Volvo, MCV David Barrow,2024-05-30 In 2022, Volvo Bus UK celebrated fifty years of trading in the UK and Ireland. The first right-hand drive B58 chassis arrived on these shores at the end of 1971. The double deck front engine Ailsa came in 1973. Over the next fifty years, the various different models have been upgraded, redesigned, lengthened and fitted with bigger more powerful engines. And now, in 2023, Volvo electric single and double deck models are beginning to appear on UK roads. Volvo Bus is a subsidiary of the Swedish Vehicle builder Volvo AB, with a global presence worldwide. MCV is based in Salheya in Egypt. It was established in 1994 and has the capacity to build up to 6,000 buses and coaches per annum, with up to 5,000 employees. MCV and Volvo are collaborating in the development and building of the electric bus for the UK marketplace.

Volvo Busses Jean Christer Olsson,2002-05 The Swedish company known worldwide for its rock-solid automobiles also has a reputation for building dependable and innovative buses. This well-illustrated volume tells the detailed story of all of Volvo's various bus models, from the early truck-based models to today's ultramodern intercity coaches. Learn about the development of the unique, forward-control LV75 of 1934, and the sensational mid-engine B655 of 1951, with its revolutionary air brakes and power steering. Volvo's latest, super-advanced TX-platform coaches are introduced, and you'll see photos from the Hallered test track facility and the various factory assembly lines. The 'Made in Germany' Champion Brands Ugesh A. Joseph,2016-03-09 Germany's economic miracle is a widely-known phenomenon, and the world-leading, innovative products and services associated with German companies are something that others seek to imitate. In The 'Made in Germany' Champion Brands, Ugesh A. Joseph provides an extensively researched, insightful look at over 200 of Germany's best brands to see what they stand for, what has made them what they are today, and what might be transferable. The way Germany is branded as a nation carries across into the branding of its companies and services, particularly the global superstar brands - truly world-class in size, performance and reputation. Just as important are the medium-sized and small enterprises, known as the 'Mittelstand'. These innovative and successful enterprises from a wide range of industries and product / service categories are amongst the World market leaders in their own niche and play a huge part in making Germany what it is today. The book also focuses on German industrial entrepreneurship and a selection of innovative and emergent stars. All these companies are supported and encouraged by a sophisticated infrastructure of facilitators, influencers and enhancers - the research, industry, trade and standards organizations, the fairs and exhibitions and all the social and cultural factors that influence, enhance and add positive value to the country's image. Professionals or academics interested in business; entrepreneurship; branding and marketing; product or service development; international trade and business development policy, will find fascinating insights in this book; while those with an interest in Germany from emerging industrial economies will learn something of the secrets of German success.

The Innovative Bureaucracy Alexander Styhre,2007-03-06 Highly original and based on unique empirical research in the fields of organization theory and organization behaviour, this work makes an invaluable contribution to the literature on bureaucracy and innovation. Focusing on a study of two major companies working with innovation and new product development Styhre's critical analysis pushes the boundaries of bureaucracy studies beyond its current entrenched position. Departing from the traditional view that bureaucratic organizations are inefficient, incapable of responding to external changes, unable to orchestrate innovative work and provide meaningful jobs for its co-workers, this empirical study underlines the merits of a functional organization, the presence of specialist and expertise groups and hierarchical structures. Analyzing the literature of bureaucracy, the new forms of post-bureaucratic organizations and drawing on the philosophy of Henri Bergson, the author offers a model of bureaucracy, capable of both apprehending its functional organization and its continuous and ongoing modifications and changes to adapt to external conditions. Innovative and compelling, this book is an excellent text for advanced students of organization and management theory and managerial strategists and decision-makers across the globe.

High-Performance Government Robert Klitgaard,Paul C. Light,John Dumond,2005-03-24 In 2003, the National Commission on the Public Service, chaired by Paul Volcker, issued a report detailing problems within the federal government today and recommending changes in its organization, leadership, and operations. This book suggests practical ways to implement the recommendations and defines a research agenda for the future. Thirteen essays address the primary problem areas identified by the Volcker Commission, and the commission report itself is included.
