**Toyota Mr2 Gold Portfolio, 1984-97** R. M. Clarke,1998-05 The original MR2 had flat panels and sharp edges and was not the prettiest of cars. But with its

all-round MacPherson strut suspension it handled well and with a twin-cam 1.6-litre 16-valve engine developing 122bhp it was fast too. It was a sales success. Five years later the car was replaced by one with the same designation but the styling was more rounded. By now it had better performance and a choice of engines ranging from 119bhp to 158bhp versions of the 2-litre 16-valve twin-cam. Later came the 245bhp Turbo. This is a book of contemporary road and comparison tests, specification and technical data, new model introductions, driver's impressions, long-term tests, buying second hand. Cover the CoupT, T-Bar, GT, Turbo, Supercharged.

**Toyota MR2 1990-1999** ,2012-01-01 Toyota gave the MR2 a complete makeover for 1990. Bigger, faster and in production twice as long as the first generation, it is no surprise to learn that the second type of MR2 was also a much better seller. Although manufacture ended in 1999, this generation is arguably the one that represents what the Toyota MR2 is all about for most people. All W20 models are covered and includes road, comparison test, plus full specifications.

*Toyota MR2 1984-1989* ,2012-01-01 Fun replaced functionality as Toyota totally transformed its corporate image with the introduction of the MR2 sports car. Providing performance and ultra-precise handling, the mid-engined two-seater was a joy to drive. All W10 models are covered and includes road and comparison tests, model introductions plus full specifications and performance data.

**History of Electric Cars** Nigel Burton, 2013-06-30 One hundred years ago electric cars were the most popular automobiles in the world. In the late nineteenth century and at the start of the twentieth century, they outsold every other type of car. And yet, within a couple of decades of the start of the twentieth century, the electric car had vanished. Thousands of battery-powered cars disappeared from the streets, replaced by the internal combustion engine, and their place in the history of the automobile was quietly erased. A century later, electric cars are making a comeback. Fears over pollution and global warming have forced manufacturers to reconsider the electric concept. A History of Electric Cars presents for the first time the full story of electric cars and

their hybrid cousins. It examines how and why electric cars failed the first time - and why today's car manufacturers must learn the lessons of the past if they are to avoid repeating previous mistakes all over again. The book examines in detail: Early vehicles such as the Lohner-Porsche petrol-electric hybrid of 1901; Key figures in the history of the electric car development such as Henry Ford; Sir Clive Sinclair's plans to build a number of electric vehicles, designed to sit alongside the Sinclair C5; The return of the electric technology to vehicles as diverse as the NASA Lunar Rover, commuting vehicles and supercars; Future developments in electric cars. For the first time the full story of electric cars and their hybrids are examined. The hidden past of the electric automobile is uncovered and its future developments are discussed. Superbly illustrated with 300 colour photographs, many of which are rare and original sketch designs. Nigel Burton has written and lectured on cars and automotive history for more than twenty years.
