Chinese Power (English) , Do you think Chinese tanks and models are not interesting? Wait to see this book … Until now is the most complete, detailed and exhaustive study about PLA for modelers ever done. This book is not only having historians in mind but also for modelers and readers that can be interested to know something more about the Chinese army power. After reading this book many modelers will have much more interest in building a Chinese vehicle as next model. Through its pages we will discover not only the power and main weapons of the Chinese PLA since its origins, but also the way to paint them, showing different techniques and camouflages for the Chinese vehicles. The kits which appear in this book, belong to the main Chinese brands, and makes this book the perfect guide not only for modelers and enthusiasts of Chinese tanks and its strange and exotic camouflages but also for any modelers that want to have a reference book. Modelers and historians like Adam Wilder, Kristof Pulinks, Lukasz Orczyyc-Musialek, Lester Plaskitt, Sven Frich, Zach Sex, Gordon Arthur, Lei Xu, Verlag Jochen,Chris Jerret, Oscar Ebrí, Brian Murdoch or David Bocquelet give us an idea of the quality of this publication that until now is the most complete, detailed and exhaustive study about PLA for modelers ever done.

The Chinese Army Today Dennis J. Blasko,2013-06-17 The Chinese Army Today is a comprehensive study of the Chinese military, examining its ground forces in a level of detail not found in any other contemporary works. This new, revised edition has been fully updated to take account of recent changes in the institution. In 1999, the military modernization program of the Chinese People's Liberation Army increased in intensity and achieved a focus not seen in the previous two decades. Based primarily on actual Chinese sources, this book details these changes and puts them in the context of the many traditions that still remain. Written by a retired professional military officer who has served in China, the text uses first-hand observation of the Chinese military and three decades of military experience to weave many disparate threads from official Chinese statements, documents, and media reports into an integrated whole. The author also conducts an in-depth exploration into the many forces that constitute the People's Liberation Army. This is an essential book for all students of Chinese military and security affairs, and highly recommended for students of Chinese Politics, Asian Security, and International Relations and Strategic Studies, in general.

The Chinese People's Liberation Army since 1949 Benjamin Lai,2012-11-20 The Chinese People's Liberation Army (PLA) is the largest army in the world. China is predicted to be on the brink of overtaking the USA as the world's largest economy, and China's military capabilities and global ambitions are the single greatest long-term pre-occupation of Western governments. The PLA has progressed steadily – if slowly – since its creation in 1949, from a mass army of unsophisticated infantry limited to 'human wave' tactics into a highly sophisticated force with wide capabilities. The most recent reforms (1989 to the present day) have been made possible by massive economic liberalization, and have seen not only the modernization of all the armed forces but the beginnings of global outreach, even including Chinese participation in UN peace-keeping missions to Africa, the Middle East, and Haiti. Featuring rare photographs and specially commissioned color artwork, this study explores the developing structure, organization, equipment, appearance, and character of the Chinese People's Liberation Army from its creation until today.

The Dragon's Teeth Benjamin Lai,2016-07-14 An in-depth look at the past, present, and future of China's military. When Mao Zedong proclaimed the People's Republic of China in 1949, China was a poor and wrecked society after years of continuous wars. For centuries, in fact, China had been seen as a sort of plunder-zone to be invaded, and then a backwater until the late 1980s—when domestic policy brought about monumental changes. The result is that China has grown to be the second largest economy in the world,

and its military has grown proportionately. Successive decades of economic growth have transformed China—in addition to the weapons revolution during the computer age—so that the People's Liberation Army (PLA) has become a modern fighting force. No longer having to rely on massed infantry attacks, it now features a formidable arsenal, including nuclear submarines, ICBMs, stealth fighters, and modern battle tanks. Perhaps ominously for other maritime powers, the Chinese have also focused on beyond-the-horizon missile technology, as well as antiaircraft systems, and have explored the possibilities of cyber-warfare. What is today's PLA really like? What are its traditions and histories, and how is it armed and equipped? How does it recruit and train? This book describes some of the lesser-known battles and wars the Chinese have undertaken and the development of their key weapons systems. The United States, having opened the door to drone warfare, has had an attentive audience for such technologies in Beijing. The last chapter provides thoughts on how the Chinese view matters of security. It is not yet known whether foreign powers can still enforce their territorial wills on China—but future attempts will meet an increased challenge.

India's National Security Satish Kumar,2012-02-27 Each year, this annual gives readers an in-depth and up-to-date account of India's external and internal threats in a deteriorating global security environment. It shows that while partnerships with some countries have strengthened, anxieties persist with others such as China and Pakistan. Similarly, India has not been able to cope with the challenges of internal security emerging from violence in Kashmir, insurgency in the northeast, to mention a few. A unique series with contributions from academics, political commentators and military personnel.

Chinese Lessons from Other Peoples' Wars Andrew Scobell,2011 The importance of China stems not only from its current international role and its influence on the Asia-Pacific region in particular, but also because China's impact on global developments will likely continue to grow. One of our enduring imperatives is to accurately survey China's experiences as a means to grasp its existing perceptions, motivations, and ambitions. More than ever, solid, evidence-based evaluation of what the PLA has learned from the use of force and conflict elsewhere in the world is needed to shed light on the prospects for its cooperation, or rivalry, with the international community. This volume provides unique, valuable insights on how the PLA has applied the lessons learned from others' military actions to its own strategic planning. Edited by Dr. Andrew Scobell, Dr. David Lai, Mr. Roy Kamphausen. China's Military Power: A Net Assessment ,2015-01-15 This book is a structured net assessment of China's military power by a reputed and well-known Indian military analyst. The growth of Chinese military power has been examined with emphasis on how it primarily affects India. The book analyses how India must respond. It has an exhaustively researched section on how the Chinese PLA has performed in actual combat since 1949, and a detailed analysis of the evolution of China's military doctrines and strategic Culture. The most dangerous for India is the exponential growth in the Chinese Airpower (PLAAF). China has already changed Asia's balance of power.

Pakistan's War Machine: An Encyclopedia of its Weapons, Strategy and Military Security Saghir Iqbal,2018-05-13 The global security challenges after the post-Cold war period has affected many countries. Pakistan's geography and location present its security planners with serious, almost irresolvable strategic and tactical problems. It borders the nuclear states of India and China, an ambitious Iran, and an unstable Afghanistan, which is perceived as a gateway to its commercial-strategic ambitions in Central Asia. Pakistan's key security

problems are a reflection of its history and domestic circumstances. The overriding concern of Pakistan is its internal and external security. Strategically, Pakistan lacks territorial depth. Its main cities and communication routes are relatively close to the border with India and are susceptible to attack. In addition, the headwaters of Pakistan's rivers and main irrigation systems originate from India. Pakistan's borders with India were also new and mainly unfortified and, in many places, were drawn in ways that made them indefensible. Because the borders were also un-demarcated, there was abundant chance for conflict. Pakistan has particularly been affected with a number of issues. It has been argued by many that a Fourth generation/Hybrid war has been imposed on Pakistan, in order to break the nation (Balkanization of Pakistan into different parts) with the aim of making it either extremely weak or total destruction as a nation state (so that it is not able to challenge the hegemonistic ambitions of its adversaries).The purpose of this book is to assess the military security problems that Pakistan faces, and focus on its external security matters (military threats from neighbouring countries such as India, balance of power in the region, nuclear and ballistic missile threats, relationship with external powers, the high risk of war and its role on the 'War on Terror'), and its internal security problems (sectarianism, proliferation of small arms, refugees, ethnic violence, drug problem, economic weaknesses), and also its ability to cope with these problems.
