Vickers VC10 Lance Cole,2020-12-28 “A comprehensive history of the VC10 . . . enhanced by the fabulous artwork and photographs . . . will take you back to the golden age of jet travel.” —Flight Line Book Review Designed and manufactured by the men who would make Concorde, the Rolls-Royce powered Vickers VC10, and its larger variant, the Super VC10, represented the ultimate in 1960s subsonic airliners. The VC10 was Britain’s answer to the Boeing 707 and the Douglas DC-8, but it could take off in a very short distance, climb more steeply, and land at slower speed than its rivals. These were vital safety benefits in the early years of the jet age. At one stage, the Super VC10 was the biggest airliner made in Europe and the fastest in the world. On entry into service, both the VC10 and the longer Super VC10 carved out a niche with passengers who enjoyed the speed, silence and elegance of the airliner. Pilots, meanwhile, loved its ease of flying and extra power. Yet the VC10 project was embroiled in machinations across many years and more than one government. Questions were asked in parliament and the whole story was enmeshed in a political and corporate affair that signified the end of British big airliner production. Yet the men who made the VC10 also went on to design and build Concorde. Many VC10 pilots became Concorde pilots. In service until the 1980s with British Airways, and until 2013 with the RAF, the VC10 became a British icon and a national hero, one only eclipsed by Concorde. It retains a place in the hearts and minds of enthusiasts the world over. “A good one-stop reference to the VC10.” —Scale Aviation Modeller International

Vickers/BAC VC10 Manual Keith Wilson, 2016-12-01 Designed in the 1950s to operate on long-distance routes, the four-jet Vickers VC10 saw service with BOAC and a number of other airlines from the 1960s to 1981. It enjoyed a further career with the RAF as a strategic transport and later as an aerial refuelling aircraft. The last VC10 K3 tanker was retired by the RAF in 2013. Keith Wilson examines the design, construction and use of the VC10, using as his centrepiece ex-RAF VC10 C1K (XR808) and VC10 K3 (ZA147) tankers at Bruntingthorpe, Leicestershire.

Fortress Falklands Graham Bound, 2012-06-19 The Falkland Islands sprang to fame in 1982, when Argentine Forces invaded and occupied them. British rule was re-established following an intensely violent war. But, as the 30th anniversary of that conflict approaches, the causes of conflict in the Falklands have not been resolved. Simmering tensions means that a powerful military machine remains on the islands, and its guard is never relaxed. The UK has some of its most modern and powerful defense assets there, and on permanent standby. These include Eurofighter Typhoon interceptors; ground to air missiles; mountaintop radar sites, and destroyers and frigates. In addition, the islanders themselves have a potent infantry defense force. Graham Bound's book *Fortress Falklands* examines the defenses of the islands today and the ongoing need for vigilance. Relations with Argentina have deteriorated since the discovery of oil in Falklands waters and a boom in the Falklands economy. In response, Buenos Aires has established a ban on shipping links between South America and the islands, and they exploit every opportunity to press their case for sovereignty. Islanders believe they are under economic siege.

Contact! Bob Tuxford, 2016-08-05 A retired RAF Squadron Leader recounts his decades of service in Cold War combat zones across the globe, including his crucial role in the Falklands. Joining the Royal Air Force in 1970, Bob Tuxford distinguished himself as a fighter pilot, test pilot, squadron leader and flying instructor. In this enthralling memoir, he shares his story of active service across the world. Among other episodes, Tuxford details his exchange tour in the US Air Force and his courageous mission during the Falklands war that earned him an Air Force Cross for Gallantry. As a Victor tanker captain, Tuxford had the job of executing air-to-air refueling operations through the 1970s and early 1980s. This experience prepared him for the vital role he played in the first Black Buck mission during the Falklands campaign. Tuxford was the last Victor tanker to refuel the Vulcan piloted by Martin Withers before bombing commenced on that fateful night in 1982. Later in his career, Bob became the senior test pilot on the heavy aircraft test squadron at the Aircraft and Armament Experimental Establishment, Boscombe Down. In *Contact!*, Tuxford offers an intimate look at life in the RAF while shedding light on the importance of tanker squadrons during the Cold War.

VCs of the First World War: The Air VCs Peter G. Cooksley, Peter F. Batchelor, 2014-04-07 Of more than 600 Victoria Crosses awarded to British and Empire servicemen during the First World

War, nineteen were awarded to airmen of the newly formed Royal Flying Corps and Royal Naval Air Service. Of these, four were posthumous awards and all but one of the total were to officers. Some of these valorous airmen were from humble backgrounds and with limited education; others were collegiate men from wealthy families. But in the words of one senior officer they all had in common 'the guts of a lion'. Each VS winner's act of bravery is recorded here in intricate detail, along with their backgrounds and their lives after the war.

RAF Strike Command, 1968-2007 Kev Darling,2013-01-19 Aviation author Kev Darling looks at the origins of the World War Two Royal Air Force commands and histories in RAF Strike Command. In 1968, the RAF Commands that had become famous in World War Two—Fighter, Bomber, Coastal, Air Support and Signals Commands—were combined into the single Strike Command, an amalgamation that served throughout the remaining years of the Cold War, in the Falklands, and in the Middle East in Operations Desert Shield, Desert Storm and Granby. This organizational change caused re-equipment, base changes and increasing economic constraints. The Royal Navy was now responsible for the UK's nuclear deterrent in the form of their Polaris submarines, so the RAF's V-Bomber Force were now relegated to tanker operations, with the exception of the lone Vulcan that was sent to the Falklands conflict. The Command's fleet of fast jets became more adaptable, with single types assuming the roles of fighter, bomber, reconnaissance, and maritime attack. The aircraft also became multinational in their design and manufacture as Britain's postwar lead in aircraft design had been frittered away by years of thoughtless government, leading to a single company for production. Apart from the brilliant Harrier which the US continues to develop and build, other aircraft flown by the Command were from European syndicates, such as the Tornado

and Jaguar. The US supplied the transports in the form of the faithful Hercules, and Europe most of the helicopter fleet. Exploring the operations that took place during this military wing's existence, the aircraft they flew and the men who flew them, RAF Strike Command is a tribute to the fast-dwindling power of the Royal Air Force.

The Panavia Tornado Michael Leek, 2015-07-30 Through a collection of dramatic and informative photographs, supplemented by cutaway illustrations, this book highlights the agility and flexibility of this dedicated RAF aircraft. Throughout the course of its career, it has formed the backbone of the RAF across its many different theaters of operation. Utilized in a strike, anti-aircraft, air superiority, air defense, reconnaissance, electronic warfare and fighter-bomber capacity, this aircraft type has enjoyed an immensely varied career. Each aspect is illustrated in this photographic celebration. The book includes photographs by the author and a select number of other amateur photographers, with the vast majority of photographs never previously published taken low level around the hills and mountains of England, Scotland and Wales. This impressive new photographic publication will be presented in full colour and is sure to be prized as a collector's piece amongst fans of the genre.

Air-to-Air Refuelling Aircraft Chris Gibson, 2022-06-20 Modern strategists talk about "force multipliers," and, for air operations, air-to-air refueling is without doubt the greatest force multiplier of all. In-flight refueling has allowed not only the longest bombing missions in history but also persistence in air defense, transport reach and flexibility in ground-attack tasks. Covering a range of

refuelers — including the Boeing KC-97 and KC-135, Vickers Valiant, Handley Page Victor, Lockheed TriStar, Vickers VC10, McDonnell Douglas KC-10 and the Airbus MRTT Voyager — this book details the history of air-to-air refueling and celebrates the key role played by tanker aircraft in the application of air power around the world.
