Tom Clancy,John Gresham

Turtle Roy R. Manstan, Frederic J. Frese, 2016 David Bushnell built a submarine in 1776 and attempted to use it to sink the British flagship HMS Eagle. More than two centuries later students at Old Saybrook High School created a working replica of Bushnell's submarine. The knowledge gained from testing the Turtle replica enabled the authors to speculate as to what America's first submariner Ezra Lee experienced during the attack and what may have caused the attack to fail.

Now, every civilian can enter this top secret world...the weapons, the procedures, the people themselves...the startling facts behind the fiction that made Tom Clancy a #1 bestselling author.

American Turtle Submarine, The Arthur Lefkowitz, 2011-02-16 An effort of genius. -George Washington to Thomas Jefferson, 1785 The world's first submarine was used during the American Revolution. While other men his age supported the country with muskets, Yale graduate David Bushnell sought the answer to one important question: how to defend America against the British Royal Navy. His answer was the American Turtle. Focusing on the vessel's most important mission, sinking Britain's flagship in New York harbor, this concise history follows the development of the invention from drawing table to open water and onwards.

Technical Innovation in American History [3 volumes] Rosanne Welch, Peg A. Lamphier, 2019-02-22 From the invention of eyeglasses to the Internet, this three-volume set examines the pivotal effects of inventions on society, providing a fascinating history of technology and innovations in the United States from the earliest European colonization to the present. Technical Innovation in American History surveys the history of technology, documenting the chronological and thematic connections between specific inventions, technological systems, individuals, and events that have contributed to the history of science and technology in the United States. Covering eras from colonial times to the present day in three chronological volumes, the entries include innovations in fields such as architecture, civil engineering, transportation, energy, mining and oil industries, chemical industries, electronics, computer and information technology, communications (television, radio, and print), agriculture and food technology, and military technology. The A-Z entries address key individuals, events, organizations, and legislation related to themes such as industry, consumer and medical technology, military technology, computer technology, and space science, among others, enabling readers to understand how specific inventions, technological systems, individuals, and events influenced the history, cultural development, and even self-identity of the United States and its people. The information also spotlights how American culture, the U.S. government, and American society have specifically influenced technological development.

New Perspectives on the Pelagic Stage of Sea Turtle Development Archie Carr, 1986 Thirty years ago when interest in sea turtles was beginning to spread, the habitat of the post-hatchlings for all the species was unknown. After they left the nest and made their way through the surf, they simply disappeared. Very slowly, data to suggest a pelagic life in a sargassum weed habitat accumulated, and eventually I received support to investigate that idea intensively. By the end of that research period it was clear that when sargassum rafts are present in longshore arrays within the swimming range of the hatchlings, they do in fact enter them (Carr 1982). It followed that the early developmental stages are pelagic, with the corollary that, because sargassum accumulates along convergences, the adjacent currents may carry the rafts and their occupants on journeys of either local or oceanic extent or both--Introduction.

The Deep Nick Cutter, 2015-07-28 A strange plague called the 'Gets is decimating humanity on a global scale. It causes people to forget--small

things at first, like where they left their keys, then the not-so-small things like how to drive or the letters of the alphabet. Then their bodies forget how to function involuntarily. There is no cure. But far below the surface of the Pacific Ocean, a universal healer hailed as 'ambrosia' has been discovered. In order to study this phenomenon, a special research lab has been built eight miles under the sea's surface. When the station goes incommunicado, a brave few descend through the lightless fathoms in hopes of unraveling the mysteries lurking at those crushing depths...and perhaps to encounter an evil blacker than anything one could possibly imagine--Page [4] of cover.
