*Japanese Tanks 1939–45* Steven J. Zaloga, 2011-12-20 The Japanese Army used tanks to great effect in the build-up to World War II. Inspired by European designs, in the 1920s and 1930s an innovative Japanese tank program facilitated their campaigns in China prior to the Pacific War. During the ensuing war against the Allies tanks were deployed imaginatively in jungle terrain previously thought impassable by such vehicles, being integral in Malaya and the capture of Singapore. Steven J Zaloga uses detailed and colorful artwork and photographs to explore these designs, explaining their neglect in favor of the naval priorities that left Japanese tanks outmoded by Western designs.

*Japanese Tanks and Armoured Warfare 1932-1945* David McCormack , 2021-03-13 The popular image of the Japanese tanks which faced the markedly superior tanks fielded by the Allies during the Second World War is one of poorly armed and armoured Lilliputian tin cans which failed to make any impression upon the battlefield. In this absorbing new history, David McCormack looks beyond widely held and unchallenged misconceptions to create a new narrative in which Japan's rightful place as a leading innovator in tank design and doctrine is restored. Why did Japan produce tanks in such limited numbers? What contribution did Japanese tanks make to the war effort? Why did it take Japan so long to develop heavier tanks capable of meeting the Allies on more equal terms? Drawing from primary and secondary sources, the author's meticulous research provides the reader with an objective appraisal of both the successes and failures of the Empire of the Sun's tank forces.

*World War II Japanese Tank Tactics* Gordon L. Rottman, Akira Takizawa, 2011-10-20 ALSO AVAILABLE AS AN E-BOOK. In this book, expert author and tactician Gordon L Rottman provides the first English-language study of Japanese Army and Navy tank units, their tactics and how they were deployed in action. The Japanese army made extensive use of its tanks in the campaigns in China in the 1930s, and it was in these early successes that the Japanese began to develop their own unique style of tank tactics. From the steam-rolling success of the Japanese as they invaded Manchuria until the eventual Japanese defeat, Rottman provides a battle history of the Japanese tank units as they faced the Chinese, the Russians, the British and the Americans.

*Bolt Action: Armies of Imperial Japan* Warlord Games, Agis Neugebauer, 2013-07-20 Following the assault on Pearl Harbor, the Imperial Japanese military saw action across Asia, from the capture and defence of the islands of the Pacific to the occupation of territory in China and Burma. With this latest supplement for Bolt Action, players

have all the information they need to build a force of the Emperor's fanatically loyal troops and campaign through some of the most brutal battles of the war.

**American Armor in the Pacific** Mike Guardia,2019-12-27 An illustrated history of the American tanks deployed to the Pacific theater during World War II and the conflicts they faced there. This volume in the Casemate Illustrated series explores American armor during the Pacific Campaign of the Second World War, from 1942 to 1945. In this period, there were over twenty major tank battles and operations in which tanks provided heavy support to infantry units. These operations included the Battle of Tarawa and the Bougainville Campaign. American Armor in the Pacific also features the strategies and tactics of the opposing forces, relying heavily on first-person accounts. This book examines the Pacific theater and how American armor was employed with great success in that theater of war. It also offers detailed information on American and Japanese armored forces, including development, equipment, capabilities, organization, and order of battle. Praise for American Armor in the Pacific "Packed with over 100 images . . . exactly what a reader interested in the armored battles fought between the Imperial Japanese war machine and U.S. military would want to see." –Globe at War

**Axis Tanks of the Second World War** Michael Green,2017-07-30 This pictorial history presents an in-depth study of the various tanks built and deployed by the Axis Alliance during WWII. Though Nazi Panzer tanks have become a ubiquitous symbol of Axis Alliance combat, the Japanese Army had more tanks than Germany in 1938. These included the Type 95 light tank and the Type 89 and 97 medium tanks. Other Axis powers, including Italy, Romania and Hungary also built their own tanks. The latter was responsible for the Toldi and Turan light tank series. In this informative collection of wartime photographs, military expert Michael Green discusses how the Axis powers drew on British and French tank designs in the period leading up to the Second World War. The Carden-Loyd tankette suspension was used as a model for the Panzer I series as well as the light Italian and Japanese tanks. German engineering talent then produced the ingenious designs of the Panzer II, III and IV series and, later in the War, the Panther Medium and Tiger heavy tanks.

**Bolt Action: Ostfront** Warlord Games,2015-02-20 Take charge of Operation Barbarossa and drive towards Moscow or command the steadfast defenders of the Soviet Union. From the early battles for Leningrad and Sevastopol to the tank clash of Kursk and the bitter urban warfare of Stalingrad, this new Theatre Book for Bolt Action provides wargamers with new scenarios and special rules that give them everything they need to focus their gaming on the Eastern Front.

**Japońska broń pancerna** Andrzej M. Tomczyk,Jim Hensley,2002

**Nomonhan** Alvin D. Coox,1985 From May to September 1939 Japan and the Soviet Union fought a fierce, large-scale undeclared war on the Mongolian plains that ended with a decisive Soviet victory with two important results: Japan reoriented its strategic emphasis towards the south, leading to war with the United States, Britain, and the Netherlands; and Russia freed itself from the fear of fighting on two fronts, thus vitally affecting the course of

the war with Germany.

