**The Socialist Car** Lewis H. Siegelbaum, 2013-04-18 Across the Soviet Bloc, from the 1960s until the collapse of communism, the automobile exemplified the tension between the ideological imperatives of political authorities and the aspirations of ordinary citizens. For the latter, the automobile was the ticket to personal freedom and a piece of the imagined consumer paradise of the West. For the authorities, the personal car was a private, mobile space that challenged the most basic assumptions of the collectivity. The socialist car—and the car culture that built up around it—was the result of an always unstable compromise between official ideology, available resources, and the desires of an increasingly restless citizenry. In *The Socialist Car*, eleven scholars from Europe and North America explore in vivid detail the interface between the motorcar and the state socialist countries of Eastern Europe, including the USSR. In addition to the metal, glass, upholstery, and plastic from which the Ladas, Dacias, Trabants, and other still extant but aging models were fabricated, the socialist car embodied East Europeans' longings and compromises, hopes and disappointments. The socialist car represented both aspirations of overcoming the technological gap between the capitalist first and socialist second worlds and dreams of enhancing personal mobility and status. Certain features of automobility—shortages and privileges, waiting lists and lack of readily available credit, the inadequacy of streets and highways—prevailed across the Soviet Bloc. In this collective history, the authors put aside both ridicule and nostalgia in the interest of trying to understand the socialist car in its own context.

**Reading the Everyday** Joe Moran, 2005 Studying the work of important continental theorists, Joe Moran explores the concrete sites and routines of everyday life and how they are represented through political discourse, news media, material culture, photography, reality TV and more.

*Car Emblems* Giles Chapman, 2015-10-12 First published 2005 by Merrell Publishers Limited.--Colophon.

*Automotive FDI in Emerging Europe* A. J. Jacobs, 2017-06-19 This book examines the dramatic increase in automotive assembly plants in the former Socialist Central European (CE) nations of Czechia, East Germany, Hungary, Poland, and Slovakia from 1989 onwards. Enticed by relatively lower-wage labour and significant government incentives, the world's largest automakers have launched more than 20 passenger car assembly complexes in CE nations, with production accelerating dramatically since 2001. As a result, the annual passenger car production in Western Europe declined by more than 20% between 2001 and 2015, and alternatively in the CEE it increased by nearly 170% during this period. Drawing on case studies of 25 current and former foreign-run assembly plants, the author presents a rare historical account of automotive foreign assembly plants in the CE following this dramatic geographic shift. This book will expand the knowledge of policy-makers in Europe in relation to their pursuits of FDI and will be of great interest to scholars and students of business, economic history, political science, and development.

*Communicating Mobility and Technology* Ehren Helmut Pflugfelder, 2016-07-07 Winner of the 2018 CCCC Technical and Scientific Communication Award in the category of Best Book in Technical or Scientific Communication Responding to the effects of human mobility and crises such as depleting oil supplies, Ehren Helmut Pflugfelder turns specifically to automobility, a term used to describe the kinds of mobility afforded by autonomous, automobile-based movement technologies and their ramifications. Thus far, few studies in technical communication have explored the development of mobility technologies, the immense power that highly structured, environmentally significant systems have in the world, or the human-machine interactions that take place in such activities. Applying kinaesthetic rhetoric, a rhetoric that is sensitive to and developed from the mobile, material context of these technologies, Pflugfelder looks at transportation projects such as electric taxi cabs from the turn of the century to modern day, open-source vehicle projects, and a large case study of an autonomous, electric pod car network that ultimately failed. Kinaesthetic rhetoric illuminates how mobility technologies have always been persuasive wherever and whenever linguistic symbol systems and material interactions enroll us, often unconsciously, into regimes of movement and ways of experiencing the world. As Pflugfelder shows, mobility technologies involve networks of sustained arguments that are as durable as the bonds between the actors in their networks.

