Cars of the Soviet Union Andy Thompson,2008 The story of the Soviet Union's cars has to be seen in the context of a planned society in which everything was planned well in advance, and consumer items were not a priority until well after the Second World War. This extraordinarily detailed study charts the history of Soviet cars from the birth of the Soviet Union in 1917 until its demise in 1990, with a conclusion about the post-Soviet era. It is the story of an insular, state-run car industry in which the carefully thought-out ideas of ministerial planners, rather than fickle customers in a free market, determined what cars were made in a country where the open road was often a 300-mile track across a windswept steppe.

Proceedings of the 6th International Conference on Industrial Engineering (ICIE 2020) Andrey A. Radionov,Vadim R. Gasiyarov,2021-03-26 This book highlights recent findings in industrial, manufacturing and mechanical engineering, and provides an overview of the state of the art in these

fields, mainly in Russia and Eastern Europe. A broad range of topics and issues in modern engineering are discussed, including the dynamics of machines and working processes, friction, wear and lubrication in machines, surface transport and technological machines, manufacturing engineering of industrial facilities, materials engineering, metallurgy, control systems and their industrial applications, industrial mechatronics, automation and robotics. The book gathers selected papers presented at the 6th International Conference on Industrial Engineering (ICIE), held in Sochi, Russia in May 2020. The authors are experts in various fields of engineering, and all papers have been carefully reviewed. Given its scope, the book will be of interest to a wide readership, including mechanical and production engineers, lecturers in engineering disciplines, and engineering graduates.

Business in Post-Communist Russia Mikhail Glazunov, 2013-12-04 It is a widely held idea that Russia has completed its revolution which brought down the Soviet economy, and that many companies after privatisation work as typical western companies. Another belief is that Russia has adopted a market economy but then reverted to authoritarianism. With these two ideas in mind, this

book discusses the suggestion that the key element of post-Soviet economic and political reforms in the last two decades was the redistribution of assets from the state to oligarchs and the new elite. It looks at why most Russian companies could not achieve strong long-run corporate performance by analysing in detail a range of different Russian companies. The book is a useful tool for understanding the future prospects for Russian business.

Cars for Comrades Lewis H. Siegelbaum, 2011-08-15 The automobile and Soviet communism made an odd couple. The quintessential symbol of American economic might and consumerism never achieved iconic status as an engine of Communist progress, in part because it posed an awkward challenge to some basic assumptions of Soviet ideology and practice. In this rich and often witty book, Lewis H. Siegelbaum recounts the life of the Soviet automobile and in the process gives us a fresh perspective on the history and fate of the USSR itself. Based on sources ranging from official state archives to cartoons, car-enthusiast magazines, and popular films, *Cars for Comrades* takes us from the construction of the huge Soviet Detroits, emblems of the utopian phase of Soviet planning, to

present-day Togliatti, where the fate of Russia's last auto plant hangs in the balance. The large role played by American businessmen and engineers in the checkered history of Soviet automobile manufacture is one of the book's surprises, and the author points up the ironic parallels between the Soviet story and the decline of the American Detroit. In the interwar years, automobile clubs, car magazines, and the popularity of rally races were signs of a nascent Soviet car culture, its growth slowed by the policies of the Stalinist state and by Russia's intractable roadlessness. In the postwar years cars appeared with greater frequency in songs, movies, novels, and in propaganda that promised to do better than car-crazy America. Ultimately, Siegelbaum shows, the automobile epitomized and exacerbated the contradictions between what Soviet communism encouraged and what it provided. To need a car was a mark of support for industrial goals; to want a car for its own sake was something else entirely. Because Soviet cars were both hard to get and chronically unreliable, and such items as gasoline and spare parts so scarce, owning and maintaining them enmeshed citizens in networks of private, semi-illegal, and ideologically heterodox practices that the

state was helpless to combat. Deeply researched and engagingly told, this masterful and entertaining biography of the Soviet automobile provides a new perspective on one of the twentieth century's most iconic—and important—technologies and a novel approach to understanding the history of the Soviet Union itself.

Pleasures in Socialism David Crowley, Susan E. Reid, 2010-10-31 This volume shows how the rise of consumer culture took a unique form in Eastern Europe. It investigates the ways in which pleasurable activities were both a space in which these communist governments tried to insinuate themselves and thereby further expand the reach of their authority.

