**Chinese Power (English)** , Do you think Chinese tanks and models are not interesting? Wait to see this book ... Until now is the most complete, detailed and exhaustive study about PLA for modelers ever done. This book is not only having historians in mind but also for modelers and readers that can be interested to know something more about the Chinese army power. After reading this book many modelers will have much more interest in building a Chinese vehicle as next model. Through its pages we will discover not only the power and main weapons of the Chinese PLA since its origins, but also the way to paint them, showing different techniques and camouflages for the Chinese vehicles. The kits which appear in this book, belong to the main Chinese brands, and makes this book the perfect guide not only for modelers and enthusiasts of Chinese tanks and its strange and exotic camouflages but also for any modelers that want to have a reference book. Modelers and historians like Adam Wilder, Kristof Pulinks, Lukasz Orczyyc-Musialek, Lester Plaskitt, Sven Frich, Zach Sex, Gordon Arthur, Lei Xu, Verlag Jochen, Chris Jerret, Oscar Ebrí, Brian Murdoch or David Bocquelet give us an idea of the quality of this publication that until now is the most complete, detailed and exhaustive study about PLA for modelers ever done.

The Dragon's Teeth Benjamin Lai, 2016-07-14 An in-depth look at the past, present, and future of China's military. When Mao Zedong proclaimed the People's Republic of China in 1949, China was a poor and wrecked society after years of continuous wars. For centuries, in fact, China had been seen as a sort of plunder-zone to be invaded, and then a backwater until the late 1980s—when domestic policy brought about monumental

changes. The result is that China has grown to be the second largest economy in the world, and its military has grown proportionately. Successive decades of economic growth have transformed China—in addition to the weapons revolution during the computer age—so that the People’s Liberation Army (PLA) has become a modern fighting force. No longer having to rely on massed infantry attacks, it now features a formidable arsenal, including nuclear submarines, ICBMs, stealth fighters, and modern battle tanks. Perhaps ominously for other maritime powers, the Chinese have also focused on beyond-the-horizon missile technology, as well as antiaircraft systems, and have explored the possibilities of cyber-warfare. What is today’s PLA really like? What are its traditions and histories, and how is it armed and equipped? How does it recruit and train? This book describes some of the lesser-known battles and wars the Chinese have undertaken and the development of their key weapons systems. The United States, having opened the door to drone warfare, has had an attentive audience for such technologies in Beijing. The last chapter provides thoughts on how the Chinese view matters of security. It is not yet known whether foreign powers can still enforce their territorial wills on China—but future attempts will meet an increased challenge.

*Defenders of Japan* Garren Mulloy, 2021-12-01 Japan's post-war armed forces are a paradox, both embarrassing remnants of the past and valuable repositories of experience. This book charts the development of the Japan Self-Defense Forces (JSDF) from 1954 as both unorthodox military institutions and servants of a civil society that decries militarism. Investigating JSDF contributions to Japanese and global security, the evolution of such contributions during and after the Cold War, and their possible reconfiguration for Japan's security needs ahead, Garren Mulloy offers insight into the Forces' past, present and future. He explores the characteristics and contradictions of Japanese policy, including novel approaches in response to an increasingly assertive China, the latent threat of North Korea and contributory pressure from the US. Though the American alliance remains the

core of Japanese security, new partnerships and international overtures will also shape the Forces' place in Prime Minister Abe's new vision of 'proactive contributions to peace'. Defenders of Japan deconstructs how the JSDF have adapted and will continue to adapt within domestic norms, caught between unresolved legacies of Japan's imperial past and a dynamically shifting balance of future global power.

**Japanese Tanks 1939-45** Steven J. Zaloga, 2011-12-20 The Japanese Army used tanks to great effect in the build-up to World War II. Inspired by European designs, in the 1920s and 1930s an innovative Japanese tank program facilitated their campaigns in China prior to the Pacific War. During the ensuing war against the Allies tanks were deployed imaginatively in jungle terrain previously thought impassable by such vehicles, being integral in Malaya and the capture of Singapore. Steven J Zaloga uses detailed and colorful artwork and photographs to explore these designs, explaining their neglect in favor of the naval priorities that left Japanese tanks outmoded by Western designs.

**ARMAGEDDON's SONG 'CROSSING THE RUBICON'** ANDY FARMAN, 2015-02-10 The European war is a long way from the fighting that is consuming the Pacific. The ANZACs and the US 5TH Mechanised Division are too few in number to defend Australia's coastline. Fear of China's nuclear arsenal has left the allies with limited friends, and there is trouble at home, in the West. Now that war in Europe has reached its bloody end and the men came home to less than gratitude from the politicians. In the Pacific all eyes are on the Spratly Islands as the Allies combat the Chinese 3rd and 6th Armies. The aftermath in Europe may have left the US and the ANZACs standing alone, or has it? Soldiers have more honour than politicians at the end of the day. A reckoning is coming.

