Grass Productivity: An Introduction to Rational Grazing Dr. Robert C. Worstell, Andre Voisin, 2015-01-13 SIMPLE questions often help us to understand problems better; and I think it indispensable, at the beginning of this work, to ask a question which appears simple in the extreme: What is grazing? The answer is generally as follows: Causing grass to be eaten by an animal. That is correct! But here is another answer which, to my mind, is more realistic: Causing the grass and the animal to meet. Since this book is almost exclusively concerned with grazing by cattle, I propose the following definition to the reader, requesting him to allow it to become well impressed upon his mind: Grazing is the meeting of cow and grass. It is by satisfying as far as possible the demands of both parties that we will arrive at a rational grazing, which will provide us with maximum productivity on the part of the grass while at the same time allowing the cow to give optimum performance. [From the Introduction]

André Lefebvre, and the Cars He Created at Voisin and Citroën Gijsbert-Paul Berk, 2011-11-01 Together with his colleagues at Citroën, Andre Lefebvre created the Traction Avant (1934), the TUB (1939) – Citroën's first front wheel drive utility van that was succeeded by the H and HY vans (1947) – the Deux Chevaux (1948), and, last but not least, the DS (1955). From 1923 to 1931 Lefebvre also designed several highly original and outstanding competition cars and record-breaking automobiles for Voisin. He even drove some these cars in races and record attempts. It is obvious that during his 16 years with Gabriel Voisin he was very much influenced by the ideas of this illustrious aviation pioneer and car manufacturer. The experience gained during that period gave him the self-confidence to persuade his successive bosses at Citroën that his unorthodox approach to automobile design was what the company needed; first he convinced André Citroën, later Pierre Michelin, then Pierre-Jules Boulanger, and finally Robert Puiseux and Pierre Bercot. His oeuvre for Citroën alone earns him a place of honour among the great automobile designers of the past century. The fact that most present-day cars still carry the DNA of his design philosophy makes him stand out above other automotive pioneers and innovators. That is why it is amazing that so little is known about this fascinating and brilliant engineer. This book was written in order to remedy that, and to pay tribute to André Lefebvre: the passionate pioneer who left car enthusiasts around the world such an important heritage.

Cajun Vocabulation Gordon J. Voisin, 2011-12-20 With each generation and with each passing day, we grow closer to losing a key part of our nation's unique heritage—the Cajun French language. Unless a concerted effort is made to preserve the language, this rich and vibrant culture will soon be relegated to the back pages of history. Cajun Vocabulation is one such labor of love—one man's attempt to preserve the unique heritage of his South Louisiana home. Cajun Vocabulation is a dictionary and pronunciation guide for one of the major dialects of Cajun French. Author Gordon J. Voisin interviewed more than one hundred native speakers in order to create this unique cultural artifact. He not only presents the basics of the language; he does so without sacrificing any of the zest and humor for which Cajuns are famous. The words are written phonetically, so even those with little knowledge of Cajun French will quickly learn to approximate its unique sound. Engage with a vital and colorful part of American heritage with Cajun Vocabulation.

In the Shadows of the Trade Winds Juliet Henry, 2006-12 Jean's accidental meeting with Marie has him thinking this daring lady with the green eyes is a lady of the night. His being twice her age does not stop the intrigued Marie from becoming attracted to the fisherman, who isn't afraid to come to her aid when she needs, although she knows what he thinks she is, one of those women. It isn't long before love blossoms and they marry. Their destiny takes them to his island in the sea, his Spanish Land Grant, where their short life together produces three children. Only one child survives to go on to carry on the family name. That child, Jean Joseph Voisin Jr., (JJ), is burdened early on in his life by the loss of his mother and his namesake Jean Voisin Sr. He is raised by his Aunt Mary's family. He later realizes, as he's embarking on manhood, life as a commercial fisherman and landowner on the island inherited from his father, would have no meaning without the love of his life, his aunt Mary's daughter, Amelie. The Shadow of the Trade Winds backdrop is one of the barrier islands of South Louisiana in the Gulf of Mexico.

