Bacillus thuringiensis Biotechnology Estibaliz Sansinenea,2012-03-14 *Bacillus thuringiensis* (Bt) has been used as a biopesticide in agriculture, forestry and mosquito control because of its advantages of specific toxicity against target insects, lack of polluting residues and safety to non-target organisms. The insecticidal properties of this bacterium are due to insecticidal proteins produced during sporulation. Despite these ecological benefits, the use of Bt biopesticides has lagged behind the synthetic chemicals. Genetic improvement of Bt natural strains, in particular Bt recombination, offers a promising means of improving efficacy and cost-effectiveness of Bt-based bioinsecticide products to develop new biotechnological applications. On the other hand, the different *Bacillus* species have important biotechnological applications; one of them is carried out by producing secondary metabolites, which are the study object of natural product chemistry. The amazing structural variability of these compounds has attracted the curiosity of chemists and the biological activities possessed by natural products have inspired the pharmaceutical industry to search for lead structures in microbial extracts. Screening of microbial extracts reveals the large structural diversity of natural compounds with broad biological activities, such as antimicrobial, antiviral, immunosuppressive, and antitumor activities that enable the bacterium to survive in its natural environment. These findings widen the target range of *Bacillus* spp., in special *B. thuringiensis*, besides insecticidal activity and help people to better understand its role in soil ecosystem.

The Flaviviruses: Detection, Diagnosis and Vaccine Development ,2003-12-18 Over 50% of known flaviviruses have been associated with human disease. The Flavivirus genus constitutes some of the most serious human pathogens including Japanese encephalitis, dengue and yellow fever. Flaviviruses are known for their complex life cycles and epidemic spread, and are considered a globally-emergent viral threat. Detection, Diagnosis and Vaccine Development, the third volume of The Flaviviruses details the current status of technologies for detection and differentiation of these viruses, their use in surveillance and outbreak investigation, and also reviews the latest clinical research. Comprehensive approach to the scientific disciplines needed to unravle the complexities of virus-host interactions Describes the technologies that have contributed to our current knowledge about the Flaviviruses Identifies the major problems faced in understanding the virus-host interactins that result in disease An exhaustive compendium of current and past knowledge on the Flavivirus family

Replicating Vaccines Philip R. Dormitzer,Christian W. Mandl,Rino Rappuoli,2010-11-02 Technological advances, together with a better understanding of the molecular biology of infectious microorganisms, are creating exciting possibilities for a new generation of replicating vaccines. Historically, live vaccines have been either directly derived from a natural source or attenuated by empirical approaches using serial passages and host cell adaptation. Currently, we are witnessing a quantum leap in our technological capabilities to specifically modify the genetic make-up of viruses and bacteria, making it possible to generate improved live vaccines and to develop completely new types of replicating vaccines, such as vectored vaccines, single-round infectious vaccines and replicon vaccines. This book highlights some of the most exciting recent developments towards a new generation of replicating vaccines.

Nonwood Plant Fibers for Pulp and Paper Pratima Bajpai,2021-01-09 Nonwood Plant Fibers for Pulp and Paper examines the use of nonwood plant fibers for pulp and paper, worldwide pulping capacity of nonwood fibers, categories of non-wood raw materials, problems associated with the utilization of non-wood fibers, pulping, bleaching, chemical recovery and papermaking of nonwood raw materials, the use of nonwood plant fibers in specific paper and paperboard grades, and the advantages and drawbacks of using nonwood fiber for papermaking and future prospects. This book gives professionals in the field the most up-to-date and comprehensive information on the state-of- the-art techniques and aspects involved in pulp and paper making from nonwood plant fibers. Provides comprehensive coverage on all aspects of pulping and papermaking of non-wood fibers Covers the latest science and technology in pulping and papermaking of non-wood fibers Focuses on biotechnological methods, a distinguishing feature of this book and its main attraction Presents valuable references related to the pulp and papermaking industry

Education in the United Kingdom Colin Brock,2015-01-29 Education in the United Kingdom is a comprehensive critical reference guide to education in England, Scotland, Wales, Northern Ireland, The Isle of Man, The Channel Islands, Gibraltar, The Cayman Islands, Bermuda, Anguilla and The British Overseas Territories. Although generically similar in education structures, the various components of the United Kingdom have separate systems, with some very distinctive differences. The chapters, written by regional experts, offer a review of contemporary national and regional educational structures and policies, research innovation and trends. Some of the themes covered include issues relating to the partition of Ireland, differences between maintained and independent schooling, language issues and radical alternatives in teacher education. Including a comparative introduction to the issues facing education in the region as a whole and guides to available online datasets, this book is an essential reference for researchers, scholars, international agencies and policy-makers.

