Ducks of Britain and Europe M. A. Ogilvie,2010-09-30 The forty-two species or subspecies of ducks which occur in Europe, including eleven vagrants from North America or Asia, are the subject of this book. Its author is an accepted authority on ducks and geese, and has been a member of the research staff of the Wildfowl Trust at Slimbridge since 1960. Most birdwatchers consider ducks to be especially attractive and interesting birds, and many species of ducks are also the legitimate quarry of wildfowlers. Both groups need to identify the species quickly and accurately, and almost half of the book is devoted to identification, offering a far more detailed account than is to be found in any of the field guides. There are detailed descriptions, species by species, of the adult males and females, immature birds, eclipse males, and downy young - voice, too, is dealt with - and full-colour plates of males and females show the flight patterns, so important for correct species identification. The habits of European ducks are treated in chapters on behaviour and ecology, breeding biology, distribution and status, and the ever-fascinating topic of migration and navigation. The distribution chapter has maps showing the summer and winter ranges in Europe, North Africa, the Middle East and Central Russia, for 24 species. A final chapter considers the present day threats to ducks and their wetland habitats, and the conservation measures being taken to combat the threats. The colour plates and more than 80 line drawings in the text are by Carol Ogilvie, the author's wife. Jacket illustration by Carol Ogilvie

*Birds of the Middle East* Richard Porter,Simon Aspinall,2019-07-31 This is a completely revised second edition of the bestselling field guide to the birds of the Middle East, covering Turkey, Cyprus, Syria, Lebanon, Israel, Jordan, Iraq, Iran, the Arabian peninsula and Socotra. For the first time, the text and maps appear opposite the plates, and as a consequence there are fewer species per plate than before. The text and maps have been fully revised and many new artworks have been painted by the three illustrators. There are more than 100 new species in this new edition, which features more than 820 species in total. This is an essential field guide for anyone visiting the Middle East.

**Urban Wings: A Photographic Journey of City Birds** Mukund Kumar,2023-10-14 Welcome to Urban Wings: A Photographic Journey of City Birds. As a bird photographer, Mukund has had the unique privilege of capturing the intricate beauty and essence of avian life in and around the wetlands of urban landscapes. This book aims to showcase the diversity and allure of birds that enrich our cities, captivating viewers with their presence and resilience. Amidst the concrete jungles and the cacophony of human activity, these feathered inhabitants often go unnoticed, blending seamlessly into the background. However, a closer look by Mukund reveals a fascinating array of species that have adapted and thrived within our metropolitan settings and adjoining wetlands. As urban sprawl encroaches upon green spaces, Mukund believes it becomes increasingly vital to acknowledge and celebrate our urban avian neighbors. Through the pages of this book, Mukund invites readers to embark on a visual adventure, unveiling the secret lives of these city and wetland-dwelling birds. From majestic raptors soaring above skyscrapers to delicate songbirds serenading in urban wetlands and city parks, each photograph within these pages tells its own unique story of survival and adaptation.

**Birds of Essex** Simon Wood,2009-01-01 This book is an essential reference for anybody who has watched birds in this amazing county. The County Avifaunas give full details of the status and range of every species recorded in the county in question. Each title covers all species on the county list, with a detailed breakdown of rarity records, and each has introductory sections describing the county's general ecology, climate, weather patterns, its ornithological history and conservation record. Essex is of national and international importance to many migrating and wintering wildfowl and waders, which can be found on the estuaries. Further inland, the Lea Valley harbours important populations of several species within the complex of reservoirs and gravel-pits. Elsewhere, the diverse habits of woodland and parkland, heaths and commons, agricultural land and urban areas mean that at all times of year there is the opportunity to see upwards of 100 species in a day with little effort. This book analyses and summarises all the data collated and documented over the last 200 years and includes available records to the end of 2004. Introductory chapters discuss the geology and habitats of Essex and the amazing fossil bird record. The individual accounts provide an up-to-date status of each species and patterns of occurrence within Essex. A distribution map is included for most breeding species. A breakdown and analysis are provided for all county rarities. Superb line drawings and photographs illustrate the book, all by talented local artists and photographers.
