Tupelov Tu-22 'Blinder' Tu-22M 'Backfire' Yefim

Gordon,Vladimir Rigmant,1998 Prior to the development of the Tu-22, NATO planners had long feared the idea of the Soviets developing a long-range supersonic nuclear bomber. The Tu-22 'Blinder' never really gave the USSR what they were looking for but Tu-22M 'Backfire' did! This information-packed volume reveals Soviet tactics for destroying NATO warships using 'Blinders', and its use by Libya and Iraq.

Tupolev TU-22/TU-22M Yefim Gordon,Sergey

Komissarov,2012-07-05 The Tupolev Tu-22 Blinder and Tu-22M Backfire led the Soviet Union's supersonic bomber air force from the 1960s, although the two aircraft were very different. The Tu-22—nicknamed Blinder by NATO—was the pioneering supersonic bomber in the USSR, entering production in 1960. The first Tu-22B aircraft entered Soviet service in 1962 and the aircraft continued into production until 1969 through several variants, including reconnaissance and electronic warfare versions. The aircraft was a mixed success as its performance compared unfavorably the Tu-16. It was also sold abroad to Libya and Iraq. The Tu-22M Backfire was developed by Tupolev during the 1960s

when the Tu-22's shortcomings became apparent. The variable-geometry wings in the new design improved performance considerably and the new aircraft entered service in 1972 in the strategic bomber role and it was used in this capacity in the 1979–1989 war against Afghanistan. Yefim's Gordon's unparalleled access to information on Russian aviation makes this the most complete book published on this fascinating aircraft.

Tupolev Tu-22M Yefim Gordon, 2004-03-24 - Covers the development and service history of the Tu-22M, first proposed to the Soviet government as a modification of the existing Tu-22 'Blinder' but later proving to have virtually nothing in common with the Blinder. - After the Soviet Union's demise, the type continued to be operated by Russia and the Ukraine. - Contains 200 black & white and color photos.

Tupolev TU-22 Sergey Burdin, 2005-11-17 This historic Russian aircraft was first delivered to the Soviet Air Force at the height of the Cold War in 1961. It remained in service until replaced by the much modified Tu-22M Backfire which was introduced in the early 1970s and still remains in service. It was the first Soviet supersonic bomber and was used for reconnaissance and bombing, in the latter role carrying either conventional or

nuclear bombs. The early aircraft had a range of 1,800 miles but later models had a much increased radius of action through the introduction of in-flight refuelling. This book looks at the design and development of the aircraft up to the introduction of the type M Backfire. Details of construction, weapon systems, photo-reconnaissance and jamming equipment are included to cover the several variant models. Operational use is explained and the text includes many first-hand accounts from Russian aircrew of the period. The book will be superbly illustrated by unique official photographs and manuals.

Soviet Air Power of the Cold War Michael Green,2023-04-28 At the peak of the Cold War in the 1950s the Soviet Union possessed some 12,000 aircraft, making it the largest air force of all the protagonists. By the 1990s this had declined to around 8,000, the reduction largely reflecting the increase in aircraft capability. As well as fighters and bombers, the Soviet inventory included trainers, transports, seaplanes, electronic warfare and ground

attack aircraft, as well as an impressive helicopter fleet, notably the Mi-24 'Hind' gunship and the massive Homer transport. The Tu-4 'Bull' was the first Russian nuclear-capable bomber, a copy of the US B-29, which was followed by their range of jet bombers, the Il-28 'Beagle', Tu-16 'Badger' and M-4 'Bison'. The prop driven Tu-20 'Bear' and its successors including the Tu-22 'Backfire' and finally the Tu-160 'Backfire', were all formidable. The jet-engined MiG-15 fighter entered service in 1948 and proved itself during the Korean War. The MiG-17, MiG-19 and MiG-21 followed . Ground-attack aircraft included the Su-7 'Fitter' and M-23 'Flogger'. The 1970s saw the MiG-25 'Foxbat' interceptor, followed by the MiG-29 'Fulcrum' and Su-27 'Flanker', coming into service. All these aircraft and many more are authoritatively described and vividly illustrated in this comprehensive work.

