—or its likelihood of failure.*

Pitfalls of Corporate Leadership Francis J. Clauss,2023-03-30 Our nation is still reeling from the 346 fatalities suffered on two flights of the Boeing 737 MAX 8 planes, the first in May 2017 and the second in March

2019. These are just one of the series of costly and deadly consequences of defective products described in this book. Besides the Boeing 737 planes, the examples of bad products include automobiles, electrical energy networks, pipelines, bridges and other large structures, banks, drinkable water, and financial services. While the immediate or proximate causes of the disasters have been bad design or bad production, the root or underlying causes have been bad corporate management and business cultures caused by corporate leaders. The final five chapters provide short essays on product design, production, quality control, management, and culture and what the leaders of our private companies and government agencies might do to reduce the pitfalls that have led to so many defective products and their dire consequences.

The Origin of Competitive Strength Akira Kawahara, 2012-12-06 When the war ended on August 15, 1945, I was a naval engineering cadet at the Kure Navy Yard near Hiroshima, Japan. A week later, I was demobilized and returned to my home in Tokyo, fortunate not to find it ravaged by firebombing. At the beginning of September, a large contingent of the American occupation forces led by General Douglas MacArthur moved its base from Yokohama to Tokyo. Near my home I watched a procession of American military motor vehicles snaking along Highway 1. This truly awe-inspiring cavalcade included jeeps, two-and-a-half-ton trucks, and enormous trailers mounted with tanks and artillery. At the time, I was a 21-year-old student in the Machinery Section of Engineering at the Tokyo Imperial University. Watching that magnificent parade of military vehicles, I was more than impressed by the gap in industrial strength between Japan and the U. S. That realization led me to devote my whole life to the development of the Japanese auto industry. I wrote a small article concerning this incident in Nikkei Sangyo Shimbun (one of the leading business newspapers in Japan) on May 2, 1983. The English translation of this story was carried in the July 3, 1983 edition of the Topeka Capital-Journal and the September 13, 1983 issue of the Asian Wall Street Journal. The Topeka Capital-Journal headline read, MacArthur's Jeeps Were the Toyota Catalyst.

Cruise O Matic Yasutoshi Ikuta, 2000-02 The 1950s were the golden age of the American automobile, and the cars were faster, bigger, and more boldly styled than ever before. Sunday driving--Cleaver-style--in the regal family Ford, Edsel or Plymouth topped the list of national pastimes; and teenagers, behind the wheels of their daddies' thundering T-birds, had fun, fun, fun across America's highways. The economic prosperity of the country made for an ultramatic boom in car manufacturing, and the advertising industry followed suit. This reprint of a Chronicle Books classic collects the masterpieces of automobile advertising, culled from the pages of such popular periodicals as Life, The Saturday Evening Post, Collier's, Look, and Holiday. Their colorful illustrations and catchy copy give these ads a power-packed beauty all their own, offering a fun look at 50s culture and values. So take a cruise down memory lane with this fond look back on a time when tail fins and chrome were the standard, and the American car was the true King of the Road.
