A Mathematical Force and Moment Model of a UH-1H Helicopter for Flight Dynamics Simulations Peter D. Talbot,1977

The Caribbean and Central America Jeromy S. Lane,2002 Over the course of its history, the United States has taken great interest in the affairs of its neighbours to the south. From the Monroe Doctrine to Grenada to illegal immigration, America has been and continues to be an active force in the lives of Caribbean and Central American nations. In recent years, the relationships have taken an economic turn as witnessed by several pacts like the Caribbean Basin Initiative and NAFTA, meant to balance the US-dominated relations with these closely-packed countries. In addition, the US has had an enigmatic history with Mexico, involving issues like immigration, drug smuggling, and human rights. The public friendship between Presidents George W Bush and Vicente Fox increased optimism for smooth resolutions of US-Mexican financial and political concerns. However, some friction has remained over American border and security worries, water-usage disputes, and the continual problem of narcotics trafficking. This book compiles a series of analyses of the varied initiatives and governmental actions linking the US to its nearest southern neighbours. present status, and evaluated for potential outcomes. Such comprehensive studies combined in one book make for a necessary resource in attempting to assess the future course

of relations among the Americas.

UH-1 Huey Gunship vs NVA/VC Forces Peter E. Davies, 2021-08-19 Often described as the US Army's aerial jeep the UH-1 Iroquois ('Huey') was the general-purpose vehicle that provided mobility in a hostile jungle environment which made rapid troop movement extremely challenging by any other means. Hueys airlifted troops, evacuated casualties, rescued downed pilots, transported cargo externally and enabled rapid transit of commanders in the field. Although 'vertical aviation' had only become a practical reality during the Korean War helicopters evolved rapidly in the decade before Vietnam and by 1965 the US Army and US Marines relied on them as primary combat tools. This was principally because North Vietnam's armed forces had long experience of jungle operations, camouflage and evasion. Generally avoiding set-piece pitched battles they relied on rapid, frequent strikes and withdrew using routes that were generally inaccessible to US vehicles. They commonly relied on darkness and bad weather to make their moves, often rendering them immune to conventional air attack. Gunship helicopters, sometimes equipped with Firefly searchlights and early night vision light intensifiers, were more able to track and attack the enemy. Innovative tactics were required for this unfamiliar combat scenario and for a US Army that was more prepared for conventional operations in a European-type setting. One of the most valuable new initiatives was the UH-1C 'Huey Hog' or 'Frog' gunship, conceived in 1960 and offering more power and agility than the UH-1B that pioneered gunship use in combat. Heavily armed with guns and rockets and easily transportable by air these helicopters became available in large numbers and they became a major problem for the insurgent forces throughout the war. Covering fascinating details of the innovations in tactics and combat introduced by gunship helicopters, this book offers an analysis of their adaptability and usefulness in a variety of operations, while exploring the insurgent forces' responses to the advent of 'vertical aviation'.