The Kremlin's Nuclear Sword Steven J. Zaloga,2014-05-27 The prevailing Western view of Russia's Cold War strategic nuclear weapons policy is that it resulted from a two-part interplay between

the leaders of the Communist Party and the military. Steven J. Zaloga has found that a third contributor—the Russian defense industry—also played a vital role. Drawing from elusive Russian source material and interviews with many proud Russian and Ukrainian engineers, Zaloga presents a definitive account of Russia’s strategic forces, who built them, and why. The book is the first in English to refer to the weapons by their actual Soviet names, providing the bedrock for future works. Helpful appendices list U.S., NATO, and other designations, and the illustrations provide clear visual references.

Cornerstones of Security Thomas Graham, Damien J LaVera, 2003 This anthology presents the complete text of 34 treaties that have effectively contained the spread of nuclear, biological, and conventional weapons during the Cold War and beyond. The treaties are placed in historical context by individual commentaries from noted authorities Thomas Graham Jr. and Damien J. LaVera, which provide unique insights on each treaty’s negotiation and implementation. There is no comparable resource available for diplomats, international lawyers, and arms control specialists.

International Warbirds John C. Fredriksen,2001-08-01 In depth descriptions and photographs of the aircraft of 21 nations presented with a unique human dimension that goes behind the machines to the people involved. Invaluable for specialists, accessible to enthusiasts, *International Warbirds: An Illustrated Guide to World Military Aircraft, 1914–2000* puts the most legendary fighter aircraft of the 20th century developed outside the United States on vivid display. It offers 336 illustrated biographies of the most significant warplanes used in squadron service from World War I to the Balkan conflict, including numerous models from Great Britain, France, Russia, and Japan, as well as notable machines from Israel, Canada, China, India, Brazil, and other nations. Entries span the history and scope of military aircraft from bombers and fighters to transports, trainers, reconnaissance craft, sea planes, and helicopters, with each capsule history combining nuts-and-bolts technical data with the story of that model's evolution and use. Together, these portraits offer an exciting, well-researched tribute to visionary designers and builders as well as courageous pilots and crews across the globe, and tell a vivid tale

of how air power became such a decisive factor in modern warfare.

Weapons of Mass Destruction [2 volumes] Eric A.

Croddy,James J. Wirtz,Jeffrey A. Larsen,2004-12-22 The first accessible reference to cover the history, context, current issues, and key concepts surrounding biological, chemical, and nuclear weapons. A collection of information on everything from aerosols to zones of peace, these two volumes cover historical background, technology, and strategic implications of biological, chemical, and nuclear weapons, thus providing facts, terms, and context needed to participate in contemporary policy debate. This encyclopedia is the only comprehensive reference dedicated to the three types of weapons of mass destruction. With over 500 entries arranged

alphabetically, volume one covers biological and chemical weapons, while volume two focuses on nuclear weapons. Experts from eight countries cover issues related to these weapons, policies, strategies, technologies, delivery vehicles, arms control concepts, treaties, and key historical figures and locations. Entries are written to make difficult concepts easy to understand by cutting through military and scientific jargon. Students, lay readers, scientists, and government policy makers are provided with the broad range of information needed to place today's policy discussions in proper strategic or historical context.

artworks and photographs, this is a colorful guide for the military aviation enthusiast.

Soviet Strategic Bombers Jason Nicholas Moore, 2018-06-30

The history of Soviet strategic bombers after the Second World War is a fascinating one: from the reverse-engineering of interned American Boeing B-29 bombers into the first Soviet strategic bomber, the Tu-4; to the huge jet and turbo-prop powered aircraft of today's Russian Air Force. This comprehensive history of these aircraft will deal not just with the development of aircraft that entered service, but of experimental aircraft as well, and projects that were never even built will also be explored. The service life of these bombers will be covered, including both active and retired aircraft, and their use outside of the Soviet Union, in places such as the Middle East and Afghanistan, will be described in detail. The Soviet Union built some of the first jet-powered strategic bombers, and the Tu-95 Bear, the only swept-winged turbo-prop bomber to ever enter service, remains in service to this day. Less successful aircraft, like the graceful but problem-plagued supersonic Tu-22 Blinder, and the Mach 3 Sukhoi T-4 will also be examined.
