Bad Guys Don't Have Birthdays Vivian Gussin Paley,2013-07-26 Bad guys are not allowed to have birthdays, pick blueberries, or disturb the baby. So say the four-year-olds who announce life's risks and dangers as they play out the school year in Vivian Paley's classroom. Their play is filled with warnings. They invent chaos in order to show that everything is under control. They portray fear to prove that it can be conquered. No theme is too large or too small for their intense scrutiny. Fantasy play is their ever dependable pathway to knowledge and certainty. It . . . takes a special teacher to value the young child's communications sufficiently, enter into a meaningful dialogue with the youngster, and thereby stimulate more productivity without overwhelming the child with her own ideas. Vivian Paley is such a teacher.—Maria W. Piers, in the American Journal of Education [Mrs. Paley's books] should be required reading wherever children are growing. Mrs. Paley does not presume to understand preschool children, or to theorize. Her strength lies equally in knowing that she does not know and in trying to learn. When she cannot help children—because she can neither anticipate nor follow their thinking—she strives not to hinder them. She avoids the arrogance of adult to small child; of teacher to student; or writer to reader.—Penelope Leach, author of *Your Baby & Child* in the New York Times Book Review [Paley's] stories and interpretation argue for a new type of early childhood education . . . a form of teaching that builds upon the considerable knowledge children already have and grapple with daily in fantasy play.—Alex Raskin, Los Angeles Times Book Review Through the 'intuitive language' of fantasy play, Paley believes, children express their deepest concerns. They act out different roles and invent imaginative scenarios to better understand the real world. Fantasy play helps them cope with uncomfortable feelings. . . . In fantasy, any device may be used to draw safe boundaries.—Ruth J. Moss, Psychology Today

Furry Logic Matin Durrani,Liz Kalaugher,2016-10-06 The animal world is full of mysteries. Why do dogs slurp from their drinking bowls while cats lap up water with a delicate flick of the tongue? How does a tiny turtle hatchling from Florida circle the entire northern Atlantic before returning to the very beach where it hatched? And how can a Komodo dragon kill a water buffalo with a bite only as strong as a domestic cat's? These puzzles – and many more besides – are all explained by physics. From heat and light to electricity and magnetism, Furry Logic unveils the ways that more than 30 animals exploit physics to eat, drink, mate and dodge death in their daily battle for survival. Along the way, science journalists Matin Durrani and Liz Kalaugher introduce the great physicists whose discoveries helped us understand the animal world, as well as the animal experts of today who are scouring the planet to find and study the animals that seem to push the laws of physics to the limit. Presenting mind-bending physics principles in a simple and engaging way, Furry Logic will appeal both to animal lovers and to those curious to see how physics crops up in the natural world. It's more of a 'howdunit' than a whodunit, though you're unlikely to guess some of the answers.

Trapping 101 Philip Massaro,2020-03-24 Tips, tactics, and techniques for all skill levels. The ancient art of trapping goes back centuries, almost to the beginning of civilization. Native Americans used the pit trap, deadfalls, and snares, the Chinese documented the use of nets and pits in the fourth century BCE, and virtually every civilization can exhibit some example of the use of a trap in one form or another to procure meat, hides, or fur. The fur trade across Europe was dominated by the Russians, which provided furs to the greater part of Western Europe and Asia during the Middle Ages, which prompted the exploration of Siberia and its game rich forests. In North America, trapping was one of the primary reasons why settlers pushed West, taking advantage of the bountiful game across the continent. Fur was used not only for coats, hats, and mittens, it was used as a form of barter. The taking of a fur-bearing animal was and is a big accomplishment, as fooling a crafty animal on its home territory is no easy feat. In Trapping 101, veteran trapper Phil Massaro reveals all the secrets of the trade, from knowing where to set traps, to understanding and using various types of traps, to properly using scents. Tips and tactics for taking beavers, muskrats, weasels, raccoons, skunks, otters, and more are all covered. While there is a wealth of information in here for beginners, information that will help them pick up trapping with relative ease, there are many subtle tips and tricks that even a veteran trapper will appreciate. Times have, of course, changed since the days of the voyageurs and rendezvouses. There are many more people in this modern world, many more dwellings, many more towns and cities. But there is a place for trapping in all this, just as there are places for hunting and fishing. A knowledgeable trapper, following game rules and respecting the animals he is trying to trap, fits right into the grand scheme of Mother Nature existing in harmony with humankind. This book will help you achieve that.