The Cow and Her Grass: Rational Grazing - A Manual of Grass Productivity Andre Voisin, A. Lecomte, 2014-12-02 This book by Messrs Voisin and Lecomte comes at the right moment. It is a synthesis of M. Voisin's important study, Grass Productivity. This manual presents the chief ideas of two specialists. Since they are also excellent practitioners, they have applied these ideas before recommending them. Their evocative picture of 'the meeting of cow and grass' poses the true problem of the management of grazed grass. For the farmer, the production of meat and milk is an act of industrial conversion. The 'machine' is the animal that converts raw vegetable matter into finished food products which are rich in calories and easy to assimilate. This 'machine' is complex because it is a living being; it can be improved--within limits. But its yield depends basically on the quality of the raw materials offered to it for conversion. I hope that their words will be heard and followed. [From the Introduction]

August Euler, the Voisin Airplane and the Comte De Martina Matt McGrath, 2022-06-09 August Euler was a celebrated pilot at the dawn of modern aviation. He ran an aircraft factory in Germany and completed some daring solo flights. Industrial spies were commonplace in the early 20th century in Europe and August was plagued by Comte de Martina and the mysterious boss from Alsace. The spies will stop at nothing to destroy August's factory and put an end to German aviation.

America the Beautiful and Violent Dexter R. Voisin, 2019-08-06 Widespread media narratives portray an epidemic of neighborhood violence in urban areas—often ignoring the structural explanations advanced by community organizers fighting violence and activists such as those in the Movement for Black Lives. In this book, Dexter R. Voisin provides a compelling and social-justice-oriented analysis of current trends in neighborhood violence in light of the historical and structural factors that have reproduced entrenched patterns of racial and economic inequality. America the Beautiful and Violent is built around the powerful voices and insights of black youth in Chicago and their parents and communities. Voisin interweaves their narratives with data, research findings, and historical accounts that provide context for their experiences. He highlights the broad historical, political, economic, and racial factors that shape the construction, concentration, and narratives of violence in black neighborhoods. Voisin explores these forces and the violence they produce; the behavioral health consequences of repeated exposures to neighborhood violence; and the ways youth, families, and communities cope with such traumas. America the Beautiful and Violent offers a set of practice and policy recommendations to address the patchwork inequality that leads to concentrated violence and to support children and adolescents struggling with the precarious conditions and threat of violence in their daily lives.

Mirror Symmetry Claire Voisin, 1999 This is the English translation of Professor Voisin's book reflecting the discovery of the mirror symmetry phenomenon. The first chapter is devoted to the geometry of Calabi-Yau manifolds, and the second describes, as motivation, the ideas from quantum field theory that led to the discovery of mirror symmetry. The other chapters deal with more specialized aspects of the subject: the work of Candelas, de la Ossa, Greene, and Parkes, based on the fact that under the mirror symmetry hypothesis, the variation of Hodge structure of a Calabi-Yau threefold determines the Gromov-Witten invariants of its mirror; Batyrev's construction, which exhibits the mirror symmetry phenomenon between hypersurfaces of toric Fano varieties, after a

combinatorial classification of the latter; the mathematical construction of the Gromov-Witten potential, and the proof of its crucial property (that it satisfies the WDVV equation), which makes it possible to construct a flat connection underlying a variation of Hodge structure in the Calabi-Yau case. The book concludes with the first naive Givental computation, which is a mysterious mathematical justification of the computation of Candelas, et al.

Soil, Grass, and Cancer André Voisin,1999 Almost a half-century ago, André Voisin had already grasped the importance of elements of the soil and their effects on plants, and ultimately, animal and human life. He saw the hidden danger in the gross oversimplification of fertilization practices that use harsh chemicals and ignore the delicate balance of trace minerals and nutrients in the soil. In this volume Voisin issues a call to stand up and acknowledge our responsibilities for public health and protective medicine à part of a concerted attempt to remove the causes of ill health, disease and, in particular, cancer.

