Fusées et satellites de Youjnoe Christian Lardier,2023-04-01 Le bureau d'étude OKB-586/Youjnoe de Dniepropetrovsk en Ukraine a développé un grand nombre de fusées militaires, de lanceurs spatiaux et de satellites, notamment des séries Cosmos et Intercosmos. Ce sont des milliers de fusées et satellites de Youjnoe qui ont été, pour la plupart, produits en série par l'usine n°586/YoujMach. Cette entreprise, créée en 1951, a fêté ses 70 ans en 2021. Elle a été dirigée de 1954 à 1971 par Mikhaïl Yangel qui fut un des trois grands constructeurs soviétiques de la technique fuséo-cosmique avec Sergueï Korolev et Vladimir Tchelomeï. Fusées et satellites de Youjnoe traite des différents programmes qui ont été réalisés pendant les 40 ans de la période soviétique liée à la course aux armements et à la course à l'espace entre les États-Unis et l'Union soviétique, puis pendant les 30 ans de la période ukrainienne caractérisée par la coopération avec l'Occident et l'ouverture de la commercialisation. L'ouvrage intègre les dernières informations issues des archives déclassifiées.

**Soviet T-55 Main Battle Tank** James Kinnear,Stephen Sewell,2019-09-19 A highly illustrated study of the T-55 Main Battle Tank and its variants that formed the backbone of the Soviet Army during the years of the Cold War. The T-55 is one of the most iconic weapons created by the Soviets during the Cold War and also one of the most widely deployed weapons in history. Like its younger brother, the T-54, the T-55 enjoyed a long career in the Red Army and even into the early days of the reformed Russian Army. Under their control it saw very little combat use or deployments, but it was widely sold to other nations and participated in many of the wars and combat operations from the mid-1960s to the present. The T-55 has been employed in almost every conflict in the Middle East and Africa from its introduction into service. Even today the tank is still employed by both sides in the Syrian Civil War, and they are also in service with Kurdish forces in the struggle against ISIS in the northern part of Iraq. Containing more than 400 stunning contemporary and modern photographs, and written by two experts on Soviet armour, this authoritative book tells the complete story of the T-55, one of the most widely produced tanks of all time.

*Russian Naval Construction, 1905-45* J.N. Westwood,1994-09-13 This book examines how the types, numbers and designs of Russian warships were determined in the years preceding the two world wars, with the three-way interplay of naval staff, naval designers, and political leaders, resulting in fleets that contained some outstanding units but were, on the whole, inappropriate to the tasks set by those wars. It also considers how under both Nicholas II and Stalin foreign ideas were adopted with too little consideration of Russia's unique circumstances.

*Stalin's Ocean-going Fleet* Mikhail Monakov,Jurgen Rohwer,2012-11-12 A study of the development of strategic concepts in Stalin's Navy, in the context of his foreign/defence policy, using original archival documents translated from the Russian.

**Stalin's Ocean-going Fleet: Soviet** Jurgen Rohwer,2017-07-05 In this work, two senior naval historians analyze the discussions held in leading Soviet political, military, and naval circles concerning naval strategy and the decisions taken for warship-building programmes. They describe the reconstitution of the fleet under difficult conditions from the end of the Civil War up to the mid-1920s, leading to a change from classical naval strategy to a Jeune école model in the first two Five-Year Plans, including efforts to obtain foreign assistance in the design of warships and submarines. Their aim is to explain the reasons for the sudden change in 1935 to begin building a big ocean-going fleet. After a period of co-operation with Germany from 1939-41, the plans came to a halt when Hitler attacked the Soviet Union in 1941. Finally, this work covers the reopening of the naval planning processes in 1944 and 1945 and the discussions of the naval leadership with Stalin, the party and government officials about the direction of the new building programmes as the Cold War began.
