The AK-47 Gordon L. Rottman,2011-05-03 A detailed, fully illustrated study of the most recognizable assault rifle ever produced. The Kalashnikov AK-47 is the most ubiquitous assault rifle in the world, with more AK-47s and its variants in use than any other individual small arm. Created by Senior Sergeant Mikhail Kalashnikov, and first adopted by the USSR soon after World War II, its production continues to this day, with an estimated 75 million produced worldwide. Supported by photographs and original artwork, this book takes a look at the complete history of the weapon, discussing its design, development, and usage, taking its story from the great armies of the Soviet Union to the insurgents and criminal gangs that often employ the weapon today.

Kalashnikov AK47 Series Martin J Brayley,2013-04-22 Popularly known as the AK47 or just AK, the 7.62mm Avtomat Kalashnikov obrazets 1947g was accepted into service by the Soviet Army in 1947. Despite its widespread use by the Soviet armed forces, the AK only became known in the West during the Hungarian Revolution of 1956, when Soviet troops sent to quell the uprising carried the new weapon. Since then it has become probably

the most widely recognized firearm of all time, having seen action in most of the conflicts of the past six decades. The Kalashnikov has been produced in many variants and calibres, and this book concentrates on those in the original 7.62mm form. Illustrated with over 350 colour photographs of AK variants produced around the world, including close-ups of the many fascinating detail differences, this work will be an invaluable addition to the bookshelf of anyone with an interest in modern military firearms. The most widely used firearm of the post-war era - the Kalashnikov rifle has become an icon of revolutionary struggle. Covers the principal design features of the AK variants that used the original 7.62x39mm M1943 cartridge. Will be of great interest to militaria enthusiasts, collectors and military historians of modern military firearms. Superbly illustrated with 350 colour photographs showing the different versions produced around the world. Martin J Brayley has a keen interest in military history and is a professional photographer, author and dedicated militaria researcher and collector.

The Armed Forces: Instrument of Peace, Strength, Development and Prosperity Joseph Babatunde Fagoyinbo, 2013-05 Across the ages, technological developments have been accelerated by the military. This results from the fact that able-bodied vibrant youths are generally involved and are also exposed to high-tech training prevailing at their times for assignments (defence and security) that are essential but not desired. They form the Armed Forces for the nations. Such brilliant military officers like Caesar and Napoleon made their marks; and, in contemporary times, the Armed Forces of United States, France, Britain, Australia, etc are making remarkable contributions to technological developments. Such infrastructure as the Internet, the GPS and the cell phones are products that have significant military contributions. This book scans across the major regions of the world, highlights the efforts of representative countries in the regions and observes that nations that have harnessed the efforts of their Armed Forces have progressively

developed. It is also observed that developments in America and Europe, though not entirely dependent on their Armed Forces, have been greatly affected by their efforts. In Asia, such countries as the People's Republic of China, Brazil, India, Pakistan and Singapore utilise the human and material resources within the Armed Forces for national growth and cohesion. Development effort is least in the African Region, except South Africa and Egypt; notwithstanding the high potentials as exhibited by Nigeria's Armed Forces. Although attempts to industrialise through the Armed Forces may be able to create economic development for developing nations, such factors as historical background, economic resources, political climate, government policies and infrastructure are equally important. Economic development programme of an aspiring country should: i. promote education and access to knowledge ii. aspire to economic self-sufficiency in economic power iii. allow and promote private sector and foreign participation in defence production, research and development iv. commit itself to the establishment and support of defence industries v. indigenise defence programmes, establish a balance between military and economic development and vi. mobilise the nation's economy through technology partnership with the private sector and foreign investors.

Changing Identifications and Alliances in North-East Africa Günther Schlee,Elizabeth E.

Watson,2009 Forms of group identity play a prominent role in everyday lives and politics in northeast Africa. Case studies from Sudan, Ethiopia, Uganda, and Kenya illustrate the way that identities are formed and change over time, and how local, national, and international politics are interwoven. Specific attention is paid to the impact of modern weaponry, new technologies, religious conversion, food and land shortages, international borders, civil war, and displacement on group identities. Drawing on the expertise of anthropologists, historians and geographers, these volumes provide a significant account of a society profoundly shaped by identity politics and contribute to a better understanding of the nature of conflict and war, and forms of alliance and peacemaking, thus providing a comprehensive portrait of this troubled region.

A Compendium of Armaments and Military Hardware (Routledge Revivals) Christopher Chant,2014-06-03
First published in 1987, The Compendium of Armaments and Military Hardware provides, within a

single volume, the salient technical and operational details of the most important weapons. The complete range of hardware used in land, sea and air forces throughout the world at the time of publication is covered, from tanks to rocket systems, helicopters to cruise missiles, alongside full details of size, weight and operational range. The book's main strength lies in the detail it gives of armament and associated ammunition capabilities, and of the sensors and other electronics required for the weapons to be used effectively. A key title amongst Routledge reference reissues, Christopher Chant's important work will be of great value to students and professionals requiring a comprehensive and accessible reference guide, as well as to weapons 'buffs'.

From Muskets To Missiles Harlan W.

Jencks, 2019-03-01 This book examines the extent, nature, and political implications of professionalization in the Chinese People's Liberation Army (PLA). It provides a description and evaluation of the military, political, economic, and social context within which PLA officers have functioned since the civil war.

Thermoelectrics Handbook D.M. Rowe, 2018-10-03

Ten years ago, D.M. Rowe introduced the bestselling CRC Handbook of Thermoelectrics to wide acclaim. Since then, increasing environmental concerns, desire for long-life electrical power sources, and continued progress in miniaturization of electronics has led to a substantial increase

in research activity involving thermoelectrics. Reflecting the latest trends and developments, the Thermoelectrics Handbook: Macro to Nano is an extension of the earlier work and covers the entire range of thermoelectrics disciplines. Serving as a convenient reference as well as a thorough introduction to thermoelectrics, this book includes contributions from 99 leading authorities from around the world. Its coverage spans from general principles and theoretical concepts to material preparation and measurements; thermoelectric materials; thermoelements, modules, and devices; and thermoelectric systems and applications. Reflecting the enormous impact of nanotechnology on the field-as the thermoelectric properties of nanostructured materials far surpass the performance of conventional materials-each section progresses systematically from macro-scale to micro/nano-scale topics. In addition, the book contains an appendix listing major manufacturers and suppliers of thermoelectric modules. There is no longer any need to spend hours plodding through the journal literature for information. The Thermoelectrics Handbook: Macro to Nano offers a timely, comprehensive treatment of all areas of thermoelectrics in a single, unified reference.

Social Networks and Regional Identity in Bronze Age Italy Emma Blake, 2014-08-11 This book takes an innovative approach to detecting regional groupings in peninsular Italy during the Late Bronze Age, a notoriously murky period of Italian prehistory. Applying social network analysis to the distributions of imports and other distinctive objects, Emma Blake reveals previously

unrecognized exchange networks that are in some cases the precursors of the named peoples of the first millennium BC: the Etruscans, the Veneti, and others. In a series of regional case studies, she uses quantitative methods to both reconstruct and analyze the character of these early networks and posits that, through path dependence, the initial structure of the networks played a role in the success or failure of the groups occupying those same regions in later times. This book thus bridges the divide between Italian prehistory and the Classical period, and demonstrates that Italy's regionalism began far earlier than previously thought.
