United States. Agricultural Research Service

Fruit Flies Martin Aluja,Pablo Liedo,2013-04-17 Fruit flies are enormously important economic pests, as California has learned over the past few years (remember the Mediterranean Fruit Fly?). The problem is expected to get worse, and issues of both basic research and control measures are very important for this pest. This book is the edited, camera-ready proceedings of a recent international symposium on fruit flies of economic importance. It covers current knowledge of fruit fly physiology, genetics, morphology and behavior. It discusses action programs for controlling and using fruit flies in agronomy, as well as the problem of fruit flies in the fruit growing industry.

*Management of Fruit Flies in the Americas* Flávio Roberto Mello Garcia,

*Biological Control of the Oriental Fruit Fly (Dacus Dorsalis Hendel) and Other Fruit Flies in Hawaii* Curtis Paul Clausen,Donald Washburn Clancy,Q. C. Chock,1965

*Trapping and the Detection, Control, and Regulation of Tephritid Fruit Flies* Todd Shelly,Nancy Epsky,Eric B. Jang,Jesus Reyes-Flores,Roger Vargas,2014-10-06 The book focuses on four broad topics related to trapping of agriculturally important tephritid fruit flies, namely i) lures and traps, ii) invasion biology and detection of infestations, iii) attract and kill systems, and iv) trade regulations and risk assessment. This comprehensive structure progresses from the biological interaction between insect and lures/traps to the area-wide use of trapping systems to the utilization and impact of trapping data on international trade. The chapters include accounts of earlier research but are not simply compendia and instead evaluate past and current work as a tool for critical analysis and proposal of productive avenues for future work. At present there is no book available that deals with fruit fly trapping in such a broad context. Our book fills this gap and serves as a global reference for both those interested in fruit flies specifically as well as anyone dealing with the threat of invasive agricultural insects in general.

**Fruit Fly Pests** Bruce A. McPherson,Gary J. Steck,2020-03-10 A book of national and international importance, Fruit Fly Pests is an exhaustive compendium of information (with data provided by more than 100 contributors) that will appeal to a wide variety of readers. With huge losses experienced annually from fruit fly devastation, information on these high-profile insects is important to commercial fruit and vegetable growers, marketing exporters, government regulatory agencies, and the scientific community. Fruit flies impose a considerable resource tax, and the ones who suffer range from shippers to end users. The demand for world-wide plant protection requires up-to-date research information. This book meets that need. This book contains the proceedings from the most recent International Symposium on Fruit Flies of Economic Importance. Here you will find the major presentations given at the symposium, with an added feature - overviews from experts on topics not covered directly by participants in the symposium, filling in gaps in the current literature. The resulting publication is the most up-to-date and readable text to be found anywhere on the subject of tephritids.

**The Fruit-maggot Fly** Walter Wilson Froggatt,1897

Fruit Flies of Economic Significance Ian M. White,Marlene M. Elson-Harris,1992 This book presents biosystematic information on fruit flies of the world that are of economic importance, and includes host data for about 250 species, as well as illustrated keys to adults, distribution data and recent references for over 100 of these species. In addition there is extensive coverage of larval stages, with the inclusion of keys separating the final instar larvae of over 60 species and detailed new descriptions of 34 of these species. As a whole, the book is a comprehensive identification guide to fruit fly

pests across many temperate regions and will be invaluable to entomologists and pest control specialists.

**Fruit Flies and the Sterile Insect Technique** Carrol O. Calkins,2019-07-23 This book is a continuation of the development of the Sterile Insect Technique (SIT) specifically designed for use against, and management of, fruit flies. Several factors indicate an increased use of the SIT against fruit flies within the next decade.

**The Currant Fruit Fly** Henry Herman Paul Severin,1917

*Fruit Flies (Tephritidae)* Martin Aluja,Allen Norrbom,1999-12-20 Fruit flies (Diptera: Tephritidae) are among the most destructive agricultural pests in the world, eating their way through acres and acres of citrus and other fruits at an alarming rate and forcing food and agriculture agencies to spend millions of dollars in control and management measures. But until now, the study of fruit flies has been traditionally biased towards applied aspects (e.g., management, monitoring, and mass rearing)-understandable, given the tremendous economic impact of this species. This work is the first that comprehensively addresses the study of the phylogeny and the evolution of fruit fly behavior. An international group of highly renowned scientists review the current state of knowledge and include considerable new findings on various aspects of fruit fly behavior, phylogeny and related subjects. In the past, the topics of phylogeny and evolution of behavior were barely addressed, and when so, often superficially. *Fruit Flies (Tephritidae): Phylogeny and Evolution of Behavior* is a definitive treatment, covering all behaviors in a broad range of tephritids. This volume is divided into eight sections:

*Area-Wide Management of Fruit Fly Pests* Diana Perez-Staples,Francisco Diaz-Fleischer,Pablo Montoya,Maria Teresa Vera,2019-11-22 Fruit fly (Diptera: Tephritidae) pests have a profound impact on horticultural production and economy of many countries. It is fundamental to understand their biology and evaluate methods for their suppression, containment, or eradication. *Area-Wide Management of Fruit Fly Pests* comprises contributions from scientists from around the world on several species of tephritids working on diverse subjects with a focus on area-wide management of these pests. The first three sections of the book explore aspects of the biology, ecology, physiology, behavior, taxonomy, and morphology of fruit flies. The next two sections provide evidence on the efficacy of attractants, risk assessment, quarantine, and post-harvest control methods. The fifth and sixth sections examine biological control methods such as the Sterile Insect Technique and the use of natural enemies of fruit flies. The seventh section focuses on area-wide integrated pest management and action programs. Finally, the eighth section examines social, economic, and policy issues of action programs aimed at involving the wider community in the control of these pests and facilitate the development of control programs. Features: Presents information on the biology of tephritid flies. Provides knowledge on the use of natural enemies of fruit flies for their biological control. Includes research results on models and diets used for the Sterile Insect Technique. Reports developments on the chemical ecology of fruit flies that contribute to make control methods more specific and efficient. Reviews subjects such as Holistic Pest Management and Area-Wide Management Programs including social, economic, and policy issues in various countries. *Guidance for Packing, Shipping, Holding and Release of Sterile Flies in Area-wide Fruit Fly Control Programmes* Walther Enkerlin,2007 There has

been little harmonisation of the processes involved in the handling and release of sterile insects after production in mass rearing facilities. There are no standard guidelines available to transfer this technology to FAO or IAEA member countries that want to embark on sterile insect technique (SIT) activities. There is also increased interest by the private sector in investing in sterile insect production and/or other SIT activities, and these harmonized guidelines on the post-production phase will facilitate SIT application and foster the commercialization of the SIT. This guideline resulted from two FAO/IAEA consultants' meetings with representatives of relevant SIT programmes, the first held in Sarasota, Florida, United States of America (April 2004) and the second in Vienna, Austria (August 2005). It has identified a number of gaps in knowledge as well as procedures that are often based on conventional wisdom but which need scientific verification or optimization.
