Joyce Sidman

Dear Treefrog Joyce Sidman,2021 With magical, concise and perceptive poems, Newbery-Honor winning author Joyce Sidman captures the life of a tree frog in an intimate and moving way. A master of the science note, her fascinating sidebars help bind the twin poems together and ground our perspective. We learn how treefrogs have sticky toe pads, how they still themselves when in danger, how they can change from green to gray to camouflage themselves - even how they eat their own skins, which is full of nutrients. The narrator's connection with this small creature brings solace, comfort, and a sense of mystery--

Tree Frog Dee Phillips,2013-08-01 On a bright green leaf in a rain forest tree, a tiny frog is resting until night falls, when it's time to go hunting. The frog's red eyes are closed, and its colorful orange feet are tucked beneath its body. From above, the green frog is perfectly camouflaged against the leaf, and almost invisible to its predators. Filled with information perfectly suited to the abilities and interests of its second-grade audience, this colorful, fact-filled volume introduces young readers to the everyday life of a red-eyed tree frog. What does a tree frog eat? How does it stay safe from predators? And how does an amphibian that lives in trees find the water that's needed for its tadpoles to survive and thrive? Throughout the book, readers are encouraged to make scientific observations based on the book's images and answer questions about the lives and physical characteristics of these tiny frogs. This innovative approach to teaching about wild animals gives young scientists the chance not only to read and learn the facts, but also to develop their own powers of observation and critical thinking.
