Analysis of Command and Control Battlefield Functions as Performed in the Armored Brigade J. Patrick Ford,William J. Mullen,J. Ward Keesling,1997

The purpose of the research was to document the synchronization required by command and control tasks performed within the armored brigade, to include CS/CSS units. The immediate application of the documentation was to support developers of staff training in two related projects: Battle Staff Training System and Staff Group Trainer. The documentation was also intended to assist with the planning and execution of collective training. The documentation approach was to apply function analysis (FA) techniques for battlefield functions (BFs) in the Command and Control battlefield operating system. Thirteen FAs were developed for the Brigade headquarters and four supporting units: direct support field artillery battalion, engineer battalion, forward support battalion, and air defense artillery battery. The FAs were revised through a formative evaluation process that included internal review and successive external reviews by combat training centers, proponent agencies, and a review council representing potential users of the FAs. The final products include the FAs, a user's guide, and assessment packages for the BFs.--DTIC.

A Colonel in the Armored Divisions William S. Triplet,2001 In this fascinating memoir William S. Triplet continues the saga begun in his earlier book, *A Youth in the Meuse-Argonne: A Memoir, 1917-1918*. After serving in World War I, Triplet chose to become a career military man and entered West Point. Upon graduation in 1924, his assignments were routine--to regiments in the Southwest and in Panama or as an officer in charge of Reserve Officers' Training Corps units or of men sent to a tank school. All this changed, however, when a new war opened in Europe. From 1940 to 1942, Triplet was assigned to the Infantry Board at Fort Benning, Georgia, where he engaged in testing new weapons and machines for the expanding army. He became a full colonel in December 1942. After leaving Benning he received posts with four armored forces: the Thirteenth Armored Division forming in the United States, an amphibious tank and troop carrier group training at Fort Ord, California, and the Second and Seventh Armored Divisions in Europe. His extraordinary abilities as a tank commander became evident in the Seventh Armored, where he took over a four-thousand-man unit known as Combat Command A. He was soon moving from triumph to triumph as he led his unit into Germany. Here was much room for professional judgment and decision, and the colonel was in his element. In the war's last days Triplet and his men fought their way to the Baltic, preventing many German troops from joining in the defense of Berlin against the advancing Soviet army. Although Triplet was recommended for brigadier general, Dwight D. Eisenhower believed the U.S. Army had enough generals to finish the war; thus, the indomitable Triplet served out the few remaining years of his career as a colonel. After retiring in 1954, Triplet moved to Leesburg, Virginia, where he soon began to mull over his military experiences. Fascinated by the history he had witnessed, engaged by the attraction of writing about it, he recorded his memories with a combination of verve, thoughtfulness, and harsh judgments concerning ranking officers he considered incompetent-- generals not excluded. Through his annotations, Robert H. Ferrell provides the historical context for Triplet's experiences. Well written and completely absorbing, *A Colonel in the Armored Divisions* provides readers the rare opportunity to see firsthand what a real professional in the U.S. Army thought about America's preparation for and participation in the war against Germany and Japan.

Studies in the Methodology and Foundations of Science Patrick Suppes, 2013-03-09 The twenty-three papers collected in this volume represent an important part of my published work up to the date of this volume. I have not arranged the paper chronologically, but under four main headings. Part I contains five papers on methodology concerned with models and measurement in the sciences. This part also contains the first paper I published, 'A Set of Independent Axioms for Extensive Quantities', in *Portugaliae Mathematica* in 1951. Part II also is concerned with methodology and includes six papers on probability and utility. It is not always easy to separate papers on probability and utility from papers on measurement, because of the close connection between the two subjects, but Articles 6 and 8, even though they have close relations to measurement, seem more properly to belong in Part II, because they are concerned with substantive questions about probability and utility. The last two parts are concerned with the foundations of physics and the foundations of psychology. I have used the term foundations rather than philosophy, because the papers are mainly concerned with specific axiomatic formulations for particular parts of physics or of psychology, and it seems to me that the term foundations more appropriately describes such constructive axiomatic ventures. Part III contains four papers on the foundations of physics. The first paper deals with foundations of special relativity and the last three with the role of probability in quantum mechanics.

