Uaz-469b Ryszard T. Kominek,2010-01-05 - Includes free decals and masking foil - Packed with color photos The UAZ-469 is an all-terrain vehicle used by the Red Army and other Warsaw Pact forces, as well as paramilitary units in Eastern Bloc countries. In the Soviet Union, it also saw widespread service in all state organizations that needed a robust off-road vehicle. The UAZ-469 was introduced in 1973, replacing the earlier GAZ-69. Modifications include a basic UAZ-469B with ground clearance of 220 mm. This album of detailed photographs is invaluable for the modeler or enthusiast alike. About the Series This is a classic series of highly illustrated books on the best machines of war, with several hundred photographs of each aircraft or vehicle. Agent in Place Mark Greaney,2018-02-20 The Gray Man is back in another nonstop international thriller from the #1 New York Times bestselling coauthor of Tom Clancy's Jack Ryan novels. Fresh off his first mission back with the CIA, Court Gentry secures what seems like a cut-and-dried contract job: A group of expats in Paris hires him to kidnap the mistress of Syrian dictator Ahmed Azzam to get intel that could destabilize Azzam's regime. Court delivers Bianca Medina to the rebels, but his job doesn't end there. She soon reveals that she has given birth to a son, the only heir to Azzam's rule--and a potent threat to the Syrian president's powerful wife. Now, to get Bianca's cooperation, Court must bring her son out of Syria alive. With the clock ticking on Bianca's life, he goes off the grid in a free-fire zone in the Middle East--and winds up in the right place at the right time to take a shot at bringing one of the most brutal dictatorships on earth to a close...

Cars of the Soviet Union Andy Thompson,2008 The story of the Soviet Union's cars has to be seen in the context of a planned society in which everything was planned well in advance, and consumer items were not a priority until well after the Second World War. This extraordinarily detailed study charts the history of Soviet cars from the birth of the Soviet Union in 1917 until its demise in 1990, with a conclusion about the post-Soviet era. It is the story of an insular, state-run car industry in which the carefully thought-out ideas of ministerial planners, rather than fickle customers in a free market, determined what cars were made in a country where the open road was often a 300-mile track across a windswept steppe.

The Imposition of a Fake Political Settlement in the Northern Caucasus Tanya Lokshina,Ray Thomas,Mary Mayer,2005-12-19 This book explains why Russia's War on Terror shows little sign of success. It provides first-hand accounts of recent developments in Chechnya, and is supplemented with thematic summaries as well as numerous documents. In the manipulated election of October 2003, the favorite of the Kremlin, Akhmad Kadyrov, was made President of the Chechen Republic only to be killed seven months later in a terrorist attack. While a political settlement is urgently needed and Kadyrov's death is to be regretted, evidence shows that the 2003 presidential election bore no relation to a sincere political solution. The President was imposed on Chechnya and had little legitimacy among the Chechen people. The book describes how violence in the Northern Caucasus attributed to gangsters, war lords, Wahhabists, al Qaedaists, and to hatred of Russia has been reciprocated by law enforcement agencies with cleansing operations, disappearances, and targeted assassinations. The reciprocity of violence has maintained the scale of lawlessness, and further diminished the prospects of solution.The book is an invitation to the Russian public and the international community to launch a frank discussion on the situation in the Northern Caucasus in order to find a way out from a bloody crisis that has been lingering on for more than a decade now.

Vietnam's Strategic Thinking During the Third Indochina War Kosal Path,2020 Why did Vietnam invade and occupy Cambodia in 1978? And why did it eventually change its approach, shifting from military confrontation to economic reform and reconciliation with China in the late 1980s? Drawing on rarely accessed archival documents, Kosal Path explores this major change in Vietnamese leaders' objectives and strategies. Unlike most studies, which attribute the invasion to political elites' paranoia and imperial ambition over Indochina, Path argues that Hanoi's move was rational and strategic, intended to resolve its economic crisis and counter imminent threats posed by the Sino-Cambodian alliance by cementing its own alliance with the Soviet Union. As these costly efforts failed in the 1980s, Vietnamese thinking shifted from the doctrinal Marxist-Leninist ideology that had prevailed during the last decade of the Cold War to the approach that would come to characterize the post-Cold War era. Path traces the moving target of Vietnam's changing priorities: first from military victory to Socialist economic reconstruction in 1975-76; then to military confrontation in 1978-1984; and finally, in 1985-86, to the broad reforms dubbed Doi Moi (renovation), meant to create a peaceful regional environment for Vietnam's integration into the global economy. Path's sources include internally circulated reports from provincial authorities, ministries, and ad hoc Party committees--materials that have been largely masked by the Vietnamese nationalist history of Vietnam's selfless assistance to Cambodia's revolution and glossed over by the Cambodian nationalist narrative of Vietnam's longstanding imperial ambition in Cambodia--