Visitor Experience Design Noel Scott,Jun Gao,Jianyu Ma,2017-08-18 Most discussion of visitor experiences uses a behavioural or managerial approach where the way the visitor thinks is ignored - it's a black box. Visitor Experience Design is the first book of its kind to examine best practice in creating and delivering exciting and memorable travel and visitation experiences from a cognitive psychological perspective - it opens the black box. The chapters draw on recent findings from cognitive psychology, cognitive science and neuroscience to provide a basis for a better understanding of the antecedents of a memorable experience. Tourism, hospitality and event managers seek to provide WOW experiences to their visitors through better design and management.This book encourages the discussion of different facets of experience design such as emotions, attentions, sensations, learning, the process of co-creation and experiential stimuli design. It will be of interest to tourism researchers and postgraduate students studying tourism management, marketing and product design.

Technology Investment Kuno J.M. Huisman,2001-11-30 The technology investment decision of an individual firm has become a very complex matter in recent years. One reason is the incredibly rapid progress of technological developments in the last decades. Another reason is the existence of and movement towards oligopolistic markets. In this book, several theoretical and technology investment models of the firm are developed and analyzed. To solve these models real options theory and game theory is used. The real options theory makes it possible to explicitly take into account (and value) the option value of waiting. Game theory is used to incorporate strategic interactions. Technology Investment extends the already existing real options models by the introduction of game theory. The game theory, or more specifically, the theory of timing games, is extended by the inclusion of stochastics.

Psychopharmacological Agents Maxwell Gordon,2013-10-22 Psychopharmacological Agents, Volume II, provides an overview of the state of knowledge in psychopharmacological agents. The organization of this

book is generally based on a treatment of the major classes of psychopharmacological agents in separate chapters. To the extent allowed by the diverse nature of the subject matter, each chapter covers the history, synthesis, pharmacological activity, in vivo distribution and metabolic fate, analytical methods, and, briefly, the clinical uses of each class of psychopharmacological agents. This volume includes a chapter on the butyrophenones, one on miscellaneous psychopharmacological agents, and one on the biochemical basis of mental disease. The last named chapter is not exhaustive, but is merely meant to be illustrative of the currents of research that one finds in this field. The appendices have been used as a vehicle for collecting part of the part of the flood of reports that could not be included in either of the two volumes. Although written primarily for medicinal chemists and pharmacologists, researchers in other disciplines such as clinical investigation, biochemistry, analytical chemistry, etc., may also find material of interest here.

Free Electron Lasers 2001 M. Brunken,H. Genz,A. Richter,2002 The 23 rd International Free Electron Laser Conference and the 8 th FEL Users Workshop were held on August 20-24 th 2001 at the Technische Universitat Darmstadt (TUD) in Germany. This conference is one of a series of FEL conferences administered by an International Executive Committee. It was organized by the Institute of Nuclear Physics of the TUDD at which in 1996 the first free electron laser in Germany went into operation, the super-conducting Darmstadt electron linear accelerator.

Nano-Electronic Devices Dragica Vasileska,Stephen M. Goodnick,2011-06-10 This book surveys the advanced simulation methods needed for proper modeling of state-of-the-art nanoscale devices. It systematically describes theoretical approaches and the numerical solutions that are used in explaining the operation of both power devices as well as nano-scale devices. It clearly explains for what types of devices a particular method is suitable, which is the most critical point that a researcher faces and has to decide upon when modeling semiconductor devices.

Axiomatic Formal Ontology Uwe Meixner,2013-04-17 Axiomatic Formal Ontology is a fairly comprehensive systematic treatise on general metaphysics. The axiomatic method is applied throughout the book. Its main theme is the construction of a general non-set-theoretical theory of intensional entities. Other important matters discussed are the metaphysics of modality, the nature of actual existence, mereology and the taxonomy of entities.

Debating Lapita Stuart Bedford,Matthew Spriggs,2019-12-12 ‘This volume is the most comprehensive review of Lapita research to date, tackling many of the lingering questions regarding origin and dispersal. Multidisciplinary in nature with a focus on summarising new findings, but also identifying important gaps that can help direct future research.’ — Professor Scott Fitzpatrick, Department of Anthropology, University of Oregon ‘This substantial volume offers a welcome update on the definition of the Lapita culture. It significantly refreshes the knowledge on this foundational archaeological culture of the Pacific Islands in providing new data on sites and assemblages, and new discussions of hypotheses previously proposed.’ — Dr Frédérique Valentin, Centre national de la recherche scientifique (CNRS), Paris This volume comprises 23 chapters that focus on the archaeology of Lapita, a cultural horizon associated with the founding populations who first colonised much of the south west Pacific some 3000 years ago. The Lapita culture has been most clearly defined by its distinctive dentate-stamped decorated pottery and the design system represented on it and on further incised pots. Modern research now encompasses a whole range of aspects associated with Lapita and this is reflected in this volume. The broad overlapping themes of the volume—Lapita distribution and chronology, society and subsistence—relate to research questions that have long been debated in relation to Lapita.