Star Trek: The Children of Kings David Stern, 2012-12-11 A distress call goes out from a Federation outpost near the Klingon border. The U.S.S. Enterprise, under the command of Captain Christopher Pike, responds. Starbase 18 lies in ruin. There are no survivors. And there is no clue as to who is responsible for the attack, until Captain Pike's brilliant science officer discovers a means of retrieving parts of the station's log. Lieutenant Spock has detected signs of a unique energy signature, one that he believes is Klingon. There are unsubstantiated reports that the Klingon Empire has made a technological leap forward and created a cloaking device—code-named Black Snow Seven—that can shield their ships from even the most advanced sensors. The destruction of the base and the unique energy signature that remains prove that the Empire has succeeded. For generations the Orions have been known as pirates, operating at the margins, outside of legal conventions. A proud and powerful race, the Orions were once a major force in the sector, and they have been using the tension between the Klingon Empire and the Federation to rebuild their power. Captain Pike is charged with trying to foster cooperation between the Orions and the Federation. A distress call from an Orion vessel offers him the perfect opportunity. But the Orion ship lies in disputed space long claimed by the Klingon Empire, and crossing it could be the spark that sets off an interstellar war.

World Breakers Tony Daniel, Christopher Ruocchio, 2021-08-03 Formed from cold steel and superpowered computing brains, these gigantic tanks with the firepower of an entire army have been the decisive factors in interplanetary battle. But are humans worthy of the extraordinary instruments of war that they have created? Are the Worldbreakers the greatest protector of human liberty, or its worst threat? For, while these Worldbreakers very definitely have minds of their own, the question remains: within their iron and superluminal quantum breasts, does there lie a faithful heart? Stories of world breakers and world makers in the great tradition of Keith Laumer's Bolos from David Weber, Larry Correia, Wen Spencer, and more! At the publisher's request, this title is sold without Digital Rights Management (DRM). About *Star Destroyers*, edited by Tony Daniel & Christopher Ruocchio: “. . . spectacular space battles and alien contacts . . . themes of military ethics, the uses of artificial intelligence, and the limits of the capacity of the human mind. . . . it is the human interactions and decisions that ultimately drive the stories. . . . will appeal to fans of military and hard science fiction and any readers fascinated by the possibilities of space travel.”—Booklist “. . . stories of giant spaceships at war, at peace, and in the often-gray areas between. . . . a worthy addition to a long tradition of ship-based fiction, and its authors portray captains, arcane astrogators, and civilian child passengers with equal depth. It's recommended for fans of military SF and space adventure.”—Publishers Weekly “. . . you'd probably expect some tight, action-filled space opera stories of giant space battles . . . and there's some of that. But there are also espionage stories, rescue missions, political conflicts,

alternate histories, even a few humorous tales. . . . each author took the premise in a different direction . . . if I had to identify one common feature to all the stories, it would be that they're all fun. . . . Like it says, big ships blowing things up. What's not to like?"—Analog

Exultant Stephen Baxter,2004-10-26 "Baxter has an uncanny gift for mixing a punchy, cyberpunk cynicism with his resolutely hard SF story base. . . . [Exultant] rivals Asimov in its boundless vision for the future evolution of humanity."—Kirkus Reviews (starred review) For more than twenty thousand years, humans have been at war with the alien race of Xeelee. Faced with certain death, a young pilot, Pirius, disobeys orders and travels into the future. Upon his return, Pirius is court-martialed and sentenced to penal servitude. But it is not only Pirius who pays the price. In flying into the future and back again, Pirius returned to a time before he'd left, a time inhabited by his younger self, who also receives punishment. Commissary Nilis believes that the elder Pirius, whom he dubs Pirius Blue, may know how to defeat the Xeelee. But Nilis can do nothing for Pirius Blue. Instead, he takes the younger Pirius—Pirius Red—back to Earth. There Pirius Red will discover truths that shatter his preconceived notions of all that he is fighting for, while Pirius Blue will learn even harsher truths. But the most shocking revelation of all is still to come. "Absurdly ambitious, technically brilliant, and downright exciting."—SFX Magazine "Striking . . . chilling . . . [with] a triumphant conclusion."—Starburst