All Together Now Gail Voisin,2011-03-14 Achieving outstanding personal and organizational success in our busy, chaotic world requires a leading-edge set of skills for 21st-century executives and leaders. All Together Now teaches executives and leaders to align the three key areas of Vision, Leadership, and Wellness to measure and sustain high performance levels.

Hodge Theory and Complex Algebraic Geometry I: Claire Voisin,2007-12-20 This is a modern introduction to Kaehlerian geometry and Hodge structure. Coverage begins with variables, complex manifolds, holomorphic vector bundles, sheaves and cohomology theory (with the latter being treated in a more theoretical way than is usual in geometry). The book culminates with the Hodge decomposition theorem. In between, the author proves the Kaehler identities, which leads to the hard Lefschetz theorem and the Hodge index theorem. The second part of the book investigates the meaning of these results in several directions.

La Voisin Mary O'Ferrall,2003-01-01 The signs at the time of her birth - the blackness covering the sun and the reluctance of a fortune-teller to comment on the fate of the infant Athenais - were to be of a significance discernible later in the young girl's life. Sent to assume her position

Character Kings Scott Voisin,Daniel Roebuck,2009-05 Forget the big names. Scott Voisin's outstanding book tells the story of the true Hollywood stars of today. The guys who are the heart, backbone and guts of the movies. --- Bob Murawski, film editor, Spider-Man 1, 2 & 3, Drag Me to Hell Character actors have always been the backbone of the film and TV industry. Now you can learn who some of the best are and what they've done. A great read and excellent permanent reference.

Hexamiles (Mont-Voisin). Batia Suter ,2019 This volume is published on the occasion of Batia Suter's exhibition at the Mauvoisin Dam in Switzerland. Suter focuses on her ever-expanding archive of scanned landscape images, which has already played an important role in her earlier publications. Many of the images depict wastelands, alternating between romantic and menacing views which create simultaneous sensations of majesty and disorientation. Through layering, a variety of disparate geological and biological environments merge into composite, dreamlike landscapes in a kind of adventurous journey. The book's title is derived from the term 'Hexameter', a poetic form of writing used in Homer's 'Odyssey'. 00Exhibition: Musée de Bagnes & Mauvoisin Dam, Verbier, Switzerland (15.06.-29.09.2019).

Complex Geometry Daniel Huybrechts,2005 Easily accessible Includes recent developments Assumes very little knowledge of differentiable manifolds and functional analysis Particular emphasis on topics related to mirror symmetry (SUSY, Kaehler-Einstein metrics, Tian-Todorov lemma)

Contraception Research for Today and the Nineties G.P. Talwar,2012-12-06 The twentieth century will close with 5 billion people added to the current global population. Between 1980 and the year 2000, the total world population will increase from 4 billion to over 6 billion. There will be half as many more people on earth during these 20 years than the number accumulated since the origin of man to 1980. Overpopulation is particularly acute in economically developing countries, where contraception has become a social necessity. Contraception Research for Today and the Nineties carries the proceedings of an international symposium convened in New Delhi in October, 1986, to review the status of current research in contraception. Major organizations supporting basic and applied research in contraception-The Population Council, World Health Organization (WHO), The Rockefeller Foundation, United States Agency for International Development (USAID), International Development Research Center of Canada (IDRC), National Institutes of Health (NIH), and the Indian Council of Medical Research (ICMR)- were represented by the heads of divisions who projected respective programs and strategies. Principal scientists responsible for many of the new leads participated.

From the Voisin to the Mirage Amaru Tincopa Gallegos,2016-01-19 From the very beginning of aviation in South America, French aircraft and aviators played a major part in the development of military flying in Peru. This exciting new book covers the use of French aircraft and the involvement of French designers, instructors and military thinking in the development of the Peruvian air force. From stick and string biplanes through to supersonic jets, many of the most significant French types saw service in Peru and were involved in local conflicts, as detailed in this book. Profusely illustrated with many rare photos and color profiles of selected aircraft in Peruvian markings