**Extra Lemon!** Tony Davis, 2005 'The sales slogan was 'Make way for the Austin Freeway'. Car buyers did more than that. 'They gave it the widest berth possible.' 'You may not recall the Falcon EA. But Ford certainly does. It had to recall tens of thousands of them.' 'During 27 years, the Trabant evolved from a primitive, badly built deathtrap into a primitive, badly built deathtrap with a 12-volt electrical system.' In this laugh out-loud sequel to the bestselling LEMON!, Tony Davis inducts 65 more cars into his Motoring Hall of Shame. Read about cars like the East German Trabant, with its cotton-reinforced body; or the dafter-than-you'd-believe-possible Lightburn Zeta Sports, which the brochure bizarrely dubbed a 'super car' (the only thing it could leap in a single bound was out of gear). There's the appalling Piazza, the ridiculously hyped Tucker 48 and the explosive Ford Pinto: all shining

examples of the hair-brained, the unsightly, the excruciatingly dull and the magnificently unsuccessful. EXTRA LEMON will make you wince, groan and avert your eyes - once you've stopped laughing. More heroic failures of motoring by the author of the bestselling LEMON!

**Museums of Communism** Stephen M. Norris, 2020-11-03 How did communities come to terms with the collapse of communism? In order to guide the wider narrative, many former communist countries constructed museums dedicated to chronicling their experiences. Museums of Communism explores the complicated intersection of history, commemoration, and victimization made evident in these museums constructed after 1991. While contributors from a diverse range of fields explore various museums and include nearly 90 photographs, a common denominator emerges: rather than focusing on artifacts and historical documents, these museums often privilege memories and stories. In doing so, the museums shift attention from experiences of guilt or collaboration to narratives of shared victimization under communist rule. As editor Stephen M. Norris demonstrates, these museums are often problematic at best and revisionist at worst. From occupation museums in the Baltic States to memorial museums in Ukraine, former secret police prisons in Romania, and nostalgic museums of everyday life in Russia, the sites considered offer new ways of understanding the challenges of separating memory and myth.

**Total Wheelspin** Tony Davis, 2013-12-01 TOTAL WHEELSPIN is a boot full of obscure facts, bizarre anecdotes and vehicular folly that will have car lovers laughing out loud. A follow up to the bestselling LEMON, EXTRA LEMON and TOTAL LEMONS by the very funny Tony Davis. tOtAL WHEELSPIN should come with a caution: READING tHIS IS ADDICtIVE. Whether debating the pros and cons of the chosen transport of superheroes, musing on why people (well, men) hang their arms out the car window, revealing the third-best-selling car of all time, or comparing the school run to taking on Vettel and Alonso in the Formula One Grand Prix, each part is so compelling you simply will not be able to stop turning the pages until you reach the end. And you will not be able to stop yourself laughing out loud at the obscure facts, bizarre anecdotes, and vehicular follies of the motoring world as seen through the eyes of the very funny Tony Davis.

**Volkswagens of the World** Simon Glen, 2003-11-01 A comprehensive guide to all the Volkswagens not built in Germany and the unusual ones that were. Covers type designations, chassis numbers, VW options and much more.

**World History of the Automobile** Erik Eckermann, 2001-09-01 This book details the development of the automobile from its early beginnings to the present day. With emphasis on the European historical perspective, particularly the pioneering developments which occurred in Germany, World History of the Automobile chronicles the early vehicles by Daimler, Maybach and Benz, the Mercedes Era, the role of motor vehicles in World Wars I and II, and the numerous technological and business revolutions of the second half of the 20th century.

**Material Fantasies** Milena Veenis, 2012 This study of East German fantasies of material abundance across the border, both before and after the fall of communism, shows the close and intricate relation between ideology and fantasy in upholding social life. In 1989, news broadcasts all over the world were dominated for weeks by images of East Germans crossing the Berlin Wall to West Germany. The images, representing the fall of communism and the democratic will of the people, also showed East Germans' excitement at

finally being able to enter the western consumer paradise. But what exactly had they expected to find on the other side of the Wall? Why did they shed tears of joy when for the first time in their lives, they stepped inside West German shops? And why were they prepared to pay more than 10 percent of their average monthly wage for a pineapple? Drawing on fifteen months of research in the fast-changing post-communist East Germany, Veenis unravels the perennial truths about the interrelationships of fantasies of material wealth, personal fulfillment and social cohesion. She argues persuasively that the far-fetched socialist and capitalist promises of consumption as the road to ultimate well-being, the partial realization and partial corruption thereof, the implicit social and psychological interests underlying the politicized promises in both countries form the breeding ground for the development of materialist, cargo-cult-like fantasies, in which material well-being came to be seen as the place of fulfillment and ultimate arrival. -Publisher's website.

