

Vickers Wellington

Iain Murray

Vickers Wellington Units of Bomber Command Michael Napier, 2020-07-23 The Vickers Wellington was one of very few aircraft types to have been in production and frontline service throughout World War II, and more than 10,000 Wellingtons were built in the period. They took part in the first RAF bombing mission of the conflict when, on 4 September 1939, 14 examples from Nos 9 and 149 Sqns undertook a daring daylight attack on the Kiel Canal. However, after suffering high losses on follow-up raids, Wellingtons were withdrawn from daytime missions and began to operate at night from May 1940. They subsequently took part in raids against the Italian port city of Genoa in July 1940, and against Berlin the following month, followed by key missions in the 'Battle of the Barges' in September and October, as the RAF targeted the Germany's invasion fleet being assembled in French Channel ports. When RAF's strike force expanded the next year following the introduction of the improved Wellington II, the 21 squadrons equipped with the Vickers aircraft, which included Polish-, Canadian- and Australian-manned units, formed the backbone of the Bomber Command night bombing force. Over the next two years Wellingtons participated in all the major operations by Bomber Command, including the daylight raid against German battleships in Brest harbour in July 1942 and the first three 'Thousand Bomber' raids in the summer of 1942. This illustrated study explores the design, development, and deployment of the Vickers-Wellington type, charting its role in World War II from its earliest missions to its use in training after its withdrawal from frontline bomber missions in 1943. The text is supported by stunning full-colour artwork.

Wimpy Steve Bond, 2014-11-19 To date there has been a paucity of books on this remarkable aircraft. Among its claims to fame are the following: the only RAF bomber to serve in its original role from first day of war to last, and in every theater; the first type to bomb Germany; the first type to bomb Berlin; the first type to drop the 4,000lb 'Cookie' bomb; and so on. A serious study is well overdue, drawing not just on official documentation but relying greatly on personal accounts and anecdotes from the veterans who were there, both air and ground crew. And here it is. Through his diligent research over many years, author Steve Bond has produced an outstanding work. His coverage of operations will include, inter alia, the early bombing campaigns, the switch to main force activity, the use of OTU aircraft and crews on operations, the protection of Atlantic and Mediterranean convoys, service with the FAA and the French and the Wellington's continued use as bomber and transport aircraft. A worthy tribute, then, replete with original photographs throughout.

Vickers Wellington Philip Birtles, 2022-07-02 • The 'Wimpy' bore the brunt of the Bomber Command offensive against Germany, making up some 60 percent of the first 1,000 bomber raid on 30 May 1942 • Its robust and revolutionary construction devised by Barnes Wallis saved numerous aircraft and lives throughout night bombing raids • Beautifully illustrated with many rare and unpublished photographs • Of interest to aviation and military historians, modellers, gamers and flight simulator enthusiasts *Vickers Wellington* covers the design, development, production and operational service of the iconic Vickers Wellington from before the Second World War through to the 1950s. The aircraft and crews served with great distinction from the start to the end of the Second World War despite heavy losses. The aircraft was operated by Bomber Command until replaced by the bigger four-engine heavy bombers and played a major part in the Mediterranean Theatre. Its versatility was shown with maritime operations against the U-boat threat. It was also used for transport and the hazards of aircrew training. Its geodetic construction, developed from the airship era, made it rugged and capable of absorbing battle damage bring its crews home safely from combat over hostile territory. Illustrated with 211 images, this volume is the definitive history of one of Britain's most significant aircraft.

Vickers Wellington Manual Iain Murray, 2016-05-15 NEW IN PAPERBACK The twin-engine Vickers Wellington was one of the outstanding RAF bomber aircraft of the Second World War, as well as a capable maritime patrol aircraft and submarine hunter with Coastal Command. Centrepiece of this manual is Wellington Mk Ia, N2980, 'R' for Robert, one of only two surviving examples of the Wellington in the world and restored to display condition at the Brooklands Museum, Weybridge, Surrey. Iain Murray gives a fascinating insight into operating, flying and maintaining Barnes Wallis's

geodetic wonder with the help of many rarely seen photographs and technical illustrations.

The Wellington Bomber Story Martin W. Bowman,2011 The full story of the Wimpy, aka the Flying Cigar The Vickers Wellington was a twin-engine, long range medium bomber, used as a night bomber in the early years of World War II, and the only British bomber to be produced throughout the whole of the war. This colorful history combines narrative description and condensed history of construction, combat career, and postwar service to tell the complete, concise story of one of the world's most famous aircraft and one of the finest bombers of World War II. There are superlative photos of the Wimpy with detailed and expert captions and other material, and many accounts of the aircraft in service and in combat by the men who were there in all theaters around the world--Coastal Command, Bomber Command, and 2nd TAF, in Europe, the Mediterranean, and Asia.

Vickers Wellington Ron Mackay,2022-12-20 The Vickers Armstrong Wellington, affectionately dubbed the Wimpy after the hamburger-scoffing cartoon character, lays claim to two distinctions within RAF WWII annals. The first related to its geodetic structure, with a cloth covering that proved to be superior to previous designs for surviving battle damage. Second, the aircraft was destined to remain on the front line with Bomber Command throughout the entire course of the war. Whether serving as a first-generation bomber between 1939 and 1943, along with its Whitley and Hampden contemporaries, or on antisubmarine operations with Coastal Command, it proved to be a critical asset in applying steady inhibiting pressure on Axis Europe. Service as an aircrew trainer both during and following WWII was a secondary but very valuable function, as were latter-day duties with Transport Command. This book is a concise, visual history of this iconic RAF WWII bomber by noted aviation historian Ron Mackay.

