## **Syntactic Structures and Morphological**

**Information** Uwe Junghanns, Luka Szucsich, 2011-11-21

The book contains ten papers discussing issues of the relation between syntax and morphology from the perspective of morphologically rich languages including, among others, Indo-European languages, indigenous languages of the Americas, Turkish, and Hungarian. The overall question discussed in this book is to what extent morphological information shows up in syntactic structures and how this information is represented. The authors adopt different theoretical frameworks such as the Derivational Theory of Morphology, Distributed Optimality, Head-driven Phrase Structure Grammar, Lexical-Functional Grammar, Lexical Decomposition Grammar combined with Linking Theory and OT-like constraints, Paradigm-Based Morphosyntax as well as the Principles and Parameters Approach of Generative Grammar.

## **Pattern Recognition and Classification in Time**

**Series Data** Volna, Eva, Kotyrba, Martin, Janosek, Michal, 2016-07-22

Patterns can be any number of items that occur repeatedly, whether in the behaviour of animals, humans, traffic, or even in the appearance of a design. As technologies continue to advance, recognizing, mimicking, and responding to all types of patterns becomes more precise. Pattern Recognition and Classification in Time Series Data focuses on intelligent methods and techniques for recognizing and storing dynamic patterns. Emphasizing topics related to artificial intelligence, pattern management, and algorithm development, in addition to practical examples and

applications, this publication is an essential reference source for graduate students, researchers, and professionals in a variety of computer-related disciplines.

**Membrane Computing for Distributed Control of Robotic Swarms: Emerging Research and Opportunities**

Florea, Andrei George, Buiu, C?t?lin, 2017-03-10 Developments in bio-inspired computation have impacted multiple fields and created opportunities for new applications. In recent years, these techniques have been increasingly integrated into robotic systems. *Membrane Computing for Distributed Control of Robotic Swarms: Emerging Research and Opportunities* is an innovative reference source for the latest perspectives on biologically-inspired computation techniques for robot design and control. Highlighting a range of pivotal topics such as software engineering, simulation tools, and robotic security, this book is ideally designed for researchers, academics, students, and practitioners interested in the role of membrane computing in mobile robots.

*Intelligent Information and Database Systems*  
Ngoc Thanh Nguyen, Kietikul Jearanaitanakij, Ali

Selamat, Bogdan Trawiński, Suphamit Chittayasothorn, 2020-03-03 The two-volume set LNAI 12033 and 11034 constitutes the refereed proceedings of the 12th Asian Conference on Intelligent Information and Database Systems, ACIIDS 2020, held in Phuket, Thailand, in March 2020. The total of 105 full papers accepted for publication in these proceedings were carefully reviewed and selected from 285 submissions. The papers of the first volume are organized in the following topical sections: Knowledge Engineering and Semantic Web, Natural Language Processing, Decision Support and Control Systems, Computer Vision Techniques, Machine Learning and Data Mining, Deep Learning Models, Advanced Data Mining Techniques and Applications, Multiple Model Approach to Machine Learning. The papers of the second volume are divided into these topical sections: Application of Intelligent Methods to Constrained Problems, Automated Reasoning with Applications in Intelligent Systems, Current Trends in Artificial Intelligence, Optimization, Learning, and Decision-Making in Bioinformatics and Bioengineering, Computer Vision and Intelligent Systems, Data Modelling and Processing for Industry 4.0, Intelligent Applications of Internet of Things and Data Analysis Technologies, Intelligent and Contextual Systems, Intelligent Systems and Algorithms in Information Sciences, Intelligent Supply Chains and e-Commerce, Privacy, Security and Trust in Artificial Intelligence, Interactive Analysis of Image, Video and Motion Data in Life Sciences.

