**Tupolev** Paul Duffy, A. I. Kandalov, 1996 This book focuses on the aircraft designs of the man often referred to as the father of Russian aviation, Andrei Nikolaevich Tupolev. Born in Russia in 1888, Tupolev went on to design aircraft that earned Russia worldwide acclaim for their contributions to aviation in the 1920s, '30s, and '40s.

*Russian Aviation and Air Power in the Twentieth Century* John Greenwood, Von Hardesty, Robin Higham, 2014-06-11 In the light of new archival material the editors take a fresh look at Russian aviation in the twentieth century. Presenting a comprehensive view of Russian aviation, from its genesis in the late czarist period to the present era, the approach is essentially chronological with a major emphasis on the evolution of military aviation. The contributions are diverse, with appropriate attention to civilian and institutional themes.

*Military Aircraft, 1919-1945* Justin D. Murphy, Matthew A. McNiece, 2008-12-08 An in-depth history of the time when airpower became the great equalizer, changing military strategy forever and bringing once-safe targets in reach. *Military Aircraft, 1919-1945: An Illustrated History of Their Impact* covers a crucial era in modern warfare technology. Ranging from the development

of airpower doctrines in the aftermath of World War I to the aircraft and missions that put those doctrines into action during World War II, it provides an expert summing-up of the decades when the use of aircraft in battle came of age. In chapters covering both the history of air power and specific types of aircraft (fighters, bombers, reconnaissance and auxiliary planes), *Military Aircraft, 1919–1945* introduces key theorists and designers, describes important changes in technology and production, and recreates spectacular episodes from Pearl Harbor to the London Blitz to the Enola Gay. Readers will see the dramatic impact of the first generation of modern military aircraft on land and sea. They will also see how the expansion of war to the skies brought economic opportunity to some home fronts, and looming terror and devastation to others.

**The Finnish-Soviet Winter War 1939–40** David Murphy, 2021-09-16 This informative study explores the Soviet invasion of Finland, detailing the events of the Winter War of November 1939 to March 1940. The invasion was expected to be swift and decisive, however, the fighting qualities of the Finnish Army blunted the Soviet advance and inflicted high numbers of casualties. A combination of difficulties caused by the weather, the terrain, the Mannerheim Line defences and Finnish tactics resulted in a fascinating David vs Goliath type struggle. On 23 August 1939, a secret protocol was appended to the German–Soviet Non-Aggression Pact; as part of this, Finland was assigned to the Soviet sphere of influence. On 30

November that year, in an effort to protect against renewed German aggression in the East, the Soviet Union attacked Finland, beginning what became known as the Finnish-Soviet Winter War. This long-awaited addition to the Campaign series explores the events of the war of November 1939 to March 1940. Set against the background of the developing global conflict, the conflict saw the Finnish Army thwart the plans of the sizeable Soviet forces assembled against it, before finally being forced to concede. The major battles of the war, which took place in harsh winter conditions, are covered in detail, including the Mannerheim Line, the fighting in Ladoga Karelia and Kollaa, and the clashes in Finnish Lapland.

**Monino Museum Moscow** Ken Duffey, 2013-06-19 One of the premier collections of Soviet and Russian aircraft, the Monino museum opened in 1960 and covers an area of about 20 hectares. It has on display more than 173 aircraft and 127 aero engines, with 44 of its exhibits having been declared as monuments of science and technology. The Monino museum charts the history of Soviet and Russian aviation from the earliest pre-revolutionary days until the present time, with exhibits in the form of models, artefacts, posters, aero engines, weapons etc., as well as airframes, ejection seats, rockets covering the later period. This book describes and illustrates all the exhibits on display in this amazing museum. It serves as a guide for those visiting Monino, and a mouth-watering taste for those unable to get there in person!

**The Proton Launcher** Christian Lardier, Stefan Barensky, 2018-03-27 The Soviet / Russian space program was in the hands of three industrial empires: those of Serguei Korolev, the Soviet von Braun who launched Sputnik-1 and Yuri Gagarin, Vladimir Tchelomei, his main competitor, and Mikhail Yangel, Many launchers and satellites in Ukraine. In 2011, we published a first book on the history of the Soyuz launcher that was developed by Korolev and launched more than 1,800 copies. This time, we tell the story of the Proton, the main competitor of the European launcher Ariane, which was developed by Chelomei and launched more than 400 copies. Finally, the last book of the trilogy will deal with the many developments of Yangel. In the three books, the first part deals with the history of rockets in the USSR / Russia (East) and the second part on the history of their commercialization in the West.

