*V-1 Flying Bomb 1942-52* Steven J.

Zaloga, 2011-07-20 The first deployment of the V-1 was in June 1944 when, following two years of tests, Hitler gave the order to attack England. Known to the Allies as the Buzz Bomb or Doodlebug, the V-1 was the world's first cruise missile. This book explores the V-1 in detail, from its initial concept, first use in 1944, the various Allied counter-measures, and the later use of the V-1 during the Battle of the Bulge. The major foreign derivatives, including the US copy JB-2 Loon and numerous post-war Soviet variants, are also covered.

*V1 Flying Bomb Aces* Andrew Thomas, 2013-09-20

Shortly after the Allied landings in France the Germans unleashed the first of their so-called 'revenge weapons', the V1 flying bomb. Launched from specially constructed sites in northern France, the fast, small, pulse-jet powered pilotless aircraft were aimed at London with the

sole intent of destroying civilian morale to the point where the British government would be forced to sue for peace. This dangerous new threat drew an immediate response, and the Air Defence of Great Britain (as Fighter Command had been temporarily renamed) established layers of defence that included a gun line and balloon barrage. The main element, however, were standing patrols by the fastest piston-engined fighters available to the RAF – the new Tempest V and Griffon-powered Spitfire XIV. Other types were allocated too, most notably the Polish Mustang wing, while night defence was left in the capable hands of several dedicated Mosquito squadrons. Although pilotless, the V1 was no easy foe thanks to its speed, powerful warhead and sheer unpredictability. Nevertheless, 154 pilots became V1 aces, 25 of whom were also aces against manned aircraft.

#### **Meteor I vs V1 Flying Bomb**

Donald Nijboer, 2012-10-20 A total of 10,500 missiles were launched as part of the V1 attack, of which 3,957 were destroyed by the defences. Indeed, it could have been much worse, for by the end of the war the Germans had manufactured close to 32,000 flying bombs. The defences put forward to guard against the V1 were formidable – 23,000 men and women with their guns, radar and communications networks were installed on coastal sites.

Squadrons of Britain's newest Spitfires, the F XIVs, and Hawker Tempest Vs were kept at home to battle the new menace. Rushed into action in July 1944 to help counter the V1 threat, Britain's Gloster Meteor I was the first jet fighter to enter RAF service. On 4 August the Meteor scored

its first V1 victory. Having just closed in on a flying bomb, its officer squeezed the trigger but his guns jammed. Using the Meteor's superior speed, he was able to overtake the missile and, using his wing tip, he tipped the craft over and sent it crashing into the ground. The interceptions between the V1 and Britain's Gloster Meteor were historic, and ushered in a new era of aerial combat.

**The Flying Bomb War** Peter Haining, 2002 In October 1942, the prototype German V2 rocket was launched. Two months later the V1 (or Doodlebug) was also fired. Together these two missiles were destined to attack England in a merciless onslaught. This text offers an insight into a significant part of World War II.

**Meteor I vs V1 Flying Bomb** Donald Nijboer, 2012-10-23 British jet fighters initiated jet vs. jet warfare when they fought Hitler's Nazi German V-1 attacks on London in World War II. The V1 attack on London began on the night of 13/14 June 1944 from bases in Normandy. On 29 March 1945 the last one to fall on Britain was shot down by gunners in Suffolk. A total of 10,500 missiles were launched, of which 3957 were destroyed by the defences - 3531 reached England, 2420 falling in the London area. No fewer than 6184 people were killed and 17,981 seriously injured. Indeed, it could have been much worse, for by the end of the war the Germans had manufactured close to 32,000 flying bombs. The defences put forward to guard

against the V1 were formidable - 23,000 men and women with their guns, radar and communications networks were installed on coastal sites. Squadrons of Britain's newest Spitfires, the F XIVs, and Hawker Tempest Vs were kept at home to battle the new menace. While the Spitfire F XIV and Tempest V had excellent low-level speed and were able to catch the V1, there was one aircraft that was much faster. Rushed into action on 22 July 1944 to help counter the V1 threat, Britain's Gloster Meteor I was the first jet fighter to enter RAF service. At low and medium altitudes the Meteor was faster than its piston-engined contemporaries, which in turn made it perfectly suited to 'anti-Diver' V1 operations. On 4 August the Meteor scored its first V1 victory. Having just closed in on a flying bomb, Flg Off Dean of No 616 Sqn squeezed the trigger but his guns jammed. Using the Meteor's superior speed, he was able overtake the missile and, using his wing tip, he tipped the craft over and sent it crashing into the ground. This was the first time a jet-powered enemy aircraft had been destroyed by a jet fighter without a shot being fired! It was also the world's first jet versus jet encounter. As the only jet fighter squadron in Allied service in Europe, No 616 Sqn would go on to shoot down 13 V1s. A small number perhaps, but the interceptions between the V1 and Britain's Gloster Meteor were historic, and ushered in a new era of aerial combat.

