Everything You Need to Know about E Collar Training Larry Krohn,2017-04-21 Whether you like it or not, if you have a dog you are training it. The question is are you training it for good or are you training it for bad. Training starts before training starts. How you live with your dog dictates how your dog lives with you. They learn from everything we do, good and bad. They miss nothing. They know us better than we know ourselves. They learn from everything we don't do. Obedience commands don't create a well behaved dog. Raising a dog and teaching along the way does. No parent says they are going outside to train their kids. We just raise them and teach them 24 hours a day and try to provide guidance so eventually our children can make the right decisions on their own. Dogs are no different. Live right with them. They are not children. They are animals and must be respected as such. And they are a precious gift that are not here long enough so enjoy every minute and never take them for granted.

Remote Viewing David Morehouse,2010-11-05 It possible to see across space and time Even those who accept that humans can reach beyond the conventional five senses typically think of psychics as special or gifted with unusual abilities. But David Morehouse teaches other wise all human beings, including you, have the innate capacity for Remote Viewing. David Morehouse was trained by the U.S. government in Remote Viewing an exact scientific protocol for tapping the human power to gather information across space and time. In this comprehensive manual, he has taken his military training as an operational Remote Viewer and turned it into a step-by-step training system one that teaches any serious reader how to unlock their natural abilities and become more than the physical world allows. You have the ability to do this, Morehouse says. Something extraordinary is absolutely possible in your life. Remote Viewing is more than simply a method for gathering information. It is a transformational tool instilling within you the absolute and irrefutable evidence that you are more than human that you are extraordinarily human. As you gain experience and confidence as a Viewer, you will tap into the collective unconscious that connects you to everything and everyone in the universe. Through David More house's training, you will learn to touch the infinite source of life and knowledge that spiritual masters throughout human history have sought.

The Essential Guide to Remote Viewing Paul H. Smith,2015-05-31 Written by one of the world's leading experts in the field, The Essential Guide to Remote Viewing is a basic introduction to the extraordinary extrasensory perceptual skill which was developed for the US military during the Cold War. This book describes what remote viewing is, how it came to be, what kinds of remote viewing there are, and counters skeptical arguments against remote viewing's legitimacy. Further, the book contains examples of successful remote viewing attempts, explains how remote viewing can be used for practical purposes, how ordinary civilians can themselves now learn to do it, and outlines experiments that readers can try for themselves. The ideal reader of The Essential Guide to Remote Viewing will be someone who knows little or nothing about remote viewing and wants an inexpensive source for credible information. Others who will be interested are those who are involved in remote viewing and want an easily-accessible introduction to give to friends or relatives who have questions about what this thing is their loved ones have gotten involved with. Finally, those who are already involved with remote viewing but feel the need to extend their basic knowledge will find this book both interesting and useful.

Remote Work Revolution Tsedal Neeley,2021-03-30 LONGLISTED FOR THE FINANCIAL TIMES & MCKINSEY BUSINESS BOOK OF THE YEAR “I often talk about the importance of trust when it comes to work: the trust of your employees and building trust with your customers. This book provides a blueprint for how to build and maintain that trust and connection in a digital environment.” –Eric S. Yuan, founder and CEO of Zoom A Harvard Business School professor and leading expert in virtual and global work provides remote workers and leaders with the best practices necessary to perform at the highest levels in their organizations. The rapid and unprecedented changes brought on by Covid-19 have accelerated the transition to remote working, requiring the wholesale migration of nearly entire companies to virtual work in just weeks, leaving managers and employees scrambling to adjust. This massive transition has forced companies to rapidly advance their digital footprint, using cloud, storage, cybersecurity, and device tools to accommodate their new remote workforce. Experiencing the benefits of remote working—including nonexistent commute times, lower operational costs, and a larger pool of global job applicants—many companies, including Twitter and Google, plan to permanently incorporate remote days or give employees the option to work from home full-time. But virtual work has it challenges. Employees feel lost, isolated, out of sync, and out of sight. They want to know how to build trust, maintain connections without in-person interactions, and a proper work/life balance. Managers want to know how to lead virtually, how to keep

their teams motivated, what digital tools they'll need, and how to keep employees productive. Providing compelling, evidence-based answers to these and other pressing issues, Remote Work Revolution is essential for navigating the enduring challenges teams and managers face. Filled with specific actionable steps and interactive tools, this timely book will help team members deliver results previously out of reach. Following Neeley's advice, employees will be able to break through routine norms to successfully use remote work to benefit themselves, their groups, and ultimately their organizations.

Virtual Training Jeb Blount, 2021-06-22 Remote learning has been around since the 18th century. Caleb Phillips began advertising correspondence courses in the Boston Gazette in 1728 allowing people, for the first time, to learn new skills no matter where they lived. For the past 300 years, virtual training, in its various formats, has been meandering into shore on an inevitable yet slow building tide. And then, just like that, everything changed. A global pandemic. Social distancing. Working from home. In an instant, the tide became a tsunami. The global pandemic accelerated the broad adoption of virtual instructor led training along with awareness that classroom-based training is often expensive, inefficient, and fails to deliver a fair return on investment. While it is certainly more challenging to re-create the collaborative environment of the physical classroom in a virtual setting, virtual training combines the structure, accountability, and social learning benefits of classroom training with speed, agility, and significant cost savings. Simply put, virtual training enables organizations to rapidly upskill more people, while generating a far higher return on the training investment. Virtual training is also green. Studies indicate that virtual training consumes nearly 90% less energy and produces 85% fewer CO2 emissions than classroom training. Still, the biggest challenge with virtual training, and the reason there has been so much resistance to it, is historically the experience has been excruciating. Not the quality of the curriculum or content. Not the talent of the trainer. The learning experience. There are few people who haven't had the pleasure of sitting through agonizing virtual training sessions. Death by voice over PowerPoint, delivered by a disengaged instructor, has an especially bitter flavor. It is the way virtual training is delivered that matters most. When the virtual learning experience is emotionally positive: Participants are more engaged, embrace new competencies, and knowledge sticks. Participants are more likely to show up to class and be open to future virtual training. Trainers enjoy their work and gain fulfillment from making an impact. Leaders book more virtual training. Organizations more readily blend and integrate virtual training into learning & development initiatives. This is exactly what this book is about. Virtual Training is the definitive guide to delivering virtual training that engages learners and makes new skills and behavioral changes stick. Jeb Blount, one of the most celebrated trainers and authors of our generation, walks you step-by-step through the seven elements of effective, engaging virtual learning experiences. Trainer Mindset & Emotional Discipline. Production & Technology. Media & Visuals. Virtual Curriculum & Instructional Design. Planning & Preparation. Virtual Communication Skills. Dynamic & Interactive Training Delivery. As you dive into these powerful insights, and with each new chapter, you'll gain greater and greater confidence in your ability to effectively deliver training in a virtual classroom. Once you master virtual training delivery and experience the power of remote learning, you may never want to go back to the physical classroom again.
