**The Ural Mountains** Charles W. Maynard, 2003-12-15 The Ural Mountains form the 1,500-mile boundary between the continents of Europe and Asia. Most of these mountains pass through and divide the country of Russia. The Urals are what geologists call folded mountains, created when two of Earth's large continental plates bump into each other and wrinkle. Valleys carved from melting ice have created Russia's Kama and Belaya Rivers, which form the Volga River. Chapters discuss the mining and industrial history of the Urals, and the efforts by environmentalists to clean up one of the world's most polluted regions.

**Air Pollution in the Ural Mountains** Igor Linkov, R. Wilson, 2012-12-06 Mankind has created pollution, and has suffered its consequences since time immemorial. This has intensified greatly since the industrial revolution. One of the main problems in society, and a major function of government is how to cope with this pollution. 80 years ago the maxim used to be the solution to pollution is dilution; to dilute any polluted water supply in a large river, or to build a tall chimney stack to dilute air pollutants into the air so that concentrations of pollutants are always low. Since 1950 western countries have gone further and made major attempts to reduce the emissions of the most important pollutants. The discussion of what is an important pollutant has changed. To SO<sub>2</sub> and heavy metals such as cadmium or arsenic we now add fine particles and even (when we discuss global climate change) CO<sub>2</sub>. The experience and practice of the western countries was only partly followed in the USSR (although the switch from use of coal to natural gas in major cities around 1970 was very important). Since the collapse of the USSR it has become fashionable both in the west and inside Russia to blame all society's ills on pollution. The statistics do not bear out that conclusion, but pollution remains an important issue which can be reduced without significant detriment to other societal values.

**The Urals** Robin Johnson, 2011-08 The Ural Mountains form a natural boundary called the Stone Belt between Europe and Asia. This fascinating book describes the geological makeup and history of the Ural mountain range, as well as the cultures and ways of life of the people in Russia and Kazakhstan who live in its shadow.

**Behind the Urals** John Scott, Stephen Kotkin, 1989 John Scott's classic account of his five years as a worker in the new industrial city of Magnitogorsk in the 1930s, first published in 1942, is enhanced in this edition by Stephen Kotkin's introduction, which places the book in context for today's readers; by the texts of three debriefings of Scott conducted at the U.S. embassy in Moscow in 1938 and published here for the first time; and by a selection of photographs showing life in Magnitogorsk in the 1930s. No other book provides such a graphic description of the life of workers under the First Five-Year Plan.

**Forestry in the Mining Districts of the Ural Mountains in Eastern Russia (Classic Reprint)** John Croumbie Brown, 2015-06-28 Excerpt from Forestry in the Mining Districts of the Ural Mountains in Eastern Russia At a meeting held on the 28th of March last year (1883), presided over by the Marquis of Lothian, while the assemblage was representative of all interests - scientific, practical, and professional - it was resolved: - 'That it is expedient in the interests of forestry, and to promote a movement for the establishment of a National School of Forestry in Scotland, as well as with a view of furthering and stimulating a greater improvement in the scientific management of woods in Scotland and the sister countries which has manifested itself during recent years, that there should be held in Edinburgh, during 1884, and at such season of the year as may be arranged, an International Exhibition of forest products and other objects of interest connected with forestry.' In an Addendum to Reports made to the Executive Committee by the Jurors selected to award premiums on Forestal Literature, it is stated: 'The following works are exhibited by Dr J. C. **The Urals and Western Siberia in the Bronze and Iron Ages** Ludmila Koryakova, Andrej Vladimirovich Epimakhov, 2014-03-24 This book is the first synthesis of the archaeology of the Urals and Western Siberia. It presents a comprehensive overview of the late prehistoric cultures of these regions, which are of key importance for the understanding of long-term changes in Eurasia. At the crossroads of Europe and Asia, the Urals and Western Siberia are characterized by great environmental and cultural diversity which is reflected in the variety and richness of their archaeological sites. Based on the latest achievements of Russian archaeologists, this study demonstrates the temporal and geographical range of its subjects starting with a survey of the chronological sequence from the late fourth millennium BC to the early first millennium AD. Recent discoveries contribute to an understanding of issues such as the development of Eurasian metallurgy, technological and ritual innovations, pastoral nomadism and its role in Eurasian interactions, and major sociocultural fluctuations of the Bronze and Iron Ages.

**Rescue of Sturgeon Species in the Ural River Basin** Viktor Lagutov, 2008-10-22 While almost every aspect of society-nature interactions can be treated as an environmental security issue, the threats to human societies originating from inadequate freshwater management constitute one of the most widespread and pressing problems. For thousands of years rivers and river valleys have been the cradle of human civilizations. Rivers have provided not only food and freshwater, but also shelter and means of transportation, and they are still an essential component in every national and regional economy. In turn, growing needs of human societies, accompanied by growing abilities,

have caused significant river alterations and ecosystem changes that have resulted in river contamination, biodiversity loss and general riverine ecosystem degradation. The extinction of sturgeon species is one of the most eloquent examples of the negative and irreversible influence of human society on river e- systems. The sturgeon, sometimes called the “living fossil” or living “dinosaur” of the fish world, is known to have lived since the time of the dinosaurs, for at least 250 million years, and is currently on the verge of extinction solely due to anthropogenic impacts.

**A History of the Urals** Paul Dukes,2015-02-26 The Urals are best known as the boundary between Europe and Asia. A History of the Urals demonstrates the region's importance in its own right, as a crucible of Russia's defence industry in particular. In the first English-language book to explore the subject fully, Paul Dukes examines the region's contribution to the power of the state in tsarist, Soviet and post-Soviet times, offering a refreshing antidote to Moscow-centric interpretations of Russian history. The book contextualises more recent periods with chapters on the earlier years of the Urals and covers the key environmental as well as economic, political and cultural themes. The book contains illustrations and maps, plus lists of books and websites, as aids to further research and understanding of the subject. A History of the Urals is an important book that provides new and valuable insights for all students of Russian history.

**Is Meru the Ural Mountains?** Андрей Тихомиров,2023-07-07 The Meru in Vedism-Brahmanism-Hinduism is considered the sacred mountain in the center of the Earth, around which the planets revolve. Scientifically speaking, in the ancient myths in which Mount Meru is mentioned, real data related to the geography of the Earth could be reflected. Mount Meru may well be the Ural Mountains that separate Europe from Asia.

*The Great Urals* James R. Harris,2018-10-18 Political histories of the Soviet Union have portrayed a powerful Kremlin leadership whose will was passively implemented by regional Party officials and institutions. Drawing on his research in recently opened archives in Moscow and the Urals—a vast territory that is a vital center of the Russian mining and metallurgy industries—James R. Harris overturns this view. He argues here that the regions have for centuries had strong identities and interests and that they cumulatively exerted a significant influence on Soviet policy-making and on the evolution of the Soviet system. After tracing the development of local interests prior to the Revolution, Harris demonstrates that a desperate need for capital investment caused the Urals and other Soviet regions to press Moscow to increase the investment and production targets of the first five year plan. He provides conclusive evidence that local leaders established the pace for carrying out such radical policies as breakneck industrialization and the construction of forced labor camps. When the production targets could not be met, regional officials falsified data and blamed saboteurs for their shortfalls. Harris argues that such deception contributed to the personal and suspicious nature of Stalin's rule and to the beginning of his onslaught on the Party apparatus. Most of the region's communist leaders were executed during the Great Terror of 1936–38. In his conclusion, Harris measures the impact of their interests on the collapse of the communist system,

and the fate of reform under Gorbachev and Yeltsin.