#### **Air-Launched Doodlebugs** Peter C.

Smith, 2007-04-13 The V 1, or Doodlebug or Flying-bomb came into use in June 1944 and, together with

the V 2 Rocket, was Hitler's final hope in face of the advancing Allied forces sweeping across Europe towards Germany. Of the 8,000 that were launched within the first 80 days, some 2,300 reached the London area where they caused more death and destruction to its population and buildings. As the front line moved eastwards, many of the ground-based launch ramps became denied to the German forces and the modest range of the missile meant that other means of launching must be considered to continue the threat. An air-launching system, utilizing the Luftwaffe's Heinkel 111 bomber, was developed and operated by the newly formed Kampfgeschwader units. This posed a dramatic new threat to the UK because the V 1's effective range was considerably increased and its mobile firing point offered a much greater target area when fired from an aircraft flying over the North Sea. This is the story of the development and operation of this new form of attack and also of the Allied reaction and defense-measures taken to minimize damage.

#### *Disarming Hitler's V Weapons* Chris

Ransted, 2013-09-19 An account of the "brave men of the bomb disposal units who died disarming the weapons that Hitler hoped would save the Nazis from defeat" (Dover Express/Folkestone Herald). In 1944 the V-1s and V-2s, Hitler's "vengeance" weapons, were regarded by the Allied leaders in London as the single greatest threat they had faced. It was feared that these flying bombs and rockets might turn the tide of war once again in Germany's favor. Yet, little more than half of these missiles hit their targets, some failing to

explode. Their wreckage lay across the southern half of England or in Europe, with contents liable to sudden and deadly ignition. It was the job of specialist Bomb Disposal teams to render the V-weapons safe and uncover their secrets. This is their story. In this unique book Chris Ransted has investigated the work of these unsung heroes who risked their lives every time they were called into action and, in the course of his research he has located the sites of many of the unexploded V-weapons, revealed here for the first time. Ransted also details the methods used by the Bomb Disposal men and the equipment they used. The book is richly illustrated with 266 photographs and diagrams, many of which have never previously been published. In completing this, the most comprehensive study of its kind, the author describes the deeds of those gallant Bomb Disposal men that were awarded one of the highest honors which could have been bestowed upon them by their country—the George Medal. “A particularly thorough and enlightening book.”—Military Vehicle Trust

**V1** Joachim Engelmann, 1997-01-06 One of the true land-marks of flight, this book covers its limited yet devastating use during WWII.

*The V1* John Oliver, 2018-08-27 John Oliver uses original German and British documents largely ignored as sources by previous writers to tell the complete story of the V1 flying bomb, in memory of the men and women who died during World War II collecting information about it, or manufacturing it, or attacking its launching sites, and for those who lived under the fear of it. It is also the story of the personnel of Flakregiment 155

(W), the only unit to fire the flying bomb, mainly conscripts who ended up by chance in a very hazardous posting. The V1 was so dangerous to fire and so unpredictable in its early trajectory that it was banned from being launched on German soil and the regiment suffered continual casualties - many of them fatal - simply in the line of daily duty. Leading it was a man who deserves to be recognised: Oberst Max Wachtel, an intelligent and able man, proud of his men and what they achieved, rising above all the hardships that came with working with a top secret and brand new weapon. And as it all comes to an end, the revelation of perhaps the most incredible love story of World War II.

**Operation Diver** Colin Dobinson, 2019 Operation Diver' is the story of a battle: its action, people, landscapes, and remains. The battle was Anti-Aircraft Command's attempt to defeat the V1 flying-bomb, the first of Nazi Germany's 'retribution' weapons, whose attacks dominated the home front in the final year of the Second World War. Beginning in the week of D-Day, the flying bomb battle lasted for nine months. In that time

the men and women of AA Command became a massed, mobile army, shifting a vast carpet of guns to meet the V1's changing lines of attack. Beginning in Kent and Sussex, their journey took in the Thames Estuary, East Anglia and eventually the Yorkshire coast. Along with the RAF's fighter aircraft and the larger air defence system, their mission was to prevent a single flying bomb from reaching London, or any other British city. The battle was won; but not before many technical and human obstacles were overcome.

**Flying Bombs Over England** Herbert Ernest Bates, 1994 Recreates the atmosphere of life 50 years ago when Germany let loose its V1s and V2s. The book explains the brilliant German engineering skills behind this last-ditch orgy of terror, and describes how they were finally repulsed by the front-line boys and girls in this new Battle of Britain.