**The Winter War 1939–40** Philip Jowett, 2023-08-03 Jowett has amassed an impressive amount of detail, yet the writing never bogs down. He leads the reader through this war with precision and employs images to great effect. – New York Journal of Books When the Soviet Union invaded Finland in late 1939, what transpired was a true “David and Goliath” conflict. When Finland refused a number of Soviet demands, including the ceding of substantial border territories ostensibly to enable the Soviets to protect Leningrad, the Soviets responded by launching an invasion. The invasion involved a large Soviet army, with several thousand tanks, and a large air force. But to the world's surprise the Finnish Army—many of

them reservists without proper uniforms and limited ammunition—and Air Force battled overwhelming odds, and managed to resist Russian attacks for over two months, inflicting serious losses. Geography played its part as much of the Finnish-Soviet border was impassable, meaning that Soviet numerical superiority was of less import. Operating in the winter, with temperatures ranging as low as -43F, the Finns' determined resistance won them international reputation. Although hostilities finally ended in a peace treaty that saw Finland cede 9% of its territory, Soviet losses had been heavy, and Finland retained its sovereignty. This fully illustrated text will cover the forces involved and all stages of the Winter War.

The Osprey Encyclopedia of Russian Aircraft Bill Gunston, 2000-05-25 Sweeping away the red herrings and spurious details invented in the West between 1950 and 1970, this exhaustive volume can be offered to the public with the knowledge that it documents the true histories of some 1000 aircraft types. Much of what was believed to be fact has been proven wrong in various degrees, and it can confidently be claimed that no book in the history of aviation has ever contained so much new information. The volume is prefixed by sections on aircraft designations, engines, air launched weapons and much more - this really is the definitive work on Russian aircraft.

**The Encyclopedia of Weapons of World War II** Chris Bishop, 2002 The encyclopedia of weapons of world war II is the most detailed and authoritative compendium of the weapons of

mankind's greatest conflict ever published. It is a must for the military, enthusiast, and all those interested in World War II.

**OKB Tupolev** E. Gordon, Vladimir Rigmant, 2005 A History of the Design Bureau and its Aircraft Yefim Gordon & Vladimir Rigmant The origins of the design bureau that was to bear his name can be traced back to the appointment of Andrey Nikolayevich Tupolev as head of the TsAGI's Aviation Department in 1918. Over the years, nearly 300 projects have evolved within the OKB. Nearly 90 reached the prototype construction stage, with more than 40 types put into series production. In the 1930s, the TB-1 (ANT-4) and TB-3 (ANT-6) bombers, the latter being the world's first heavy strategic bomber, paved the way for the long line of large multi-engined aircraft both civil and military for which the OKB is justly famed. Wartime production of the SB and Tu-2 plus the remarkable 'reverse engineering' of the Boeing B-29 that resulted in the Tu-4 led on to the jet Tu-16 and prop Tu-95 bombers. These, in turn were adapted for civil purposes as the Tu-104 and Tu-114 airliners. The supersonic Tu-22 and Tu-22M bombers and the Tu-144 airliner, a move into pilotless aircraft and a host of imaginative but unbuilt projects complete a fascinating work.

Soviet Aircraft Industry Peter G Dancey, 2017-04-22 Soviet aircraft industry was an essential part of the USSR's campaign for global dominance in the twentieth century. Thanks to the thick fog of secrecy that enveloped it throughout the Cold War, it has long inspired the fascination of analysts and enthusiasts in the West; until the

collapse of the USSR in 1991, details of Soviet aircraft were often a matter of conjecture. This book aims to uncover fully the mystery surrounding this topic. Drawing on original and previously unpublished information obtained directly from the former USSR, Soviet Aircraft Industry examines the unique characteristics of Soviet-designed aircraft—particularly military types, which were the cause of great concern to the West. Further, by virtue of the industry's central role throughout Soviet history, this book provides a rare and important perspective into the broader theme of Russia's great communist experiment.

