The Marshes of Mount Liang: Gathering company Nai'an Shi,Guanzhong Luo,John Dent-Young,Alex Dent-Young,1994 This is the third volume of a series of the new translation of the Chinese classical novel generally known as The Water Margin. In this volume, the company of outlaws on Mount Liang continues to grow: a butcher, a blacksmith, a public executioner, a petty thief... and the usual generals defecting from the government forces. Lu Zhishen, the Flowery Monk, and his companions from Twin Dragon Peak reappear and finally join the company, uniting two important strands of the story. Some episodes are relatively light: a tiger is stolen, an innkeeper's favorite rooster is illicitly eaten, Iron Ox is lowered to the bottom of a well and nearly gets forgotten. But in general the mood is darker. The naked bodies of a lecherous wife is carved up, an innocent child is mercilessly dispatched to gain a reluctant recruit. Chao Gai, the leader on Mount Liang, is killed in battle. Song Jiang replaces him, but for how long can he control his unruly forces? Despite the attraction of the life on the marshes, with its rootless freedom and rough code of honor, we are not to forget how the story was launched, when 108 Demon Princes were released in a black cloud. This series of new translation by John and Alex Dent-Young is also the first English translation of the 120-chapter version of The Water Margin.

The Aircraft Carrier Hiryu Stefan Draminski,2022-07-07 A uniquely detailed study of a Japanese aircraft carrier that took part in the attack on Pearl Harbor, before being sunk at Midway. Superbly illustrated with line drawings, full-colour artwork of the ship through its career, internal reconstructions of deck layouts, and 3D illustrations of every detail of the ship from its rigging to its aircraft to its anchors, this book reconstructs and dissects one of the most prominent carriers of the early Pacific War. Built in the late 1930s, Hiryu took part in the attack on Pearl Harbor and most of the operations of Japan's triumphant first months of the war, before being sunk at Midway. Drawing on Stefan Draminski's new research and making the best use yet of his acclaimed 3D illustration techniques, this is the most comprehensive examination of Hiryu ever published. It includes a complete set of detailed line drawings with fully descriptive keys and full-color 3D artwork, supported by technical details, photographs, and a concise history of the ship's construction and service.

Essex-Class Aircraft Carriers 1945–91 Mark Stille,2022-09-15 A history of the enduring Essex-class ships, the US Navy's finest and most numerous fleet carrier during World War II, which were modernized repeatedly and served with distinction. The Essex class was the USN's war-winning ship class of the Pacific War. Of the 24 ships completed, 14 saw action, making the Essex class the largest class of fleet aircraft carriers ever built. These ships had a fine balance of striking power, protection, and speed and were modernized during and after the war. There were five distinct programs carried out, adding not only angled flight decks for jet operations, but repeated upgrades to sensors, weapons, and equipment. Essex-class carriers were used in a number of roles and provided the vast majority of US Navy air power in the Korean War, and a sizeable proportion of air power in the Vietnam conflict. However, as the “super carriers” began to enter service in the early 1960s, the Essex class was relegated to secondary roles– a single Essex carrier served until 1991 as the US Navy's training carrier. Using detailed artwork and photos, this book provides an in-depth portrait of this important and enduring class of ship, and looks at its development and modifications while considering the many and varied actions it took part in.

Imperial Japanese Navy Light Cruisers 1941–45 Mark Stille,2012-02-20 The Imperial Japanese Navy went to war with 17 light cruisers and another three cruiser-sized training ships. Of these, most were 5,500-ton ships designed to act as destroyer squadron flagships. This made them much different in capabilities and mission from their American counterparts. During the war, the Japanese built another five light cruisers, all but one of which maintained the design premise of being able to serve as destroyer squadron flagships. During the war, Japanese light cruisers were active throughout the Pacific performing many missions in addition to their flagship duties. Mark Stille continues Osprey's coverage of the IJN of WWII with this concise and complete study of all 25 ships, from their design and development to their ultimate fates. Detailed Osprey artwork and rare period photographs from the Fukui collection held in Kure, Japan illustrate this discussion.

British Destroyers: J-C and Battle Classes Les Brown,2013-07-03 “A terrific author . . . invaluable to the modeler wishing to reproduce these classes of destroyers, and also to those interested in naval history.”—IPMS Magazine The ShipCraft series provides in-depth information about building and modifying model kits of famous warship types. Lavishly illustrated, each book takes the modeler through a brief history of the subject class, highlighting differences between sisterships and changes in their appearance over their careers. This includes paint schemes and camouflage, featuring color profiles and highly detailed line drawings and scale plans. The modeling section reviews the strengths and weaknesses of available kits, lists commercial accessory sets for super-detailing of the ships, and provides hints on modifying and improving the basic kit. This is followed by an extensive photographic survey of selected high-quality models in a variety of scales, and the book concludes with a section on research references—books, monographs, large-scale plans and relevant websites. A follow-up to ShipCraft 11 on inter-war destroyers, this new volume deals with the later classes which were the most modern British destroyers of the Second World War. Marked by a common single-funneled silhouette, they were actually very varied, ranging from the large and powerful J

to N flotillas, via the austere “War Emergency” classes that were built in large numbers, to the radically different “Battle” class, designed with a powerful AA armament for service in the Pacific. “This book will be of interest to those who want an easy reference book that covers the British and Australian destroyers of this period, especially with regard to camouflage and overall appearance in service.”—Australian Naval Institute

Torpedo Roger Branfill-Cook,2014-08-27 The torpedo was the greatest single game-changer in the history of naval warfare. For the first time it allowed any small, cheap torpedo-firing vessel to and by extension a small, minor navy to threaten the largest and most powerful warships afloat. The
