Peoples of the Tundra John P. Ziker,2002-04-11 On ethnographic grounds alone, Zikers book is a unique and valuable contribution. Despite increased fieldwork opportunities for foreigners in the former Soviet Union in recent years, much of Russia and Siberia remains terra incognita to Western scholars, except for specialists who know the Russian literature. Zikers account of the Dolgan and Nganasan peoples of the Ust Avam community is a fascinating analysis of how people adapt their hunting, fishing, and herding not only to

the demanding Arctic environment but also to enormous economic and political adversities created in the wake of the Soviet Unions collapse. In this sense, the book fills a gap in the ethnographic literature on Siberia for Western students and, at the same time, serves as a microcosm of the devastating changes affecting rural communities and indigenous peoples generally in a disintegrating former superpower: that is, increasing isolation and a shift to nonmarket survival economies.

Vegetation and Production Ecology of an Alaskan Arctic Tundra Larry L. Tieszen, 2012-12-06 This volume on botanical research in tundra represents the culmination of four years of intensive and integrated field research centered at Barrow, Alaska. The volume summarizes the most significant results and interpretations of the primary producer projects conducted in the U.S. IBP Tundra Biome Program (1970-1974). Original data reports are available from the authors and can serve as detailed references for interested tundra researchers. Also, the results of most projects have been published in numerous papers in various journals. The introduction provides a brief overview of other ecosystem components. The main body presents the results in three general sections. The summary chapter is an attempt to integrate ideas and information from the previous papers as well as extant literature. In addition, this chapter focuses attention on processes of primary production which should receive increased emphasis. Although this book will not answer all immediate questions, it hopefully will enhance future understanding of the tundra, particularly as we have studied it in Northern Alaska.
