**Ultra-talk** David Kirby,2007 In Ultra-Talk, David Kirby poses a simple question: What makes a cultural phenomenon truly great? Exploring a wide variety of king-sized cultural monuments, Kirby argues that one qualification for greatness is that a phenomenon be embraced by both the elite and the general public. Further, he argues, it must be embraced repeatedly over time. Kirby turns his critical eye to subjects that have been studied and written about, sought after avidly, discussed passionately, and even resisted vigorously around the world. Auto racing, Dante, folk music, food, Leonardo da Vinci, films, poetry, religion, striptease, television, and the internet are just some of the topics he examines. In Rome, heads of state kneel before Bernini's statue of Saint Teresa in ecstasy, says Kirby, and so do people who can't read. And everyone watches TV. Ultra-Talk pays homage to the work of two towering writers and critics. Johann Wolfgang von Goethe and Giacomo Leopardi both stated that a book was valid only if it had been accepted by both an intellectual elite and a vast public. Kirby would have added a second requirement: that the book's--or cultural monument's--popularity must have traction over time. By standing on the shoulders of Goethe and Leopardi, Kirby offers a way to read, see, and savor a post-theoretical worldview that everybody can share.

*Value Based and Intelligent Asset Management* Adolfo Crespo Márquez,Marco Macchi,Ajith Kumar Parlikad,2019-06-29 The fundamental motivation of this book is to contribute to the future advancement of Asset Management in the context of industrial plants and infrastructures. The book aims to foster a future perspective that takes advantage of value-based and intelligent asset management in order to make a step forward with respect to the evolution observed nowadays. Indeed, the current understanding of asset management is primarily supported by well-known standards. Nonetheless, asset management is still a young discipline and the knowledge developed by industry and academia is not set in stone yet. Furthermore, current trends in new organizational concepts and technologies lead to an evolutionary path in the field. Therefore, this book aims to discuss this evolutionary path, starting first of all from the consolidated theory, then moving forward to discuss: • The strategic understanding of value-based asset management in a company; • An operational definition of value, as a concept on the background of value-based asset management; • The identification of intelligent asset management, with the aim to frame a set of "tools" recommended to support the asset-related decision-making process over the asset lifecycle; • The emergence of new technologies such as cyber physical systems and digital twins, and the implications of this on asset management.

<u>Think in 3D</u> Clyde Dsouza,2012 Think in 3DStereoscopic 3D is crossing over from Hollywood into mainstream Television, Advertising, and even Education. This book is designed to inspire a new kind of 3D thinking in Directors, Cinematographers and Film School Graduates, to encourage further exploration and integration of Stereoscopic 3D into the process of visual storytelling.Stereoscopic 3D should not only be about rigs and parallax any more than traditional filmmaking is about focal lengths and aspect ratios. Certainly there are techniques and considerations that have to be taken into account when making good Stereo 3D, but ultimately it is only how Stereoscopic 3D influences the audience's experience of a film that is important.This book is not a nuts and bolts, mirror rigs and depth budget handbook; instead it is a dialogue, a story and conversation designed to provoke new kinds of Stereo 3D thinking, as we delve into this fascinating new medium of visual communication.The book will lead you through an exploration of the most important questions about S3D's present, then inspire you to venture into the Why and What If? Hopefully that will lead to insights and inspire Directors, DPs and upcoming Stereographers, to unleash the true potential that S3D has as an integral, enriching part of the filmmaking process.

**The Peasant of the Garonne** Jacques Maritain,2013-01-25 At eighty-five, Jacques Maritain, the most distinguished Catholic philosopher of the twentieth century, has written what he offers as his last book, and it turns out to be a shocker. The peasant, as Maritain calls himself in the title, is a man who calls a spade a spade; and a storm of

controversy descended immediately on the book's publication in France, as both Right and Left reeled from the force of Maritain's criticism. The Peasant of the Garonne is a sharp attack on the new philosophy, hoping to cool off the fever for change that Maritain believes is imperiling the church's traditional spirituality and even the substance of doctrine. There is sardonic humor in his treatment of Teilhardians, phenomenologists, existentialists, new-style biblical critics, and clerical Freudians, but Maritain is deeply serious in warning that their capitulation to fashioniable trends represents a kind of kneeling before the world.

**The Plays of Ernst Toller** Cecil Davies,2013-09-13 This book is the fullest and most detailed study yet published in English of Ernst Toller's plays and their most significant productions. In particular the productions directed by Karl-Heinz Martin, Jurgen Fehling and Erwin Piscator are closely analyzed and the author demonstrates how, brilliant though they were, they obscured or even distorted Toller's intentions. The plays are seen as eminently stage-worthy while worth lies in Toller's use of language, both in prose and inverse. The neglected puppet-play The Scorned Lovers' Revenge is analyzed from a new perspective in the light, both of its language and its sexual theme, so important in Toller's writings as a whole. The reader is led to appreciate why Toller was regarded as the most outstanding German dramatist of his generation until, after his death in 1939 his reputation was overlaid by that of Brecht. This book should do much to restore Toller to his proper place in theatre history.

Reality and the Mind Celestine M. Bittle,2023-04-26 It lies in the very nature of epistemology to question the capability of man's mind to contact reality and to know what things are in themselves, the validity of all knowledge, and consequently also of science, it at sake. The foundations of human knowledge are challenged, examined and frequently attacked. An acquaintance with this problem and its possible solution will be, therefore, a matter of prime importance for every seeker of the truth and for every student of philosophy.

**Legitimizing the Artist** Luca Somigli,2003-12-15 In the late nineteenth and early twentieth centuries, the production of literary and cultural manifestoes enjoyed a veritable boom and accompanied the rise of many avant-garde movements. Legitimizing the Artist considers this phenomenon as a response to a more general crisis of legitimation that artists had been struggling with for decades. The crucial question for artists, confronted by the conservative values of the dominant bourgeoisie and the economic logic of triumphant capitalism, was how to justify their work in terms that did not reduce art to a mere commodity. In this work Luca Somigli discusses several European artistic movements – decadentism, Italian futurism, vorticism, and imagism – and argues for the centrality of the works of F.T. Marinetti in the transition from a fin de siécle decadent poetics, exemplified by the manifestoes of Anatole Baju, to a properly avant-garde project aiming at a complete renewal of the process of literary communication and the abolition of the difference between producer and consumer. It is to this challenge that the English avant-garde artists, and Ezra Pound in particular, responded with their more polemical pieces. Somigli suggests that this debate allows us to rethink the relationship between modernism and post-modernism as complementary ways of engaging the loss of an organic relationship between the artist and his social environment.
