The Lives of Brian Brian Johnson, 2022-10-25 Brian Johnson's memoir from growing up in a small town to starting his own band to ultimately replacing Bon Scott, the lead singer of one of the world's biggest rock acts, AC/DC. They would record their first album together, the iconic Back in Black, which would become the biggest selling rock album of all time. Brian Johnson was born to a steelworker and WWII veteran father and an Italian mother, growing up in New Castle Upon Tyne, England, a working-class town. He was musically inclined and sang with the church choir. By the early '70s he performed with the glam rock band Geordie, and they had a couple hits, but it was tough going. So tough that by 1976, they disbanded and Brian turned to a blue-collar life. Then 1980 changed everything. Bon Scott, the lead singer and lyricist of the Australian rock band AC/DC died at 33. The band auditioned singers, among them Johnson, whom Scott himself had seen perform and raved about. Within days, Johnson was in a studio with the band, working with founding members Angus and Malcolm Young, Cliff Williams, and Phil Rudd, along with producer Mutt Lange. When the album, Back in Black, was released in July—a mere three months after Johnson had joined the band—it exploded, going on to sell 50 million copies worldwide, and triggering a years-long worldwide tour. It has been declared “the biggest selling hard rock album ever made” and “the best-selling heavy-metal album in history.” The band toured the world for a full year to support the album, changing the face of

rock music—and Brian Johnson's life—forever.

Vehicles David Lipset, Richard Handler, 2014-08-01 Metaphor, as an act of human fancy, combines ideas in improbable ways to sharpen meanings of life and experience. Theoretically, this arises from an association between a sign—for example, a cattle car—and its referent, the Holocaust. These “sign-vehicles” serve as modes of semiotic transportation through conceptual space. Likewise, on-the-ground vehicles can be rich metaphors for the moral imagination. Following on this insight, Vehicles presents a collection of ethnographic essays on the metaphoric significance of vehicles in different cultures. Analyses include canoes in Papua New Guinea, pedestrians and

airplanes in North America, lowriders among Mexican-Americans, and cars in contemporary China, Japan, and Eastern Europe, as well as among African-Americans in the South. Vehicles not only “carry people around,” but also “carry” how they are understood in relation to the dynamics of culture, politics and history.

The Car Show Nicolae Sfetcu, 2014-04-27 This e-book details the most interesting and important characteristics of the automobiles, car maintenance, styling features, car body style, the standard classification of the cars, an history of the automobiles, introduction in the automotive industry, and the traffic code, rules and signs. An automobile, usually called a car (an old word for carriage) or a truck, is a wheeled vehicle that carries its own engine. Older terms include horseless carriage and motor car, with “motor” referring to what is now usually called the engine. It has seats for the driver and, almost without exception, for at least one passenger. The automobile was hailed as an environmental improvement over horses when it was first introduced. Before its introduction, in New York City, over 10,000 tons of manure had to be removed from the streets daily. However, in 2006 the automobile is one of the primary sources of worldwide air pollution and cause of substantial noise and health effects.
