Alfred Price

Vickers Jockey Jesse Russell, Ronald Cohn, 2012-02
High Quality Content by WIKIPEDIA articles! The Vickers Type 151 Jockey was an experimental low-wing monoplane interceptor fighter powered by a radial engine. It was later modified into the Type 171 Jockey II which had a more powerful engine and detailed improvements. Only one was built, and this was lost before its development was complete, but the knowledge gained enabled Vickers to produce the more refined Venom.

The Royal Air Force: Re-Armament 1930 to 1939
Ian M. Philpott, 2006-07-20 Volume II of this mammoth reference work covers the years in which the League of Nations failed because of the emerging dictatorships in Germany and Italy and the expansionist policies adopted by Japan. Britain was still reeling from the consequences of World War I and the RAF was sadly far behind the other major world powers in aircraft design, still relying on bi-planes that were direct descendants of World War I thinking. It gradually became apparent that, despite UK government dithering, the RAF needed to develop new aircraft, engines and increase production to confront the bully-boy

tactics of the Axis powers. As the turn of the decade approached extraordinary measures were taken to enable RAF to defend Britain's skies and this her freedom. As with Volume 1, this book covers every conceivable part of the RAF's history through these pre-War days. It looks at the development and invention of new equipment such as radar, monoplane fighters, metal construction and the heavy bomber. This was an era when science in aviation was rushing ahead and fortunately for Britain's freedom, it laid the foundations of victory in 1.943

The Rise and Fall of the Japanese Imperial Naval

Air Service Peter J. Edwards, 2010-11-20 This book describes in considerable detail the people, events ships and aircraft that shaped the Air Service from its origins in the late 19th century to its demise in 1945. The formative years began when a British Naval Mission was established in Japan in 1867 to advise on the development of balloons for naval purposes. After the first successful flights of fixed-wing aircraft in the USA and Europe, the Japanese navy sent several officers to train in Europe as pilots and imported a steady stream of new models to evaluate. During World War One Japan became allied with the UK and played a significant part in keeping the German fleets of ships and submarines at bay in the Pacific and Indian Oceans. However, in the international naval treaties that followed they felt betrayed, since the number of capital ships, battleships and cruisers, that they were allowed was below those of the USA and the UK. Aircraft carriers were not included, so a program of carrier building was started and continued until World War Two. At the same time they developed an aircraft industry and at the beginning of war their airplanes were comparable, and in some instances superior, to those of the British and Americans. Much prewar experience was gained during Japans invasion of China, but their continued anger with America festered and resulted in their becoming allied with Germany, Italy and the Vichy

France during World War Two. There followed massive successful attacks on Pearl Harbor, the Philippines, the Southern Islands, Port Darwin and New Guinea. The British were decimated and the USA recoiled at the onslaught, taking over a year to regroup and take the war to the Imperial Japanese forces. Throughout the conflict many sea battles were fought and the name Zero became legendary. When Japan eventually capitulated after the Atomic bombs were dropped the Japanese Imperial Air Service was disbanded.

Spitfire Leo McKinstry, 2010-10-14 In June 1940, the German Army had brought the rest of Europe to its knees. 'Hitler knows that he will have to break us in this island or lose the war. If we can stand up to him, all Europe may be free and the life of the world will move forward into broad, sunlit uplands,' said Churchill. The future of Europe depended on Britain. A self-confident Herman Goring thought that it would be only a matter of weeks before his planes had forced Britain to surrender. The courage, resourcefulness and brilliant organisation of the RAF were to prove him wrong. By late September 1940, the RAF had proved invincible, thanks to the Vickers Supermarine Spitfire. It exceeded anything that any other air force possessed. RJ Mitchell, a shy and almost painfully modest engineer, was the genius behind the Spitfire. On the 5th March 1936, following its successful maiden flight, a legend was born. Prize-winning historian Leo McKinstry's vivid history of the Spitfire brings together a rich cast of characters and first hand testimonies. It is a tale full of drama and

heroism, of glory and tragedy, with the main protagonist the remarkable plane that played a crucial role in saving Britain.

Spitfire Alfred Price,2012-09-01 The narrative description and condensed history of the Spitfire's construction, combat career and post-war service, bought together to tell the complete, concise history of the world's most famous aircraft of all time and undoubtedly the finest fighter of World War 2. When Spitfire at War first appeared in 1974, it enjoyed critical acclaim, for the aircraft had never been described in such terms and detail before. It was followed by a second volume in 1985 and a third volume in 1990. All three volumes sold well and are hailed as classic works on the subject. These important works have been out of print for more than a decade, thereby denying them to the current breed of aviation buffs. The time has come to re-issue the three books as a single volume, the author 'cherry-picking' the choice cuts to produce the finest title on the mighty and beloved Spitfire.

The History of Dive Bombing Peter C. Smith,2007-11-13 The incredible story of the dive bomber is told through official reports and personal accounts from combat pilots in this sweeping military history. The History of Dive Bombing delves beneath the myths to present an in-depth history. Peter Smith tells the full story of these planes from the first true combat dive

bombing by a Royal Air Force pilot in 1917 to the last stirring wartime actions. Interviews with pilots from both World Wars representing all combatant nations give eyewitness viewpoints on many of the major actions and methods employed. From the first dive-bomber missions of World War II, through accounts of British attacks on German warships during the Norwegian campaign, and Stuka missions against the French and British forces, this volume vividly recreates the drama, strategy and tactics of dive bombing. Some well known aircraft types include, such as the Curtiss Helldiver, Aichi D3A1, Blackburn Skua, and the infamous Junkers Ju 87.

The Aeroplane ,1954

Spitfire Jeffrey Quill,2022-01-04 This is the personal account of an exceptional Spitfire test pilot and RAF and Fleet Air Arm fighter pilot. Starting with lively descriptions of the pre-war Airforce in the mid-1930s, Jeffrey Quill moves on to cover his fascination test flying experiences. He took charge of some of the most important military aircraft of the time and, in particular, the immortal Spitfire, from its experimental, prototype stage in 1936 when he worked with its chief designer, R.J. Mitchell, to the end of its production in 1948.

Dick Francis's Gamble Felix Francis,2011-07-26 One of the youngest winners of the Grand National, Nick "Foxy" Foxton suffered a near-fatal injury that cut short his career. Years later, he's out for a day at the Grand National races when his colleague, Herb Kovack, is shot at point-blank range right in front of him. Like the police, Nick

is baffled: Why would anyone kill such an apparently gentle soul? Then Nick finds a threatening note in the dead man's coat, and he begins to doubt how well he really knew his friend. And on discovering that Herb named him beneficiary in his will, Nick wonders why he's been entrusted with the legacy. Is this a generous gift from a friend, or is it, in fact, a poisoned chalice?