Applications of Artificial Intelligence in Engineering VI George Rzevski, R.A. Adey, 2012-12-06 This book contains papers presented at the sixth International Conference on Application of Artificial Intelligence in Engineering held in Oxford, UK in was held in Southampton, UK July 1991. The first conference in this series the second in Cambridge, Massachusetts, USA in 1987, the third in 1986, 1989 in Palo Alto, California, USA in 1988, the fourth in Cambridge, UK in and the fifth in Boston,

Massachusetts, USA in 1990. The conference series has now established itself as the unique forum for the presentation of the latest research, development and application of artificial intelligence (AI) in all fields of engineering. Consequently, books of conference proceedings provide a historical record of the application of AI in engineering design, analysis, simulation, planning, scheduling, monitoring, control, diagnosis, reliability and quality, as well as in robotics and manufacturing systems, from the early beginnings to mature applications of today. Whilst previously the field was dominated by knowledge-based systems, in this latest volume, for the first time, a significant proportion of papers cover the paradigms of neural networks and genetic algorithms. Learning and self organising behaviour of systems based on these paradigms are particularly important in engineering applications. From a large number of submitted proposals over sixty papers have been selected by members of the Advisory Committee who acted as referees. Papers have been grouped under the following headings.

Domestic Determinants of Soviet Foreign Policy towards South Asia and the Middle East Hafeez

Malik, 1990-06-18 A collective endeavour of scholars highlighting some of the significant domestic

determinants of Soviet foreign policy. There is a general consensus that policy makers are influenced by Islam, the Soviet-Central Asian nationalities, oil and geography.

Spring Shoots: Young Belarusian Poets in the Early Twenty-First Century Arnold

McMillin, 2015-10-08 Spring Shoots introduces individually the early work of two score young Belarusian poets, all of whom began writing a□fter the start of the present regime. □This is the first such survey in any language, including Belarusian. All poetic illustrations are cited in the original and accompanied by English prose translations. □The poets' work is presented in eight loosely thematic groups: the historical heritage, religion, protest at alienation and repression, use and defence of the language, the lyrical impulse, humour, performance poetry and the theme of writing itself and poetic inspiration. Also very important in these poems are the joys and tribulations of love. By using the Belarusian language, the poets are helping to save it from decades of erosion and o□fficial

devaluation, so that their discussion of it is often poignant, particularly as language is a central part of the also suppressed historical heritage. Other types of verse such as humorous, lyrical or that for performance, are less central to the Belarusian situation, but the angry and bitter protest poems serve as perhaps a release valve, as small editions of poems are far less conspicuous than the expression of such feelings on the street, which always meets bitter reprisals.

Automobily Lada 1970–1990 Tuřek Jan,2012-10-16 Sovětské automobily Lada, u nás dodnes známé pod přezdívkou ěigulíky, si v sedmdesátých a osmdesátých letech minulého století získaly značnou oblibu nejen v zemích východního bloku, ale i na Západě. Kniha nabízí technický popis jednotlivých modelů, od prvních vozů klasické koncepce Lada 1200, přes kompaktní terénní automobil Lada Niva s pohonem čtyř kol a modernizované modely Lada 2105, až po novou generaci z poloviny 80. let s motorem vpředu napájenou a pohonem předních kol, její první představitelkou

byla Lada 2108 Samara. Kniha nezapomíná ani na prototypy, sportovní aktivity i africká dobrodružství dnes už legendárních automobilů. Poprvé také přináší podrobný pohled jejich produkce a dovozu do Československa.

Někdy jsme nad nimi ohrnovali nos a toužili po něčem lepším, většina z nás však stejně neměla na vybranou. Dnes se nad tím můžeme pousmát, zapomenout bychom však neměli. Nejen na dobu, ale ani na automobily, v nichž jsme tehdy jezdili. Najdete zde množství dosud nikde nepublikovaných údajů.

The World Guide to Automobile Manufacturers ,1987 Contains accessible, clearly written articles on some 1,000 car manufacturers, from their earliest days right up to the present. Each entry

describes the important cars made by the manufacturer under discussion throughout its history, in addition to detailing the economic evolution of the manufacturer.
