Naval Air Station Oceana Fleet Defenders Mark A. Chambers,2022-04-18 Since 1950, US Navy fleet defender (fighter) squadrons--home-based at Naval Air Station (NAS) Oceana in Virginia Beach, Virginia--have served as a vital part of the country's national defense and helped to exert global US naval firepower. Over the years, NAS Oceana-based fleet defender squadrons have participated in combat during the Korean, Vietnam, and Persian Gulf Wars and in military incidents and conflicts in Libya as well as Kosovo and Afghanistan. During the Cold War, NAS Oceana-based fleet defender squadrons served as crucial deterrents to the Soviet Union's acts of aggression and provocation. More recently, NAS Oceana-based fleet defender squadrons have been highly engaged in the ongoing War on Terrorism, striking Islamic State of Iraq and Syria (ISIS) targets in Iraq and Syria and Taliban targets in Afghanistan. Today, these squadrons stand ready to defend the United States, its naval fleets, and its interests abroad.

The Last of NASA's Original Pilot Astronauts David J. Shayler,Colin Burgess,2017-06-19 Resulting from the authors' deep research into these two pre-Shuttle astronaut groups, many intriguing and untold stories behind the selection process are revealed in the book. The often extraordinary backgrounds and personal ambitions of these skilled pilots, chosen to continue NASA's exploration and knowledge of the space frontier, are also examined. In April 1966 NASA selected 19 pilot astronauts whose training was specifically targeted to the Apollo lunar landing missions and the Earth-orbiting Skylab space station. Three years later, following the sudden cancellation of the USAF's highly classified Manned Orbiting Laboratory (MOL) project, seven military astronauts were also co-opted into NASA's space program. This book represents the final chapter by the authors in the story of American astronaut selections prior to the era of the Space Shuttle. Through personal interviews and original NASA documentation, readers will also gain a true insight into a remarkable age of space travel as it unfolded in the late 1960s, and the men who flew those historic missions.

Moon Bound Colin Burgess,2013-03-12 Often lost in the shadow of the first group of astronauts for the Mercury missions, the second and third groups included the leading figures for NASA's activities for the following two decades. "Moon Bound" complements the author's recently published work, "Selecting the Mercury Seven" (2011), extending the story of the men who helped to launch human spaceflight and broaden the American space program. Although the initial 1959 group became known as the legendary pioneering Mercury astronauts, the astronauts of Groups 2 and 3 gave us many household names. Sixteen astronauts from both groups traveled to the Moon in Project Apollo, with several actually walking on the Moon, one of them being Neil Armstrong. This book draws on interviews to tell the astronauts' personal stories and recreate the drama of that time. It describes the process by which they were selected as astronauts and explains how the criteria had changed since the first group. "Moon Bound" is divided into two parts, recounting the biographies relating to the nine astronauts from NASA's Group 2 in the first part, and the fourteen finalists in Group 3 in the second part. The stories of both selection groups are narrated through the experiences of four finalists with interesting backgrounds. One of these men is Al Rupp of the USAF who, as a West Point cadet, cheekily helped to steal the Navy mascot goat prior to the annual Army versus Navy game in 1953, thus achieving legendary status in the game's history. Rupp was killed in a plane crash just two years after being named as a finalist for Group 3. The service career of naval aviator John Yamnicky was also very much the equal of other finalists, but he was killed on September 11, 2001, as he was a passenger on hijacked Flight 77, which was flown into the Pentagon. At the end of the work there are several chapters on how these candidates were prepped for their missions.

As We Recall James Sagerholm,2015-08-15 As We Recall is the first book of its kind. A collection of reminiscences written by members of the U.S. Naval Academy class of 1952, it is a testament to the value of a Naval Academy education. Some stories are of combat in Korea, exploits in space, aerial combat over Vietnam, or development of major weapons systems. Others are stories of life at sea or of the challenges faced by the families supporting their husbands and fathers. It is safe to say, this book is an edifying, intimate, and inspiring history.

A Long Voyage to the Moon Geoffrey Bowman,2021-11 Biography of Apollo 17 astronaut Ron Evans (1933-1990).

Selecting the Mercury Seven Colin Burgess,2011-08-17 The names of the seven Mercury astronauts were announced in April 1959 amid a flurry of publicity and patriotism. This work provides biographical details of all thirty-two finalists for the seven coveted places as America's pioneering astronauts. All of the candidates were among the nation's elite pilots involved in testing new supersonic aircraft capabilities. Most had served as wartime fighter and bomber pilots; some were test pilots on top secret and sophisticated aviation projects, while others were fleet admirals, prisoners of war, and proposed pilots for spaceflight programs such as the Dyna-Soar (X-20). The names of all 32 finalists have been kept secret until very recently. Selecting the Mercury Seven also relates the history and difficulties behind the initial choice of candidates. The lives, motivations, military careers, and achievements of the unsuccessful twenty-five finalists are explored first in fully authorized biographies. Test pilots for the U.S. Navy, Air Force, and Marine Corps, each man has a fascinating and very different story to tell. All thirty-two men had to endure meticulous, demeaning, and brutal week-long medical examinations at the Lovelace Clinic in New Mexico. This was followed by another torturous week at the Wright Aeromedical Laboratory in Ohio, where they were subjected to extreme fitness and physiological testing, the sole purpose of which was to sort out the Supermen from the near-supermen. The final part of the book examines the accomplishments and spaceflights of the seven successful candidates, bringing their amazing stories right up to date.

The Astronauts Bill Yenne,1986-10 A history of the first 25 years of manned space flight.

Into the Black Rowland White,2017-04-18 On April 12, 1981, NASA's Space Shuttle Columbia blasted off from Cape Canaveral: a state-of-the-art flying machine, and the world's first real spaceship: a winged rocket plane, the size of an airliner, and capable of flying to space and back before preparing to fly again. Less than an hour after departure tiles designed to protect the ship from the blowtorch burn of re-entry were missing from the heat shield. White recaptures the historic moments leading up to the launch of the Columbia, her daring maiden flight, and her life and death struggle to return, using interviews, NASA oral histories, and recently declassified material.

Forever Young John W Young,2012-09-16 He walked on the Moon. He flew six space missions in three different programs--more than any other human. He served with NASA for more than four decades. His peers called him the astronaut's astronaut. Enthusiasts of space exploration have long waited for John Young to tell the story of his two Gemini flights, his two Apollo missions, the first-ever Space Shuttle flight, and the first Spacelab mission. Forever Young delivers all that and more: Young's personal journey from engineering graduate to fighter pilot, to test pilot, to astronaut, to high NASA official, to clear-headed predictor of the fate of Planet Earth. Young, with the assistance of internationally distinguished aerospace historian James Hansen, recounts the great episodes of his amazing flying career in fascinating detail and with wry humor. He portrays astronauts as ordinary human beings and NASA as an institution with the same ups and downs as other major bureaucracies. He frankly discusses the risks of space travel, including what went wrong with the Challenger and Columbia shuttles. Forever Young is one of the last memoirs produced by an early American astronaut. It is the first memoir written by a chief of the NASA astronaut corps. Young's experiences and candor make this book indispensable to everyone interested in the U.S. space program.