The Wellington Bomber Martin W Bowman,2015-02-28 The Wellington Bomber was omnipresent during the Second World War, employed in a variety of contexts in the fight against the Axis powers. The pilots who flew this aircraft did so with an immense amount of pride, and there is perhaps no-one better placed to tell the story of this incredible aircraft than these men. Martin Bowman has drawn together a selection of first-hand pilot testimonies in an effort to record authentically the experience of flying the much-mythologised Wellington during one of the most challenging eras of aviation history. The book is supplemented by two plate sections of stirring black and white images.

Out of the Italian Night Maurice G. Lihou,2007-11-30 During 1944 and 1945 the squadrons of 205 Group were launching air attacks from bases in Italy. In many ways their efforts were the same as

those of aircrew attached to Bomber Command in Britain, yet conditions for the men were very different. The men fought their war as much against the weather, as against the enemy. The Wimpy, as the Wellington was affectionately known, had been operational when war was declared and five years on their young crews were still taking them into battle. Maurice Lihou joined the RAF in 1939, just before the outbreak of war. He trained as a wireless operator to become aircrew, but found himself working in ground stations. He decided to re-muster as a pilot and completed his training in Canada where he was awarded his wings. He soon became captain of an aircraft and ferried a Wellington to North Africa. He was then posted to Italy and joined No 37 Squadron, becoming involved in various operations to harass the retreating German army.

The Battle of Heligoland Bight 1939 Robin Holmes,2010-01-19 This illustrated history chronicles the first British bombing raid of WWII and the early lessons learned about strategic bombing. On the 4th of September 1939, Squadron Leader Paul Harris led 149 Squadron to Brunsbüttel, Wilhelmshaven in a Vickers Wellington Mk. 1 medium bomber. On the way he ordered that the guns of his airplane be tested, only to make the horrifying discovery that not one of them worked. Though he was flying completely defenseless, he chose to press on. On the 18th of December, Harris flew to Wilhelmshaven once again and took part in the Battle of Heligoland Bight, the first major encounter between the Royal Air Force and the Luftwaffe. This time he flew a Wellington Mk.1A—codenamed “R” for Robert—and his guns were red hot and ready. Of all the Wellington bombers that fought the Luftwaffe, Paul Harris’ old Wimpy is the only one left, preserved at the Brooklands Museum in Weybridge, England.

Wellington Squadrons in Focus Paul Freer,Simon Parry,2008-08-31 A visual history of the Wellington bomber, focussing on the squadrons that operated it rather than a nuts and bolts view of the aircraft.

Bombers over Sand and Snow Alun Granfield,2011-10-05 205 Group RAF provided the only mobile force of heavy night bombers in the Mediterranean theater in the Second World War. It operated mainly from bases in Egypt, Libya, Tunisia and Italy, with occasional excursions to Malta, Greece and Iraq, attacking tactical and strategic targets according to the demands of the wider war in the theater. The force was relatively small when compared with the numbers of aircraft available to Bomber Command in the Western European theater, and it carried on using the venerable Vickers Wellington long after this aircraft had been relegated to the training role in the United Kingdom. Like their UK-based counterparts the night bombers were intended to operate in a strategic role, bombing targets away from the immediate battlefield. However, the demands of the war in the Middle East and Mediterranean soon diverted the bombers from their strategic role and saw them operating much closer to the front line in support of the hard pressed ground forces. The bomber squadrons in North Africa usually operated from Advanced Landing Grounds scraped out of the bare desert, with only a few tents for shelter. In Italy they did have more or less permanent bases, but they still lived in tents

(if they were lucky) often surrounded by a sea of mud. There were no pubs, often no beer, and the only contact with their families were the eagerly awaited letters from home. Also the squadrons in England did not have Rommel continually knocking on their door. Thus, the operations of the night bombers in the Middle East and Mediterranean were often governed by the general progress of the war in the theater. The ebb and flow of the land battles not only determined the activities of the night bombers, but also determined their location. This book tells their story.

Alone I Fly Bill Bailey, 2010-03-10 The riveting firsthand account of an RAF pilot's adventures in World War II—from life-and-death situations to unusual posts that test his usual good humor. After several years at sea, Sgt Bill Bailey arrived in Cairo in 1942 as a new recruit to the RAF, hoping to fulfill his ambition to fly bombers. Within hours of his arrival he is sent on his first bombing mission as second pilot in a 104 Squadron Wellington. Hit by enemy gunfire, his aircraft suffered continual loss of altitude until hitting a rock outcrop and disintegrating. Bailey came to lying alone on a precipitous ledge and soon realized that he was the sole survivor. To stay alive in temperatures of over 100 degrees, he trudged over seemingly endless dunes at dusk and dawn, his energy gradually fading. Though he ultimately found shelter in an abandoned German reconnaissance truck, he gradually resigned himself to death. But with a last desperate inspiration Bailey realized that it might be possible to attract attention by heliograph. He found enough equipment in the truck and rigged a mast with the mirror at the top and commenced signaling, eventually being rescued by a Long Range Desert Patrol. After recuperation, Bailey rejoined his squadron and was given a new crew with whom he completed his tour. He was then sent to Malta where much to his amazement he was made ground controller of a satellite fighter airfield. This is Bailey's uniquely harrowing and humorous account of situations beyond his control—both in and out of the cockpit—during the Second World War.