**ARMAGEDDON's SONG 4 'THE LONGEST NIGHT' & 'CROSSING THE RUBICON'** Andy Farman, 2015-02-09 Volume 4: Two distinct parts of the story. Book 1 - 'The Longest Night' is

set between 8pm and 8am, the critical night battle in Germany between NATO and the New Red Army. The war in Europe has reached critical mass and it is a race between the Red Army and the newly arrived US and Canadian 4 Corps. The winner owns Europe. Just one last push by the New Warsaw Pact will clear away SACEUR's gambit and the last division standing between the Red Army and the Channel Ports. It is the Longest Night for everyone, and the last night for many. Book 2 - 'Crossing the Rubicon' The war in Europe has reached its bloody end and the troops came home to less than gratitude from the politicians. In the Pacific all eyes are on the Spratly Islands as the Allies combat the Chinese 3rd and 6th Armies, but the aftermath in Europe may have left the US and the ANZACs standing alone, or has it? Soldiers have more honour than politicians at the end of the day.

**Autocannon** Anthony G Williams, 2022-08-02 Autocannon is a comprehensive history of the development of automatic cannon and their ammunition from the end of the nineteenth century up to the present day. A brief history of their development is followed by sections examining the basic principles of gun and ammunition design, including various unconventional systems. Next comes a survey of cartridges in calibre order, from 20mm to 57mm, including not only ammunition that has seen service, but also a wide range of experimental types. Finally there is a survey of the cannon, grouped by nationality, which again includes many experimental models. The book includes data on about 200 different cartridges and 400 cannon, and has nearly 500 illustrations. It is the culmination of decades of research, and is unmatched in its coverage of this subject.

**The Japanese Army Handbook 1939-1945** George Forty, 2002-12-16 This is an insight into the most feared army of World War II. The Japanese Imperial Army grew from 1.5 million men in 1939 to 5.5 million men by the end of the war. Their highly successful campaigns in the Far East and the Pacific at the beginning of World War II were every bit as spectacular as those

of the Germans in Europe, and they earned an enviable reputation as expert jungle fighters which it took some years for the Allies to match. Their code of honour also made them extremely cruel enemies to prisoners and civilians alike, while their Kamikaze suicidal tendencies meant they would automatically fight to the last without any thought of surrender. Fully illustrated with rare archive photographs, this is a comprehensive study of the army. The author describes how they mobilized and trained their soldiers, and looks at their organizational structures, from high command down to divisional level and below. Also included are uniforms, equipment, all kinds of weapons ranging from tanks and artillery, technical equipment, tactics, symbology and vehicle markings.

*Tanks* Spencer C. Tucker, 2004-10-25 This expert study discusses the development and evolution of the tank and the tactics behind its employment, covering both its capabilities as a weapons system and its strategic use on the battlefield. *Tanks: An Illustrated History of Their Impact* follows the development of tracked-and-armored fighting vehicles across the 20th century, from the world wars to the Cold War battlefields of Korea and Vietnam; and from Arab-Israeli conflicts to the Persian Gulf. The book describes the distinctive characteristics and capabilities of each new generation of tank, as well as the formulation of armored doctrines and deployment strategies in France, Britain, Germany, the Soviet Union, the United States, Japan, Israel, and the Arab nations. It is an expert introduction to how the role of the tank has changed over time, a story of technological innovation, strategic daring, desperate battles (Stalingrad, Kursk), and charismatic commanders like Erwin Rommel and George S. Patton (who defeated Rommel's division by following a plan from the Desert Fox's own book).

*Palaeoproterozoic Supercontinents and Global Evolution*  
Steven Michael Reddy,2009 The Palaeoproterozoic era (2500-1600 Ma) is a critical period of Earth history, with dynamic evolution from the deep planetary interior to its surface environment. Several lines of geological evidence suggest the existence of at least one pre-Rodinia supercontinent, named Nuna or Columbia, which formed near the end of Palaeoproterozoic time. Prior to this assembly, there may have been an older supercontinent (Kenorland) or perhaps only independently drifting supercratons. The tectonic records of amalgamation and dispersal of these ancient landmasses provide a framework that links processes of the deep Earth with those of its fluid envelope. The sixteen papers in this volume present reviews and new analytical data that span the geological record of Palaeoproterozoic Earth. The volume is useful as a reference book

for students and professional geoscientists interested in this important period of global evolution.

**Seek, Strike, and Destroy** Christopher Richard Gabel,1986 In the seventy years that have passed since the tank first appeared, antitank combat has presented one of the greatest challenges in land warfare. Dramatic improvements in tank technology and doctrine over the years have precipitated equally innovative developments in the antitank field. One cycle in this ongoing arms race occurred during the early years of World War II when the U.S. Army sought desperately to find an antidote to the vaunted German blitzkrieg. This Leavenworth Paper analyzes the origins of the tank destroyer concept, evaluates the doctrine and equipment with which tank destroyer units fought, and assesses the effectiveness of the tank destroyer in battle.

**Chinese Tanks & AFVs** Martin J. Dougherty,2019-08-14 China today has by far the largest number of armored fighting vehicles in the world, and this detailed reference explores the main battle tanks, AFVs, armored personnel carriers, self-propelled guns, and missile-launching platforms in service since 1945, with an emphasis on the latest technology. They're organized historically by type, and illustrated with expert profile artworks for each entry and complete with technical specifications.
