**Alien Vol. 3** Phillip Kennedy Johnson,2023-05-10 Man, machine and the most terrifying creature in the universe! It's an express elevator to hell, and you'll want to be on it! A small colony of synths has settled in secret on a backwater moon. When a company of United System soldiers comes to them for help retrieving biotechnology on a hostile planet that could be the key to saving humanity, the synths must decide whether the prospect of peace between man and machine is worth the risk of betrayal. Because Steel Team - the legendary, unkillable Synthetic Special Operations team - is the United Systems' only hope as they navigate the hellscape that the once-idyllic Tobler-9 has become. Since its mysterious downfall years earlier, Tobler-9 is considered one of the most hostile environments in the known universe - a place where nothing organic could possibly have survived...or could it? Collecting ALIEN (2022) #1-6.

Gamma rays and neutrino bursts erupt from dying stars to cook you alive, black holes tear you apart, and the void itself boils your blood and seizes your brain. Try to scream and no one can hear you - hold your breath and you rupture your lungs. Space isn't as empty as you'd think, either - its frontiers are ever expanding. Rival governments wage a cold war of aggression while greedy corporations vie for valuable resources. Colonists reach for the stars and gamble with their lives - each new world tamed is either feast or famine. And there are things lurking in the shadows of every asteroid - things strange and different and deadly. Things alien. This is the official ALIEN tabletop roleplaying game - a universe of body horror and corporate brinkmanship, where synthetic people play god while space truckers and marines serve host to newborn ghoulish creatures. It's a harsh and unforgiving universe and you are nothing if not expendable. Stay alive if you can--Back cover.

**Alien: Into Charybdis** Alex White,2021-02-23 The critically acclaimed author of Alien: The Cold Forge takes readers to a rogue colony where terror lurks in the tunnels of an abandoned Weyland-Yutani complex. "Shy" Hunt and the tech team from McAllen Integrations thought it was an easy job--set up environmental systems for the brand new Hasanova Data Solutions colony, built on the abandoned ruins of a complex known as "Charybdis." There are just two problems: the colony belongs to the Iranian state, so diplomacy is strained at best, and the complex is located above a series of hidden caves. Charybdis has a darker history than any could imagine, and its depths harbor deadly secrets. Until their ship can be refueled, the McAllen team is trapped there. The deeper they dig, the more Shy is convinced there's no one they can believe. When a bizarre ship lands on a nearby island, one of the workers is attacked by a taloned creature, and trust evaporates between the

Iranians and Americans. The McAllen integrations crew are imprisoned, accused as spies, but manage to send out a distress signal... to the Colonial Marines.
