**Amplification Criterion of Gradually Varied, Single Peaked Waves** John Peter Jolly,Vujica M. Yevjevich,1971

*Gradually-varied Flow Profiles in Open Channels* Chyan-Deng Jan,2014-01-08 Gradually-varied flow (GVF) is a steady non-uniform flow in an open channel with gradual changes in its water surface elevation. The evaluation of GVF profiles under a specific flow discharge is very important in hydraulic engineering. This book proposes a novel approach to analytically solve the GVF profiles by using the direct integration and Gaussian hypergeometric function. Both normal-depth- and critical-depth-based dimensionless GVF profiles are presented. The novel approach has laid the foundation to compute at one sweep the GVF profiles in a series of sustaining and adverse channels, which may have horizontal slopes sandwiched in between them.

**Microbial Versatility in Varied Environments** Raghvendra Pratap Singh,Geetanjali Manchanda,Indresh Kumar Maurya,Yunlin Wei,2020-04-09 The book compiles the latest studies on microorganisms thriving in extreme conditions. Microbes have been found in extremely high and low temperatures, highly acidic to saline conditions, from deserts to the Dead sea, from hot-springs to underwater hydrothermal vents- the diversity is incredible. The various chapters highlight the microbial life and describe the mechanisms of tolerance to these harsh conditions, and show how an understanding of these phenomena can help us exploit the microbes in biotechnology. The theme of the book is highly significant since life in these environments can give vital clues about the origin and evolution of life on earth, as a lot of these conditions simulate the environment present billions of years ago. Additionally, the study of adaptation and survival of organisms in such environments can be important for finding life on other planets. This book shall be useful for students, researchers and course instructors interested in evolution, microbial adaptations and ecology in varied environments.

**Polymer Brush Films with Varied Grafting and Cross-Linking Density via SI-ATRP** Inga Lilge,2017-09-13 In her research, Inga Lilge focuses on a systematic study of poly(acrylamide) (PAAm) brushes prepared by surface-initiated atom transfer radical polymerization (SI-ATRP). In addition to the analysis of the time dependence of the polymer brush growth, the conformation of the polymer brushes is varied by grafting or cross-linking density. The results have practical implications for the study of cellular interactions on PAAm brushes since cell-substrate interactions are known to influence various cell characteristics, such as migration and adhesion.

**Landscape Dynamics, Soils and Hydrological Processes in Varied Climates** Assefa M. Melesse,Wossenu Abtew,2015-07-21 The book presents the processes governing the dynamics of landscapes, soils and sediments, water and energy under different climatic regions using studies conducted in varied climatic zones including arid, semi-arid, humid and wet regions. The book has 35 chapters in seven sections: 1) Landscape and Land Cover Dynamics, 2) Rainfall-Runoff Processes, 3) Floods and Hydrological Processes 4) Groundwater Flow and Aquifer Management, 5) Sediment Dynamics and Soil Management, 6) Climate change impact on vegetation, sediment and water dynamics, and 7) Water and Watershed Management.

**Performance of Pallets with Hardboard Decks of Varied Density** Robert K. Stern,1979

*Varied Perspectives on Play and Learning* Ole Fredrik Lillemyr,Sue Dockett,Bob Perry,2013-09-01 This book brings together an international group of researchers reporting on their work about play and early childhood education across 13 countries – Norway, Sweden, Denmark, England, Germany, Hong Kong, United States of America, India, The Maldives, Sri Lanka, Singapore, China and Australia. It contributes to growing international conversations about play and the role of play in early childhood education. Each of the chapters in this anthology reflects different directions in research as well as a range of approaches to reconceptualising play. Each researcher questions assumptions underpinning young children’s play and early childhood education and explores the implications of these questions for further research, practice and policy. Chapters report a wide range of innovative and transformative research, focusing on areas such as the play of infants and toddlers, the role of values in play, the complexity of connections between play and learning, motivation, the role and understandings of early childhood educators in promoting children’s play, risky play and the impact

of Westernised approaches to play in different contexts. This book argues for the importance of children’s play at a time when there is a great deal of pressure to increase the academic focus of early education and to eliminate play that could be deemed risky. Several authors note moves towards pedagogies of play and explore the potential links between play and learning in early education settings. The research reported in this book is a timely reminder of the value of play, for and of itself, as well as the learning potential of play. It provides a pathway into the debates about the role and value of play in early years education for students, researchers and policy-makers.
