Bilingual Education in South America Anne-Marie De Mejía,2005 This book presents a vision of bilingual education in six South American nations: three Andean countries, Peru, Ecuador, and Colombia, and three 'Southern Cone' countries, Brazil, Argentina and Paraguay. It provides an integrated perspective, including work carried out in majority as well as minority language contexts, referring to developments in the fields of indigeneous, Deaf, and international bilingual and multilingual provision.

The Poetics of Motoori Norinaga Michael F. Marra,2007-04-30 One of Japan's most renowned intellectuals, Motoori Norinaga (1730–1801) is perhaps best known for his notion of mono no aware, a detailed description of the workings of emotions as the precondition for the poetic act. As a poet and a theoretician of poetry, Norinaga had a keen eye for etymologies and other archaeological practices aimed at recovering the depth and richness of the Japanese language. This volume contains his major works on the Yamato region—the heartland of Japanese culture—including one of his most famous poetic diaries, The Sedge Hat Diary (Sugagasa no Nikki), translated into English here for the first time. Written in 1772 while Norinaga journeyed through Yamato and the Yoshino area, The Sedge Hat Diary was composed in the style of Heian prose and is interspersed with fifty-five poems. It offers important insights into Norinaga the poet, the scholar of ancient texts, the devout believer in Shinto deities, and the archaeologist searching for traces of ancient capitals, palaces, shrines, and imperial tombs of the pre-Nara period. In this piece Norinaga presents Yoshino as a common poetic space that readers must inhabit to develop the common sense that makes them live ethically in the poet's ideal society. Norinaga's ideal society is deeply imbued with the knowledge of poetry and the understanding of emotions as evidenced in the translation of Norinaga's twenty-six songs on aware (pathos) also included here. The rest of the volume offers translations of several essays by the poet that shed further light on the places he visited in Yoshino and on the main topic of his scholarly interests: the sound of the uta (songs) from his beloved Yamato. An introductory essay on Norinaga's poetics serves as a guide through the dense arguments he developed both practically in his poems and theoretically in his essays.

Historical and Geographical Dictionary of Japan Edmond Papinot,1909

A Waka Anthology Edwin A. Cranston,1998-03-01 The Gem-Glistening Cup is the second volume of Edwin Cranston's monumental Waka Anthology which carries the story of waka, the classical tradition of Japanese poetry, from its beginnings in ancient song to the sixteenth century. The present volume, which contains almost 1,600 songs and poems, covers the period from the earliest times to 784, and includes many of the finest works in the literatures as well as providing evocative glimpses of the spirit and folkways of early Japanese civilization. The texts drawn upon for the poems are the ancient chronicles Kojiki, Nihonshoki, and Shoku Nihongi; the fudoki, a set of eighth-century local gazetteers; Man'yoshu, the massive eighth-century compendium of early poetry (about one fourth of that work is included); and the Bussokuseki poems carved on a stone tablet at a temple in Nara. All poems are presented in facing romanization and translation.

The Japan Chronicle ,1915

Japanese Mythology and the Primeval World Peter Metevelis,2009-05 The Japanese have faithfully preserved their ancient myths as a connected and well ordered system. And as a system, Japanese myths say much about the human condition in the cosmos and about the human place in the cosmic order. Not until now has a book-length, English-language study been released on Japanese mythology. Drawing on his meticulous research, Asianist Peter Metevelis presents this selection of analytic essays that form a mosaic of themes on the primordial world of Japanese myth, adding a rewarding voice to cultural history and the history of ideas around the world. Metevelis shows that, contrary to popular belief, Japanese myths have much in common with other myths around the globe, and are mythically, logically, and symbolically equivalent. This suggests that Japanese culture has always resonated with the rest of the world and provides a valuable touchstone for comparative mythologists. The mythic themes Metevelis explores include: Linkage of birth with death Loss of immortality Containment of souls Effect of time on mortals Creation of the cosmos And many more This incomparable volume also includes detailed notes, bibliographies, and appendices to help further your knowledge of Japanese myth. Under Metevelis's expert guidance, you can expand your understanding of the Japanese myth system, its structure, and its principal actors, and immerse yourself in the ancient Japanese mysteries of the cosmos.

Rulers, Guns, and Money Jonathan A. Grant,2007-03-15 The explosion of the industrial revolution and the rise of imperialism in the second half of the nineteenth century served to dramatically increase the supply and demand for weapons on a global scale. No longer could arms manufacturers in industrialized nations subsist by supplying their own states' arsenals, causing them to seek markets beyond their own borders. Challenging the traditional view of arms dealers as agents of their own countries, Jonathan Grant asserts that these firms pursued their own economic interests while convincing their homeland governments that weapons sales delivered national prestige and could influence foreign countries. Industrial and banking interests often worked counter to diplomatic interests as arms sales could potentially provide nonindustrial states with the means to resist imperialism or pursue their own imperial ambitions. It was not mere coincidence that the only African country not conquered by Europeans, Ethiopia, purchased weapons from Italy prior to an attempted Italian invasion. From the rise of Remington and Winchester during the American Civil War, to the German firm Krupp's negotiations with the Russian government, to an intense military modernization contest between Chile and Argentina, Grant vividly chronicles how an arms trade led to an all-out arms race, and ultimately to war.

Identity and Development Paul van der Grijp,2021-11-22 Identity and Development presents a remarkable record of Tonga s increasing participation in the modern global economy, and provides anthropologists, economists, and historians with a detailed case study that bears heavily on major issues of the day, both practically and theoretically. The book focuses on issues of identity, entrepreneurship, and the intricacies of development and addresses the question: How (in the current state of the economy) can a Tongan become a successful grower? This question is set against the background of a boom in cash cropping, sparked by a burgeoning export trade with Japan.

A Reader in Edo Period Travel Herbert Plutschow,2022-03-07 Largely ignored hitherto by Western scholars, Plutschow’s Edo Period Travel provides the first in-depth study of the subject which is centred on fifteen of the period’s most notable travellers, some of whom are well known in other fields – as intellectuals, artists, poets, folklorists and natural scientists , for example – but rarely, if at all, as travellers. The first traveller put in the spotlight is the celebrated intellectual and botanist Kaibara Ekiken (1630-1714) and the last is the explorer of Ezo (now Hokkaido) and government official Matsuura Takeshiro (1818-88). Such was the thirst for knowledge in the Edo period that some travel accounts (estimated to number over 2000) became best-sellers in their day, not least for their voyeuristic appeal, including those of Kaibara Ekiken and Tachibana Nankei, which are included in this volume. This important research on how the Japanese discovered their own country and cultural identity has considerable interdisciplinary appeal. Of particular interest also is the author’s discussion on the nature of this new travel writing and the self-centred observation and ‘seeing’ that developed in the eighteenth and early nineteenth centuries, he calls the ‘Japanese Enlightenment’.
