Written by both leading academics in the fields of sustainable energy and experts from the world of industry Part of a very comprehensive compendium which across four volumes looks at the entirety of the hydrogen energy economy Covers a wide array of hydrogen uses, and details safety tactics, hydrogen applications in transport, and the hydrogen economy as a whole

Technology and Science for the Ships of the Future E. Rizzuto,V. Ruggiero,2022-09-29 The oceans are a key resource for transportation, energy and material extraction, and food production, representing one of the most important environments on the planet. Technological developments enabling us to exploit marine resources in a sustainable way are therefore of the greatest importance. This book presents the proceedings of the NAV 2022 conference, held in Genoa and La Spezia, Italy, from 15 to 17 June 2022. The conference is held every 3 years, attracting specialists in marine technology from all over the world. NAV 2022 was the 20th edition of the conference, and covered a full spectrum of maritime technology themes, all related to the exploitation of sea resources. The book contains 87 scientific papers, covering subjects ranging from comfort on board; to conceptual and practical ship design; deep sea mining and marine robotics; protection of the environment; renewable marine energy; design and engineering of offshore vessels; digitalization and cyber security; unmanned vehicles; yacht and pleasure craft design, and inland-waterway vessels. Providing a comprehensive coverage of the latest scientific and technical maritime issues, the book will be of interest to all those involved in this vital global industry.

Effizienz und Effektivität durch Verteidigungskooperation Philipp Gallhöfer,2014-06-26 Verteidigungskooperation kann zu ökonomischen und militärischen Vorteilen führen. Philipp Gallhöfer stellt ein theoretischesModell auf, um die quantitativen Auswirkungen von Verteidigungskooperation zu berechnen. Das Modell wird in vier Fallstudien angewendet, unter anderem beim Europäischen Lufttransportkommando in Eindhoven und beim I. Deutsch-Niederländischen Korps in Münster. Die Fallstudien zeigen, dass neben Kosteneinsparungen (Effizienz) auch bessere militärische Fähigkeiten (Effektivität) durch internationale Kooperation entstehen können. Kooperation bietet den EU-Staaten daher eine Möglichkeit, auf das Verteidigungsökonomie-Problem aus sinkenden Verteidigungsbudgets und gleichzeitig steigenden Rüstungskosten zu reagieren.

These aspects are explained in more detail using numerous examples. The book is intended for ship's engineers at university, on board and in shipping companies as well as for design engineers in the shipyard. This book is a translation of the original German 1st edition Schiffsbetriebstechnik by Manfred Pfaff, published by Springer Fachmedien Wiesbaden GmbH, part of Springer Nature in 2018. The translation was done with the help of artificial intelligence (machine translation by the service DeepL.com). A subsequent human revision was done primarily in terms of content, so that the book will read stylistically differently from a conventional translation. Springer Nature works continuously to further the development of tools for the production of books and on the related technologies to support the authors.

Electrical Plants and Electric Propulsion on Ships - 2019 Marco Giuffrida,2018-11-16 Electrical plants on-board modern cruise ships, offshore rigs and other naval vessels have nowadays reached a size and complexity comparable or even superior to big industrial plants and power plants.The continuous increase of the size of ships and the widely accepted adoption of electrical propulsion has led to the installation of HV (MV) power generation and distribution plants of very high power, tens of MW.Everybody who plans, manages or services these complex on-board power plants nowadays must have knowledge as well of HV plants and electrical machines, power converters, protection relays, of control and automation systems.This book intends to be an overview of technical features and planning issues of these electrical plants. It is meant to bear general validity, even if it is focused on larger ships with HV plants and electrical propulsion.

Taiwan's Security Bernard Cole,2006-06-19 This is the first explanation and evaluation of Taiwan’s defence forces and infrastructure. It examines not only Taiwan’s armed forces, but also its Ministry of National Defence, personnel issues, and civil-military relations. This book provides crucial base-line data and evaluation of one of the major participants in an ongoing crisis across the Taiwan Strait that has the potential of involving China and the United States in armed conflict. It examines the danger of a possibly nuclear conflict between China and the United States which would seriously disrupt all of East Asia. It also shows how Taiwan’s defence policies and actions do not match the threat - Taipei needs to develop and pursue realistic policies. This is essential reading for all students of East Asian security and Sino-American relations and of international and security studies in general.
