Experiencing Geometry, Physics, and Biology Georg Glaeser, Franz Gruber, 2023-11-20 Geometrie, Physik und Biologie verstehen Das vorliegende Buch ist ein lehrreiches und reich bebildertes Sachbuch, das naturwissenschaftliche Inhalte auf anschauliche und verständliche Weise vermittelt. Anhand zahlreicher Beispiele erläutert es Themen aus Geometrie, Physik und Biologie und zeigt Gemeinsamkeiten zwischen den Disziplinen auf. Das Buch enthält rund 300 Links zu Videoanimationen; weiters steht eine frei zugängliche interaktive Software zur Verfügung, zur weiteren Vertiefung der Inhalte. Die Inhalte des Buches, die Videos und die Software wurden am Institut für Geometrie an der Universität für angewandte Kunst Wien entwickelt: Georg Glaeser forscht insbesondere zu interdisziplinären mathematischen und biologischen Fragestellungen und arbeitete viele Jahre gemeinsam mit Franz Gruber, einem Meister im Visualisieren komplexer Sachverhalte. Enthält Links zu rund 300 Videoanimationen, abrufbar über QR-Codes Kompakte, informative und leicht verständliche Erklärungen zu naturwissenschaftlichen Fragestellungen aus den Bereichen Geometrie, Physik und Biologie Mit zahlreichen Abbildungen und Illustrationen

Orthogonal Polarization in Lasers Shulian Zhang, Wolfgang Holzapfel, 2013-08-14 This practical book summarizes the latest research results of orthogonally polarized lasers, birefringence laser cavities, and their applications. Coverage ranges from basic principles and technologies to the characteristics of different cavities and lasers to various measurement techniques. A number of figures, experimental designs, and measurement curves are included, helping readers gain a thorough understanding of the many applications in modern engineering and start their own projects. Many types of relevant lasers (Helium/Neon lasers, Nd:YAG lasers, laser diodes, etc.) are also discussed.

Globalizing Japan Harumi Befu, Sylvie Guichard-Anguis, 2003-09-02 Globalizing Japan explores the social and cultural dimensions of Japan's global presence. Japan's expansion and presence as an economic giant is witnessed on an everyday basis. Both consciously and unconsciously, we regularly come into contact with Japan's industrial and cultural globalization, from cameras and automobiles to judo, cuisine or animation. Japan's presence in the popular imagination is heavily influenced both by the country's historical past and its global present. This book will appeal to students and scholars of Japanese Studies, Anthropology and Cultural Studies.

Hong Kong's New Indie Cinema Ruby Cheung, 2023-06-26 This book explores 2010s Hong Kong film industry, focusing on its (presumably) independent sector. Although frequently mentioned in global film industry studies, the term 'independent film' does not always carry a clear meaning. Starting with this point, this book studies closely Hong Kong's new indie cinema of the 2010s from political, economic, social, cultural, and film industrial perspectives, arguing that this indie cinema was vital to the long-term sustainability of the city's film industry.

Discoveries in the Judean Desert: Volume XII. Qumran Cave 4: VII Eugene Ulrich, Frank Moore Cross, James R. Davila, Emanuel Tov, 1994 This volume inaugurates the publication of the series of biblical Dead Sea Scrolls written in the Jewish (or 'square') script that were discovered in Cave 4 at Qumran. It contains twenty-six manuscripts of the books of Genesis, Exodus, Leviticus, and Numbers. These Hebrew texts antedate by a millenium what had previously been considered the earliest surviving biblical manuscripts in the original language. They document a pluriformity acceptable in the ancient biblical textual tradition that formed the basis for the Samaritan Pentateuch and helps to illumine the historical and theological relationship between the Jews and the Samaritans. Superior textual variants from these manuscripts have been adopted in recent revised translations of the Bible.

Images Building English Vocabulary with Etymology Introduction Peter Beaven, 2018-08-29 The Building English Vocabulary series guides a student through classical prefixes and roots that underlie challenging vocabulary. While Images Books I through III take the student through the Roman past, and Images Book IV the Greek, Images, the Introduction, starts the journey with etymology from the Latin, the origins of that half of the English language that appeals to the intellect and sets a foundation for understanding great literature. Throughout Images, a student avails himself of time proven exercises to connect the prefixes and roots with the meanings of words. A student will discover that from just one root spring a variety of new words that in time yield an exponential growth in his knowledge of English. From cumulative review tests throughout the book, a student can gauge his success in mastering challenging vocabulary.

The Out-of-Home Immersive Entertainment Frontier Kevin Williams, Michael Mascioni, 2017-03-02 Digital Out of Home Entertainment is rather an arcane description for one of the fastest growing technology-sectors. These forms of interactive technology, often established on a 'pay per use' basis are transforming the customer experience in shops, cinemas, museums; almost any environment where consumers are congregating. Kevin Williams and Michael Mascioni's The Out-of-Home Immersive Entertainment Frontier provides a 'state of play' exploration of the successes, the emerging new applications and the strategies that inform them. The authors interviewed nearly 70 leading executives from many familiar organisations in every facet of the digital out-of-home entertainments industry. The result is an essential guide for entertainment executives as well as those involved in retailing, the hotel industry, mobile communications, museums and heritage.

