Indian Army List January 1919 — Volume 1 Army

Headquarters, India, 2012-02-03 Volume 1 of 4. The January and July issues of the Indian Army List contain not only the distribution of officers on the active list of the Army in India, including officers of British army regiments, battalions etc stationed in India, but are supplemented by the addition of Orders of Knighthood, Honours and Awards, including Foreign Orders, by the non-effective officer list and the War Services of officers of the Indian Army. Details of each officer include dates of birth (except for wartime commissioned officers), date of first commission, of appointment to the Indian Army and dates of promotion. Officers are grouped according to their rank and by seniority within that rank, and are again shown under their regiments/battalions. In the case of British units, their date of arrival in India is shown, and with Indian units their date of formation and changes in title since, plus details of the backgrounds of men recruited, e.g. Sikhs, Punjabis, Dogras, Rajputs, etc. This army list also includes all native Viceroy Commissioned Officers - Subadar Majors, Subadars and Jemadars - and their war services, Major HQs and their staffs, divisional and brigade commanders and their staffs, schools, colleges, Administrative Departments of the Army are all shown. Non-regular Indian Defence Force units such as 22nd Bengal and North-Western railway Battalion, and the Indian Army Reserve of Officers are all there, along with British Warrant Officers serving in departments of the Indian Army. In 1914 there were 116 Indian and 10 Gurkha Regiments, all with one battalion apart from the cavalry, 32 Indian and one Gurkha regiment had been formed and the majority of the original regiments had raised second and sometimes third battalions. This splendid four-volume work reflects the tremendous contribution made by the Indian Army to the Empire's war effort. A full index is included.

Do More with Less Uly Ma, 2017-11-02 In current, uncertain

times, it is important for businesses, whether private, public or third sector, to prepare for unexpected impacts. This book offers a way forward that brings the individuals and their employers together to deliver a future that is ready to take advantage of opportunities, be ready for threats, do sustainability and save money at the same time. Do More with Less takes conventional improvement techniques and suggests new ways to deploy them to improve both Efficiency and Effectiveness of organisations. The proposed programme is cost-neutral since it can be paid out of the reduction of inefficiency and ineffectiveness: wasted time, effort, materials and budget. At a strategic level, this book introduces a key performance indicator linking resource use to corporate effectiveness, thereby bringing together sustainability, business success and waste reduction. The contents then cover the entire improvement process from initial audit through to implementing the improvements together with useful suggestions on ways to maintain the success and to control the gains. Techniques such as problem spotting and developing real-world solutions are presented as well as the necessary communications and marketing tools to support the improvement process. This book is aimed at individuals who wants to make a difference at work personally and at organisations that want to be successful in difficult and uncertain times. It presents ideas and techniques that are easy to learn, simple to carry out and practical to everyone.

No Waste Uly Ma,2017-03-02 Sustainability is a critical issue for the construction industry. In the short term, sustainability is often seen as a 'must do' item. In the longer term, all contractors will be seeing it as a source of competitive advantage. Public sector construction, infrastructure and other large projects such as the Thames Gateway and the Olympics in 2012 are all being

driven down this route by pressure from Government. Uly Ma's No Waste is an extremely practical guide to managing sustainability in construction that draws on input from all the related stakeholders: the construction industry itself, the clients, designers and architects and the trades. The book explores how the industry can transform itself from business as before to business as it should be, from the micro level of good site practices to setting the right policies that drives a company onwards. The text covers the management of sustainability and the accompanying CD ROM includes a wealth of material such as tool kits, templates and activities that can be shared throughout the organisation and used for team meetings, communication and training.