**Motor Vehicles, the Environment, and the Human Condition** Hans A.

Baer,2019-10-09 This book explores the political ecology of motor vehicles in an era of growing social disparities and environmental crises. Humanity needs to move beyond motor vehicles as much as possible as part and parcel of the larger process of radical social structural changes.

**The evolution of automotive technology** Gijs Mom,2023-05-17 The idea of understanding the present through its history is based on two insights. First, it helps to know where a technology comes from: what were its predecessors, how did they evolve as a result of the continuous efforts to solve theoretical and practical problems, who were crucial in their emergence, and which cultural differences made them develop into divergent families of artifacts? Second, and closely related to the first insight, how does a certain technology or system fit into its societal context, its culture of mobility, its engineering culture, its culture of car driving, its alternatives, its opponents? Only thus, by studying its prehistory and its socio-cultural context, can we acquire a true 'grasp' of a technology. *The Evolution of Automotive Technology: A Handbook*, Second Edition covers one and a quarter century of the automobile, conceived as a cultural history of its technology, aimed at engineering students and all those who wish to have a concise introduction into the basics of automotive technology and its long-term development. (ISBN:9781468605976 ISBN:9781468605969 ISBN:9781468605983 DOI:10.4271/9781468605976) 2nd Edition.

*Transition Strategies* H. Hungenberg,T. Wulf,2002-07-16 The transition process of the countries of Central and Eastern Europe, which started more than a decade ago, has been the focus of much attention for both practitioners and scholars. Few studies however, address management issues involved in the transition process and no study has, until now, assessed the strategies and tactics which individual companies have pursued over the past decade as part of their adaptation process. This book fills this gap and will leave the reader with a better understanding of the adaptation process at single firm level.

**World Directory of Modern Military Vehicles** Bart Harmannus Vanderveen,1983

The World's Worst Mark Frauenfelder,2011-12-16 Bookstore shelves are lined with tomes dedicated to the finest things that life has to offer. This is all well and good, but the real entertainment is to be found not in the cream of the crop, but at the bottom of the barrel. *The World's Worst* is a

celebration/indictment of nearly 50 infamous and little-known exemplars of the awful. In thoroughly researched, scathingly funny essays, author Mark Frauenfelder avoids the obvious and digs deep to tell the fascinating tales of the worst people, places, and things on Earth for the reader's amusement and edification. Half of the entries are also mischievously illustrated by the author. Addictively readable, and sure to appeal to fans of the popular Worst-Case Scenario and Darwin Awards series, *The World's Worst* is hilariously unafraid to wallow in the mire. **the little book of microcars** Adam Quellin,2015-10-22 After the Second World War Europe was in economic crisis and manufacturing lay in ruins. Materials were in short supply, and factories were forbidden from building aircraft. There was a need for cheap, economical transport, but acquiring a new car was difficult, and secondhand cars were not as readily available as they are today. By the 1950s, a myriad of economy cars had appeared on the market to fill this vacuum. Former aircraft companies – and even a refrigerator manufacturer – turned their hand to producing tiny cars that were often quirky and eccentric. Many of these little cars earned the nickname 'bubblecars' due to their bulbous shape. The 1960s brought with it new levels of affluence, and these microcars almost faded from view. But today, they are enjoying a resurgence of popularity, with many becoming highly-prized collectors items. Increased traffic levels and fuel prices, and a greater awareness of environmental issues, have also created demand for a new generation of microcars, and car makers have responded accordingly with exciting new designs. Illustrated with over 70 colour photographs, this book celebrates the best of these weird and wonderful motoring marvels.