Cesare Pugni Robert Ignatius Letellier,2012-12-18 Cesare Pugni (1802–70) made his debut as a composer at La Scala in 1826 with the opera *Elerz e Zulmida*. In the 1840s he worked closely with the choreographer Jules Perrot (1810–92) in Paris and in London, creating some of the most renowned ballets of the 19th century, a number of which still find their place in some modern repertoires. Pugni later followed Perrot to St Petersburg, and became official composer of the Imperial Russian theatres. Some of his earlier ballets were transferred to St Petersburg, and he also composed many new works for that city. Along with Perrot, Pugni also worked with Arthur Saint-Léon (1821–70), Paolo Taglioni (1808–84), Marius Petipa (1818–1910), and some of the greatest dancers of the century. His most famous collaboration, with Marius Petipa, lasted until the composer’s death on 26 January 1870. Pugni was extremely prolific, composing more than 300 ballets, a dozen operas, over 40 masses, other polyphonic works and a few symphonies. He was very popular with the public, who were delighted by his direct uncomplicated style, with its attractive melodies and infectious rhythms. *Ondine*, choreographed and danced by Perrot and Fanny Cerrito, was premiered at Her Majesty’s Theatre in 1845. It is a variant on the famous water nymph story *Undine* by Friedrich de la Motte Fouqué. The ballet became famous for the conception of the generic scene type of the *Pas de l’Ombre*, where the nymph sees her own shadow in the moonlight for the first time and tries to catch it. The ballet was praised for its magnificent décor and for Pugni’s score: “. . . the musical accompaniment which describes the rise and fall of the waves is eminently characteristic and beautiful: the very ripple of the flow, and the rushing sound of the ebb over the pebbly strand, are heard and fully satisfy the ear”. *Esmeralda*, choreographed by Perrot and premiered with Perrot, Carlotta Grisi and Saint-Léon in the principal roles, was first performed at Her Majesty’s Theatre in London in 1844. The ballet is based on the story of Victor Hugo’s *Notre-Dame de Paris*. It was reasonably successful, and Grisi was pronounced the perfect personification of the gypsy girl *Esmeralda*. The ballet later became immensely popular in Russia; Fanny Elssler enjoyed one of her biggest triumphs in the title role. Pugni’s music successfully evokes an atmosphere of Medieval Paris, the changing moods of the story, and the delicate vulnerability of the heroine. For Petipa’s production of 1888, Riccardo Drigo was asked to compose several new numbers, including the *Esmeralda Pas de Deux* and the *Diana and Acteon Pas de Deux*, which became very popular in their own right. The *Pas de quatre* was a *divertissement* choreographed by Perrot for four of the leading ballerinas of the time, and premiered at Her Majesty’s Theatre in 1845. Created by Marie Taglioni, Carlotta Grisi, Fanny Cerrito and Lucile Grahm, this plotless ballet epitomizes the Romantic cult of the ballerina. Pugni’s variations were exquisitely tailored to the character and particular skills of each of the illustrious protagonists. There were four performances of the *Pas de quatre* with the original dancers, and there have been many revivals, starting in 1847 (when the part created by Grahm was given to Carolina Rosati), and continuing through to later reconstructions in the 20th century. *Catarina, ou La Fille du bandit* was choreographed by Perrot, with the principal roles created by Lucile Grahm, Perrot and Louis Gosselin. It was first performed at Her Majesty’s Theatre in 1846. The plot revolves around the love of the painter *Salvator Rosa* for *Catarina*, a bandit chief. The ballet grew in popularity due to the fascination and humanity of the unconventional characters from an original story based on the artist’s life, and the incomparable elegance of its mass movements. Founded on the contrast between feminine grace and military precision, this work was one of the greatest triumphs of both Lucile Grahm and Fanny Elssler. *Théolinda, ou Le Lutin de la vallée*, an opera-ballet in 2 acts and 3 scenes, with choreography by Arthur Saint-Léon, and music by Eugène Gautier, was first performed in Paris at the Théâtre Lyrique in 1853. Later Saint-Léon reworked the piece as *Théolinda l’Orpheline* for the Bolshoi Theatre of Moscow in 1862, with the score arranged by Pugni. Saint-Léon chose the new young star *Marfa Muravieva* to create the title role. The work was revived in 1865 with *Praskovia Lebedeva*, again with *Lebedeva* in 1866, and once more, in 1870, this time with *Ekaterina Vazem*. Pugni’s adaptation of the music became popular in Russia, and was published in Saint-Petersburg by Stellovsky.

Quantum Processes and Measurement Claude Fabre,2023-07-31 This accessible and self-contained text presents the essential theoretical techniques developed to describe quantum processes, alongside a detailed review of the devices and experimental methods required in quantum measurement. Ideal for advanced undergraduate and graduate students seeking to extend their knowledge of the physics underlying quantum technologies, the book develops a thorough understanding of quantum measurement theory, quantum processes and the evolution of quantum states. A wide range of basic quantum systems are discussed, including atoms, ions, photons, and more complex macroscopic quantum devices such as opto-mechanical systems and superconducting circuits. Quantum phenomena are also covered in detail, from entanglement and quantum jumps, to quantum fluctuations in optical systems. Numerous problems at the end of each chapter problems enable the reader to consolidate key theoretical concepts and to develop their understanding of the most widely-used experimental techniques.
