**Certifying Software Component Performance Specifications** Groenda, Henning,2014-07-30 In component-based software engineering, performance prediction approaches support the design of business information systems on the architectural level. They are based on behavior specifications of components. This work presents a round-trip approach for using, assessing, and certifying the accuracy of parameterized, probabilistic, deterministic, and concurrent performance specifications. Its applicability and effectiveness are demonstrated using the CoCoME benchmark.

**Dictionary of Iconic Expressions in Japanese** Hisao Kakehi,Ikuhiro Tamori,Lawrence Schourup,2011-04-20 The lexicon of Japanese contains a large number of conventional mimetic words which vividly depict sounds, manners of action, states of mind etc. These words are notable for their distinctive syntactic properties, for the strikingly patterned way in which they exploit sound-symbolic correspondences, and for the copiousness of their use in conversation as well as in many written registers of Japanese. This dictionary is a comprehensive resource for linguists, language teachers, translators, and others who require detailed information about this important sector of the Japanese vocabulary. Examples created by the editors are accompanied by thousands of contextualized, referenced examples from published sources to illustrate the alternative meanings of each mimetic form. All examples appear in Japanese orthography, in romanization, and in English translation. Concise information is provided concerning the varieties of syntactic usage appropriate for each mimetic. An extensive English index facilitates comparison of English and Japanese vocabulary.

*Minimally Invasive Surgery in Orthopedics* Giles R. Scuderi,Alfred J. Tria,2009-10-30 Minimally invasive surgery has evolved as an alternative to the traditional approaches in orthopedic surgery and has gathered a great deal of attention. Many surgeons are now p- forming all types of procedures through smaller surgical fields. Along with changes in the surgical technique, there have been rapid advances in computer navigation and robotics as tools to enhance the surgeon’s vision in the limited operative fields. With these new techniques and technologies, we must ensure that these procedures are performed safely and effectively with predictable clinical outcomes. This book has been expanded from our previous publi- tions to include spine and foot and ankle surgery, along with updated sections on knee arth- plasty, hip arthroplasty, and upper extremity surgery. The clinical information and surgical techniques, along with tips and pearls, provided by experts in the field allows the reader to grasp a comprehensive understanding of the nuances of MIS. It is our intention that this text will be a valuable reference for all orthopedic surgeons. New York, NY Giles R. Scuderi, MD Piscataway, NJ Alfred J. **Introduction to Global Optimization** R. Horst,Panos M. Pardalos,Nguyen Van Thoai,2000-12-31 A textbook for an undergraduate course in mathematical programming for

students with a knowledge of elementary real analysis, linear algebra, and classical linear programming (simple techniques). Focuses on the computation and characterization of global optima of nonlinear functions, rather than the locally optimal solutions addressed by most books on optimization. Incorporates the theoretical, algorithmic, and computational advances of the past three decades that help solve globally multi-extreme problems in the mathematical modeling of real world systems. **Knee Arthroplasty** Thomas P. Sculco, Ermanno A. Martucci, 2002-02-08 The volume is divided into five parts, each including several chapters assigned to internationally renowned specialists who deal in an organic and modern manner with the most significant problems of knee replacement surgery. The authors have taken into consideration the biomechanical features, the indications, and the surgical methods used. Furthermore, particular attention is paid to the selection of prostheses and to the attempts to reduce polyethylene wear and stress at the prosthesis/bone or prosthesis/cement/bone interface.