Combat Vehicles of Russia's Special Forces Mark Galeotti,2020-05-28 An illustrated study of both the combat vehicles of Russia's legendary Spetsnaz special forces and the whole range of unique and modified vehicles that Russia's elite units use, from combat snowmobiles to the world's biggest water-cannon. Elite forces need elite vehicles. As Vladimir Putin has devoted effort and funds into modernising Russia's armed forces and turning them into an instrument geared not just for defending the Motherland but also projecting power beyond its borders, Russia has seen a growing emphasis on special and specialist forces. Traditionally, the elite Spetsnaz commandos had to make do with regular vehicles or civilian-based 'technicals', not least to conceal their presence (or, indeed, very existence). Now, increasingly at the forefront of Russian power projection, the Spetsnaz are acquiring more capable, versatile vehicles, such as the paratroopers' BTR-D personnel carrier, and also experimenting with exotic, specialist new acquisitions, such as the Chaborz M-3 buggy and Yamaha Grizzly all-terrain vehicle. The other elite branches of Russia's forces, such as the Arctic-warfare troops of the 200th Independent Motor Rifle Brigade, the paratroopers of the Air Assault Troops (VDV), the Naval Infantry, and the elite units of the security forces are also developing and fielding new vehicles for their specialist roles, from combat snowmobiles to urban-warfare vehicles. From highly-mobile LMVs able to operate in the deserts of Syria or the streets of Ukraine, through dedicated fire-support vehicles such as the air-droppable Sprut-SD or the massive BMPT 'Terminator', to amphibious tanks and drone-equipped security trucks, these are the workhorses of Russia's special forces. This study explores all these combat vehicles in detail, combining expert analysis from Russia expert Mark Galeotti with highly accurate full-colour illustrations and photographs.

Artillery of the Warsaw Pact Russell Phillips,2018-08-22 Considered to be "the god of modern war" by the Soviet army, artillery played a vital role in the Cold War period. The armies of the Warsaw Pact made artillery a cornerstone of their military strategies. And the importance they placed on this type of weaponry saw them use their technology and expertise to develop a wide range of munitions including mortars, rocket launchers, missiles and large-calibre guns. Artillery of the Warsaw Pact provides a compelling and detailed account of the artillery used by Warsaw Pact countries and the important role it played during this period of suspicion, tension and unease. The powerful weapons created at this time had the potential to destroy significant enemy resources, posing a very real threat to NATO forces. This book will allow you to gain an insight into the way in which artillery was

used by the Soviet Union and other Warsaw Pact nations. Read about mortars ranging from light 50mm weapons to enormous 240mm breech-loaded versions capable of destroying fortified buildings from a distance. Artillery of the Warsaw Pact also looks at the widespread use of towed guns as well as the growth in popularity of self-propelled guns. The book also details how Second World War weapons like multiple rocket launchers continued to play a key part in the Cold War hostilities, alongside newly-developed artillery, including tactical ballistic missiles which Khrushchev viewed as a critical part of his response to the threat posed by the United States.

Mission Thomas Wyckoff LTC, US Army (Ret.),2018-11-03 Mission A Cold War Remembrance By: Thomas Wyckoff LTC, US Army (Ret.) For fifty years following World War II, the US Military Liaison Mission (USMLM) to the Soviet Forces in East Germany was one of the premier intelligence collection organizations in the Cold War struggle between the United States and the Soviet Union. Operating “behind the lines” with excellent access to front line Soviet Forces in East Germany, the officers and non-commissioned officers of the allied Military Liaison Missions conducted continuous, close-up monitoring of the most powerful ground and air forces of the Soviet Union: those directly confronting NATO forces along the inter-German border. The author was a USMLM liaison officer for four years (1982-1986). He conducted 165 missions into East Germany, performing close surveillance of the nineteen Soviet divisions located there. Mission is a personal recollection of those surveillance activities. It is a close-up view of an organization that, for fifty years, stood on the cutting edge of the struggle between the United States and the Soviet Union

Wolf Bites Ron Gordon,2018-06-19 -IS support to detonate a nuclear device in a Russian-allied country-IS driven from Iraq to Afghanistan-IS to subversively involve NATO to retaliate/attack Russia-Russian Security race to stop IS on Barguzin Train.-Russia to install nukes at Kaliningrad and along the Russian border-American troops sent to reinforce NATO in Baltic region

The Kremlin Wolf Ron Gordon,2018-03-30 The Taliban and ISIS insurgencies in the Middle East conflict zones threaten to spread worldwide fear, enveloping Russia, America, and NATO forces. An unassuming antihero contractor is drawn into this conflagration of atrocities with a tough NATO soldier, Anje, mutilated by terrorists’ intent on spreading fear to the very nations combating the fanatical insurgents, destroying the ancient fabric of surrounding Middle East nations to subjugate and to impose a lifestyle of fanatical Islamic sharia laws.

The Gatekeeper Donald Peters,2019-11-15 The CIA has a problem. One of its senior members – an Assistant Deputy Director of Intelligence (ADDI) - is suspected of being involved in drug trafficking. The Assistant Inspector General of the CIA cannot use his own staff to investigate out of fear that the ADDI will be alerted. He also must keep the whole matter contained because he does not know how many other people are involved, or at what level in the intelligence and security services drug use has penetrated. So, he gets his son Mark Taylor, with the assistance of the DEA, to follow the ADDI on a trip to Afghanistan to find the truth. That mission proves to be deadly for some, and Mark himself becomes the target. The story involves the Russian Foreign Intelligence Service who are trying to protect a mole in the US, the British MI6 who will not commit to what they know, and the US FBI who have an agent on the case. In the complex world of the intelligence and security services the actions of a few has a major impact on the personal lives of the major players.