The Rebirth of the Russian Space Program Brian

Harvey,2007-05-10 This, fifty years after Sputnik, is the definitive book on the Russian space program. The author covers all the key elements of the current Russian space program, including both manned and unmanned missions. He examines the various types of unmanned applications programs as well as the crucial military program, and even analyzes the infrastructure of production, launch centres and tracking. You'll also find discussion of the commercialization of the program and its relationship with western companies. Russia's current space experiment is also put in a comparative global context. Strong emphasis is placed on Russia's future space intentions and on new programs and missions in prospect.

Advances in Bioinformatics, Multimedia, and Electronics Circuits and Signals Lakhmi C. Jain,Maria Virvou,Vincenzo Piuri,Valentina E. Balas,2019-10-30 The book features selected high-quality papers presented in International Conference on Computing, Power and Communication Technologies 2019 (GUCON 2019), organized by Galgotias University, India, in September 2019. Discussing in detail topics related to electronics devices, circuits and systems; signal processing; and bioinformatics, multimedia and machine learning, the papers in this book provide interesting reading for researchers, engineers, and students.

ETHNOS AND GLOBALIZATION: Ethnocultural Mechanisms of Disintegration of Contemporary Nations. Monograph A. Safonov,A. Orlov,2018-04-28

This monograph is devoted to one of the main problems of globalization – ethnocultural disintegration of society and the crisis of the contemporary nation. To explain the growth of ethnocultural differentiation in the context of globalization, an original concept of ethnos and nation genesis is proposed, in which the ethnos and the nation are viewed as different social communities in genesis, dynamics and functions, in which the individual participates simultaneously.

**Understanding and Managing Urban Water in Transition** Quentin Grafton,Katherine A.

Daniell,Céline Nauges,Jean-Daniel Rinaudo,Noel Wai Wah Chan,2015-05-06 This book examines changes and transitions in the way water is managed in urban environments. This book originated from a joint French-Australian initiative on water and land management held in Montpellier, France. The book delivers practical insights into urban water management. It links scientific insights of researchers with the practical experiences of urban water practitioners to understand and respond to key trends in how urban water is supplied, treated and consumed. The 51 contributors to the volume provide a range of insights, case studies, summaries and analyses of urban water and from a global perspective. The first section on water supply and sanitation

includes case studies from Zimbabwe, France and South Africa, among others. Water demand and water economics are addressed in the second section of the book, with chapters on long-term water demand forecasting, the social determinants of water consumption in Australian cities, a study of water quality and consumption in France, governance and regulation of the urban water sector and more. The third section explores water governance and integrated management, with chapters on water management in Quebec, in the Rotterdam-Rijnmond urban area, in Singapore and in Australia. The final section offers perspectives on challenges and future uncertainties for urban water systems in transition. Collectively, the diverse insights provide an important step forward in response to the challenges of sustainably delivering water safely, efficiently and equitably.

**Experience-Based Human-Computer Interactions: Emerging Research and Opportunities** Sosnin, Petr, 2017-10-31 Human computer interaction is constantly evolving in many areas and facets of modern society. Analyzing these interactions can provide a more balanced understanding of these technological advances as they pertain to people's lives. Experience-Based Human-Computer Interactions: Emerging Research and Opportunities is a pivotal reference source that provides in-depth discussions on the progression and contemporary applications of human computer interaction. Highlighting relevant topic areas such as semantic support, software intensive systems, ontology applications, and conceptual objects, this publication is ideal for engineers, academicians, students, and researchers that would like to attain more information on recent advances being made to bridge the gap between human and computer interactions.

Enhancing Software Fault Prediction With Machine Learning: Emerging Research and Opportunities Rashid, Ekbal, 2017-09-13 Software development and design is an intricate and complex process that requires a multitude of steps to ultimately create

a quality product. One crucial aspect of this process is minimizing potential errors through software fault prediction. Enhancing Software Fault Prediction With Machine Learning: Emerging Research and Opportunities is an innovative source of material on the latest advances and strategies for software quality prediction. Including a range of pivotal topics such as case-based reasoning, rate of improvement, and expert systems, this book is an ideal reference source for engineers, researchers, academics, students, professionals, and practitioners interested in novel developments in software design and analysis.