**Intelligence Images from the Eastern Front** Roy M. Stanley, 2016-11-30 Despite the Luftwaffe being ordered to destroy millions of aerial photos in 1945, the Allies found no less than twenty tons of photos in eleven locations, including a hoard in a Bavarian barn. These together with vast numbers of photographs taken by German soldiers used for Intelligence analysis were put into classified Allied Intelligence files at a time when USAAF and RAF imagery was being destroyed. Covering Iron Curtain countries they were valuable for cartography and target intelligence during the Cold War. The captured German imagery (called GX) in this book show what the German Army knew about the Soviet Union before and during Operation Barbarossa. Examples show Eastern Front landforms, key cities such as Stalingrad, Moscow, Sevastopol, Leningrad and factories. They are accompanied by helpful comments from a skilled photo interpreter. This unique and diverse collection, some taken from 28,000 feet overhead, others taken

by soldiers on the ground, reveal the war on the Eastern Front as it has never been seen before.

**Wings of History** Louis Divone, Judene Divone, 1989

**Pe-2 Guards Units of World War 2** Dmitriy Khazanov, Aleksander Medved, 2013-02-20 Petlyakov's Pe-2 was the most numerous Soviet twin-engined bomber of World War 2, the aircraft being used as a dive-bomber, ground attack platform and dedicated reconnaissance type. The first examples entered service in August 1940, and by the time production came to end in late 1945, no fewer than 10,547 examples had been built. These equipped more than 80 bomber air regiments, and of the latter, two were accorded Guards Air Corps status, as were six air regiments. Amongst the former was the 2nd Guards Bomber Air Corps, which was commanded by the legendary General Polbin, who was twice made a Hero of the Soviet Union. Pe-2 bomber and reconnaissance versions (the latter in service with four Guards reconnaissance air regiments of the Air Force and one regiment of Naval Aviation) were extensively used from the frozen Arctic north to the balmy Crimea front. A number of Pe-2 also saw brief combat against Japan in the final weeks of World War 2.

**Modern Air Force of Russia: Ilyushin&Tupolev Airplanes** Alexander Tigr, 2018-06-28 Modern Air Force of Russia: Ilyushin&Tupolev Airplanes

**When Tigers Ruled the Sky** Bill Yenne, 2016-07-05  
From the acclaimed author of *Hit the Target* and *Big Week*, an in-depth account of the legendary World War II combat group, the Flying Tigers. In 1940, Pearl Harbor had not yet happened, and America was not yet at war with Japan. But China had been trying to stave off Japanese aggression for three years—and was desperate for aircraft and trained combat pilots. General Chiang Kai-shek sent military aviation advisor Claire Chennault to Washington, where President Roosevelt was sympathetic, but knew he could not intervene overtly. Instead, he quietly helped Chennault put together a group of American volunteer pilots. This was how the 1st American Volunteer Group—more commonly known as the Flying Tigers—was born. With the trademark smiling shark jaws on their P-40 fighters, these Army, Navy and Marine pilots became a sensation as they fought for the Chinese. Those who initially doubted them were eventually in awe as they persevered over Rangoon despite being outnumbered 14-1 by Japanese aircraft; as

they were described by Madame Chiang Kai-shek as her “little angels” and by a Chinese foreign minister as “the soundest investment China ever made”; and as they ultimately destroyed hundreds of Japanese planes while losing only a dozen of their own in combat. Two of their veterans would later earn the Medal of Honor—and as a group, the Flying Tigers managed to rack up a better record than any other air wing in the Pacific theater. When Tigers Ruled the Sky is a thrilling and triumphant account of their courage and their legacy.

The Experimental Units of Hitler's Condor Legion  
Rafael A. Permuy López, 2017-01-30 At the start of the Spanish Civil War the nationalists sought help for their cause from Germany, following which volunteers from the German Air Force and Army formed what was called the Condor Legion. This force made a significant contribution to General Franco's eventual victory and this included two experimental air units, known as VJ/88 and VB/88. The former's mission was to combat test the new monoplane fighters; the Messerschmitt Bf 109 and the Heinkel He 112. The latter group's task was to test the new twin-engine, retractable undercarriage bombers; the Heinkel He 111, the fast Dornier Do 17 and the Junkers Ju 86. The Heinkels made their combat debut on 9 March 1937, when they attacked Republican held airfields in support of the Battle of Guadalajara. The Heinkel proved superior to the two other German medium bombers, being both faster and carrying a heavier bomb load. Likewise, the Messerschmitt Bf 109 was quickly found to be the better of the two

fighters. This book aims to examine the history of the men and machines that served in those units. The Fhrer thought the matter over. I urged him to give support [to Franco] under all circumstances, firstly, in order to prevent the further spread of communism in that theatre and, secondly, to test my young Luftwaffe at this opportunity in this or that technical respect. Herman Gring at the Nuremberg War Trials.
