Jean-Denis G.G. Lepage

Aircraft of the Luftwaffe, 1935-1945 Jean-Denis G.G. Lepage, 2009-01-29 One of the most significant innovations in modern warfare has been the appearance and development of air power, a technology which demanded technical and financial investment on a whole new scale and which ultimately changed the fundamental nature of war itself. This book covers the history and development of the German air force from 1935 to 1945, with descriptions and illustrations of almost all of the Luftwaffe's airplanes, including fighters, jet fighters, dive-bombers, ground attackers, medium and heavy bombers, jet bombers, seaplanes, flying boats and carrier planes, transport and gliders, reconnaissance and training aircrafts, helicopters, and many futuristic projects and other rarities.

Kites, Birds & Stuff - Aircraft of GERMANY - N to Z P. D. Stemp, 2014-12-20 The aviation history of German aircraft from the very early days to the present. Ace of the Black Cross Ernst Udet, 2020-05-30 Above the mud and misery of the trenches and the endless

slugging matches of the First World War another contest was played out with all the military glamor, chivalric values and deadly outcome of a medieval, knightly tournament. This was the battle in the air between the first primitive aircraft and the intrepid aviators who flew them. This image of air war is brought nobly to light in the memoirs of Ernst Udet, the German ace of aces, whose impressive wartime record was second only to the legendary Red Baron. Written in a jaunty, Boys Own style, Udet paints a romantic picture of his experiences and captures what perhaps many young pilots must have felt as they flew off each day to duel with the enemy, the elements and an unreliable technology. Ace of the Black Cross also illustrates the way in which war and defeat left this young generation of tough, spirited, individuals rootless and restless. After the war Udet used his flying skills to give displays to crowds of gawking onlookers, a circus act that left him frustrated and resentful. In 1941, disillusioned and depressed, he shot himself. On the wall before he died he scrawled a message for Goring: Iron man, you have betrayed me.

Day Fighter Aces of the Luftwaffe 1939-42 Neil Page,2020-07-30 A pictorial history of Hitler's fighter pilots that "will be of great interest to aircraft modelers and aviation historians alike" (AMPS Indianapolis). Military and aviation history enthusiasts have always been interested in the fighter pilots of Hitler's Luftwaffe. Around five hundred Luftwaffe fighter pilots were awarded the Knight's Cross, accumulating huge numbers of missions flown. A similar number achieved more than forty victories—more than the two leading USAF and RAF fighter pilots. Indeed, some of their stories are extraordinary. Fighting from the Arctic Circle to the North African deserts, from the Caucasus in the East to Normandy in the West, the German fighter pilot flew and fought until he was shot down, "flown out," wounded, or killed in action. A handful survived from "first to last." This first volume of Day Fighter Aces of the Luftwaffe traces the story of the Luftwaffe's day fighter arm (der Tagjagd) from its inception to 1942. Organized campaign by campaign, this chronological account interweaves brief biographical details, newly translated personal accounts, and key moments in the careers of a host of notable and lesser-known Luftwaffe aces.

Mechanical Similitude and Turbulence Theodore Von Kármán,1931 This report deals with the theory of the vortex street which enables the reproduction of the mechanism of the form resistance with suitable approximation under stated conditions, although such a resistance is precluded in a fluid which is perfectly inviscid. Disregarding for the present the origination of the vortex, the stream attitude in the wake of the body may be described approximately correct by the representation of individual vortices, without transgressing the law

governing the motion of such vortices in an ideal fluid. Another striking example is the theory of the induced drag of wings, which likewise shows the extent of applying the vortex equations without overstepping the bounds of the dynamics of ideal fluids.

The Messerschmitt 210/410 Story Jan

Forsgren,2019-09-17 In 1938, the Reichsluftfahrtsministerium (German Air Ministry, RLM), issued a requirement for a new twin-engine heavy fighter to replace the Me 110. This type of combat aeroplane was known as Zerstörer (Destroyer). The first prototype flew in September 1939. The Me 210 proved very difficult to fly, having numerous deficiencies. It was said to be deadlier to its crews than the enemy. Nevertheless, the Luftwaffe ordered the Me 210 into production. Operational trials began in late 1941, but it was eventually acknowledged that the aircraft had to be redesigned in order to be accepted into Luftwaffe service. The whole Me 210 debacle proved a huge scandal. A redesigned variant, the Me 410 began to reach Luftwaffe units in mid-1943. Even if the Me 210 and Me 410 were similar in appearance, the latter had to be redesigned to avoid the extremely poor reputation of the Me 210. The Me 410 proved a quite successful aeroplane, being used as a heavy fighter and for reconnaissance duties. Its closest Allied equivalent was the British DH 98 Mosquito. More than 1,500 Me 210/410s were built in Germany and Hungary, with only two Me 410s surviving today.

Turbulences Wolfgang S. Mittelbach,2021-09-24 In this compelling memoir, the author shares some of the extremely critical and decisive experiences that shaped his life. At the age of 27, Wolfgang S. Mittelbach, was diagnosed with incurable cancer. However, he never gave up, mastered life-threatening situations and went onto

become a successful commercial pilot in command.

Flight-test Data on the Static Fore-and-aft Stability of Various German Airplanes Walter Hübner, 1933 The static longitudinal stability of an airplane with locked elevator is usually determined by analysis and model tests. The present report proposes to supply the results of such measurements. The method consisted of recording the dynamic pressure versus elevator displacement at different center-of-gravity positions in unaccelerated flight.

Memoirs of a Stuka Pilot Helmut Mahlke, 2013-05-10
“Well-written and holds the reader’s attention . . . an engaging book and a rare personal view of flying one of the most iconic aircraft of WWII.” —Firetrench After recounting his early days as a naval cadet, including a voyage to the Far East aboard the cruiser Köln and as the navigator/observer of the floatplane carried by the pocket battleship Admiral Scheer during the Spanish Civil War, Helmut Mahlke describes his flying training as a Stuka pilot. The author’s naval dive-bomber Gruppe was incorporated into the Luftwaffe upon the outbreak of war. What follows is a fascinating Stuka pilot’s-eye view of some of the most famous and historic battles and campaigns of the early war years: the Blitzkrieg in France, Dunkirk, the Battle of Britain, the bombing of Malta, North Africa, Tobruk, and Crete, and, finally, the invasion of the Soviet Union. Mahlke also takes the reader behind the scenes into the day-to-day life of his unit and brings the members of his Gruppe to vivid life, describing their off-duty antics and mourning their losses in action. The story ends when he himself is shot down in flames by a Soviet fighter and is severely burned. He was to spend the remainder of the war

in various staff appointments. “An engaging, engrossing and exceptionally informative book. A worthy addition to any military enthusiast’s library and is unhesitatingly and heartily recommended.” —Aviation History