Pacific War Reversal: 7 December 1941-January 1943 Colonel Roy M. Stanley II, USAF (Ret.), 2019-10-12 Merriam Press World War 2 History Series. Well-known military historian Col. Roy M. Stanley II presents the second volume of his series on World War II in the Pacific. Like the first volume, it is essentially a photo book with accompanying text, drawing heavily from DOD Intelligence and Army files, National Archives and numerous other sources. What is offered, to both the casual reader and the military history buff, is his 27 years of military experience and skill as a photo interpreter to draw information from the imagery. Stanley considers photos, particularly aerial photos, an original source equal to first-hand testimony. Many photos were found at random during reviews of DOD imagery holdings he was responsible for, but actively searched for pictures of Guadalcanal. There were no indexes for the boxes he was screening, but one of his goals was to assemble everything on The Canal. Coverage includes Coral Sea and Midway battles. Well illustrated with hundreds of photos, illustrations, and maps.

*Armored Champion* Steven Zaloga, 2015-05-15 Armor expert Zaloga enters the battle over the best tanks of World War II with this heavy-caliber blast of a book armed with more than forty years of research. • Provocative but fact-based rankings of the tanks that fought the Second World War • Breaks the war into eight periods and declares Tanker's Choice and Commander's Choice for each • Champions include the German Panzer IV and Tiger, Soviet T-34, American Pershing, and a few surprises • Compares tanks' firepower, armor protection, and mobility as well as dependability, affordability, tactics, training, and overall combat performance • Relies on extensive documentation from archives, government studies, and published sources—much of which has never been published in English before • Supported by dozens of charts and diagrams and hundreds of photos

**Forgotten Tanks and Guns of the 1920s, 1930s and 1940s** David Lister, Paul Charlton, 2018-10-30 History forgets. Files are lost and mislaid. But this book seeks to shine a light, offering a collection of cutting edge pieces of historical research detailing some of the most fascinating arms and armament projects from the 1920s to the end of the 1940s, nearly all of which had previously been lost to history. Included here are records from the UK's MI10 (the forerunner of GCHQ) which tell the story of the mighty Japanese heavy tanks and their service during the Second World War. Other chapters expand on the development of British armour, including the story of infantry tanks from the 1920s right through to the end of the Second World War and beyond. Other items placed beneath the microscope in this fascinating history include a wide variety of guns, rocket launchers, super heavy tanks and countless pieces of specialised armour. Previously overlooked, hidden under layers of dust in archives up and down the country, the histories of these objects has finally been uncovered.

Armoured Warfare in the Far East, 1937–1945 Anthony Tucker-Jones, 2015-11-30 Anthony Tucker-Jones's photographic history is a fascinating visual introduction to the armoured battles of the Second World War in the Far East and Asia-Pacific regions, from 1937 to 1945. In contrast to the experience of the armies that fought in Europe and North Africa, in the Far East tanks remained an infantry support weapon, and their role is often neglected in

histories of the conflict. Japanese armour confronted tanks deployed by the Chinese, Russians, British and Americans. Early in the war, against Chinese forces which lacked armour, the Japanese had some success, but their light and medium tanks were no match for their Allied counterparts. Later Japanese designs were better armed, but they were built in such small numbers that they could do little to stem the Allied advance. The role of armoured vehicles in each theatre of the war in the Far East is shown in a selection of over 150 rare wartime photographs that record armour in action in China, Manchuria, Mongolia, Malaya, Burma and during the battles fought for the Pacific islands.

**The Liberation of the Philippines** Jon Diamond,2021-08-04 General Douglas A MacArthur, Commander of the Southwest Pacific Area, saw the liberation of the Philippines Archipelago as the launching board for the invasion of the Japanese Home Islands. By late 1944, with the capture of New Guinea and surrounding islands, the US Sixth and Eighth Armies were poised for the challenge. American forces landed on Leyte on 20 October 1944 with the Leyte Gulf naval battle quickly following. By 25 December the island was cleared opening the way for Lieutenant General Walter Krueger's Sixth Army to invade Luzon on 9 January 1945. Bitter Japanese resistance required Eichelberger's Eighth Army as reinforcements. Manila finally fell on 4 March. In the meantime Bataan was captured on 16 February and Corregidor on 2 March after a US airborne assault. Fighting continued and MacArthur finally declared the liberation of the Archipelago on 5 July, just a month before the Atom bombs fell on Hiroshima and Nagasaki. This superbly illustrated work in the Pacific War Images of War series leaves the reader in no doubt as to the intensity of the land, sea and air operations required by the Allies to defeat the Japanese.

Battle Of Iwo Jima, 1945 André Geraque Kiffer,2022-02-01 It was a major battle in which the US Marine Corps and Navy landed and finally captured the island of Iwo Jima from the Imperial Japanese Army (IJJ) during World War II. As there was the possibility of unfavorable tidal conditions along the eastern beaches, the V Corps issued an alternative plan that provided for a landing on the western beaches (Purple, Browns 1 and 2, Whites 1 and 2, Oranges 1 and 2). Trying to simulate the possibility of a Japanese victory would be unrealistic. So let s imagine another possibility for the inexorable American victory, trying to accelerate a secure conquest of the island and a reduction in the number of American casualties. Thus, we will try to take advantage of the relatively favorable factor of the number of access and carry out a simulation in which the maximum number of beaches would be used, with simultaneous landings in areas "A", "B" and "C".
