The Turkish Language Reform : A Catastrophic Success Geoffrey Lewis,1999-11-18 This is the first full account of the transformation of Ottoman Turkish into modern Turkish. It is based on the author's knowledge, experience and continuing study of the language, history, and people of Turkey. That transformation of the Turkish language is probably the most thorough-going piece of linguistics engineering in history. Its prelude came in 1928, when the Arabo-Persian alphabet was outlawed and replaced by the Latin alphabet. It began in earnest in 1930 when Ataturk declared: Turkish is one of the richest of languages. It needs only to be used with discrimination. The Turkish nation, which is well able to protect its territory and its sublime independence, must also liberate its language from the yoke of foreign languages. A government-sponsored campaign was waged to replace words of Arabic or Persian origin by words collected from popular speech, or resurrected from ancient texts, or coined from native roots and suffixes. The snag - identified by the author as one element in the catastrophic aspect of the reform - was that when these sources failed to provide the needed words, the reformers simply invented them. The reform was central to the young republic's aspiration to be western and secular, but it did not please those who remained wedded to their mother tongue or to the Islamic past. The controversy is by no means over, but Ottoman Turkish is dead. Professor Lewis both acquaints the general reader with the often bizarre, sometimes tragicomic but never dull story of the reform, and provides a lively and incisive account for students of Turkish and the relations between culture, politics and language with some stimulating reading. The author draws on his own wide experience of Turkey and his personal knowledge of many of the leading actors. The general reader will not be at a disadvantage, because no Turkish word or quotation has been left untranslated. This book is important for the light it throws on twentieth-century Turkish politics and society, as much as it is for the study of linguistic change. It is not only scholarly and accessible; it is also an extremely good read.

Studies in Turkish Linguistics Dan Isaac Slobin,Karl Zimmer,1986-01-01 Turkish is a member of the Turkic family of languages, which extends over a vast area in southern and eastern Siberia and adjacent portions of Iran, Afganistan, and China. Turkic, in turn, belongs to the Altaic family of languages. This book deals with the morphological and syntactic, semantic and discourse-based, synchronic and diachronic aspects of the Turkish language. Although an interest in morphosyntactic issues pervades the entire collection, the contributions can be grouped in terms of relative attention to syntax, semantics and discourse, and acquisition.

Comparison between English and Turkish compounds Seda Evirgen, 2016-08-29 Seminar paper from the year 2015 in the subject English Language and Literature Studies - Linguistics, grade: 1,0, , course: Morphology, language: English, abstract: This term paper will give an overview of compounds in general, about the stress and the types of compounds. Furthermore, to take a closer look at the languages comes the differentiation of nominal compounds, adjective compounds and verbal compounds in English and Turkish. The final point is the analysis of the differences and similarities of English and Turkish compounds. With the help of word formation processes we form new words and there are many different processes that lead to many different new words. Compounding is a morphological operation where two or more free morphemes create one complex morpheme. Compounds are very important because they can prevent ambiguity if you just take a closer look at them and there are probably no languages without compounding. Every language is in need of compounded words because of the new inventions and changes in our society everyday. One of the most important and often used word formation processes is compounding. This term paper presents a general overview of the structure of compounds in English and Turkish. Because my mother language is Turkish and I study English, I was really interested in the differences between the English and Turkish language. English is an analytic language and Turkish an agglutinating language therefore it makes it more interesting to analyze.

The Oxford Turkish Grammar Gerjan van Schaaijk, 2020-07-23 This volume is a comprehensive grammar of the Turkish language, suitable both for students of the Turkish language and linguistic scholars. Gerjan van Schaaijk draws on sound linguistic research and an extensive corpus of real-life data, alongside more than twenty years of feedback from university classrooms, to provide the most complete, up-to-date, and practically useful survey of the Turkish language ever compiled. Following an introduction that provides background information on the Turkic languages and an overview of the linguistic terminology adopted in the volume, the first part of the book explores the fundamentals of Turkish spelling and pronunciation. Parts II and III explore the noun phrase and adjuncts and modifiers, respectively, while Parts IV and V examine the verbal system and sentence structure. These first five parts together represent a valuable overview of the fundamentals of Turkish grammar. Part VI provides an account of the ways in which new words are constructed on the basis of existing material, and constitutes a bridge to the more advanced matter treated in parts VII and VIII, including relative clauses, subordination, embedded clauses, clausal complements and the finer points of the verbal system. The work will be accompanied by a companion website that will provide exercises to accompany each part.
