**Vought F4U Corsair** James D'Angina, 2014-11-20 With over 12,500 produced, the Vought F4U Corsair is one of the icons of mid-20th century military aviation. It was as a Marine Corps aircraft that the Corsair was to become famous, fighting through World War II and Korea. Able to outperform its contemporaries, notably the A6M Zero, the Corsair combined speed, resilience and firepower. It also served in Indochina and Algeria, and in 1969's 'Soccer War' between Honduras and El Salvador, Corsairs were flown by both sides and fought the last propeller-aircraft dogfights in history. This highly illustrated volume recounts the design and development history of one of the most iconic fighters in military aviation history.

**Vought F4U Corsair** Barrett Tillman, 1996 Concentrating on the Vought F-4 U Corsair, this is one of a series which provides a layman's technical analysis and review of some of the world's most exciting combat aircraft. Special emphasis is placed on the unique performance aspects of each aircraft.

**The Vought F4U Corsair** Martin W. Bowman, 2019-12-27 This fully illustrated history of the iconic American fighter plane examines its development and combat experience through WWII and beyond. First flown in 1940, the Vought F4U Corsair was the fastest fighter in the world and the fastest US aircraft of any description. Powered by a huge 18-cylinder Pratt and Whitney Double Wasp engine, the first Corsairs were capable of speeds up to 417 miles per hour. This figure would rise to nearly 450mph in later versions. The F4U entered service with the US Navy in September 1942 and over time was extensively used by the US Marines, Royal Navy and Royal New Zealand Air Force. Famous squadrons that flew these planes—like VMF-214 'The Black Sheep' and

VF-17 'Jolly Rogers'—maintained their superiority over the Japanese for the rest of the war. After the Second World War the Corsair was used with distinction by the French in Indo-China and again by the US Navy in Korea. Since then, Corsairs have remained a favorite among warbird enthusiasts the world over. This comprehensive book examines the engineering of the Corsairs alongside a detailed history of their development and usage in combat. Illustrated with scores of rare and previously unpublished photographs, Vought F4U Corsair is the perfect book for any fan of the 'bent wing bird'.

**The Men Who Flew the Vought F4U Corsair** Martin W. Bowman, 2021-09-01 First flown in 1940, the prototype Vought F4U Corsair instantly became the fastest fighter in the world and the fastest US aircraft of any description. Powered by a huge 18-cylinder Pratt and Whitney Double Wasp engine driving an enormous 13 feet 4 inch propeller, the first Corsairs were capable of 417mph. This figure would rise to nearly 450mph in later versions despite the fact that fuel load and overall weight was increased. Production began in 1941, not only by Vought but also by Goodyear and Brewster. The F4U entered service with the US Navy in September 1942, although carrier-borne operations were initiated a little later not by the Americans but by the British Fleet Air Arm. The aircraft subsequently came to be extensively used from land and sea by the US Marines, Royal Navy, and Royal New Zealand Air Force. Famous squadrons like VMF-214 'The Black Sheep' and VF-17 'Jolly Rogers', along with many others, maintained total ascendancy over the Japanese for the rest of the war - a remarkable achievement for a single type. After the Second World War, the Corsair stayed in production and was used with distinction by the French in Indo-China and again by the US Navy in Korea. Since then, Corsairs have achieved

significant success in air races and more and more are being restored to fly for museums and warbird enthusiasts the world over. Martin Bowman's comprehensive new book combines technical information and detailed development history with a fascinating combat history told, in many cases, by the Second World War pilots themselves. Well researched, readable, and illustrated with dozens of rare and previously unpublished photographs, *The Men Who Flew the Vought F4U Corsair* is the perfect book for any fan of the 'bent wing bird'.

*Vought F4u Corsair: Volume 2* Tomasz Szlagor, Leszek Wieliczko, 2014-10-19 The second volume carries on the story of the F4U Corsair by examining its development and operational service in later stages of the World War Two. By early 1944 the Corsair well proved its worth in combat. Finally qualified for carrier operations, it began to challenge the Hellcat's status of the US Navy's primary fighter aircraft. The F4U-1D, capable of carrying nearly a ton of bombs and eight rocket missiles, excelled both in aerial combat and ground attacks. Its fighter-bomber capabilities were put to good use during the little-known campaigns in the Marshalls, Marianas and Palau Islands, as well as in the Philippines, which are related here in unparalleled detail. Much attention is dedicated to the initial deployment of the Corsair (both night and day fighters) aboard US Navy carriers, spanning the period between February 1944 and March 1945, which culminated in the first raids against Japan. Meanwhile, Vought and Goodyear engineers continued to improve and refine the Corsair. New, more powerful engines enabled them to develop two more versions before the war's end - the ultimate Corsair (Vought F4U-4) and the Super Corsair (Goodyear F2G-1/2). Their story is related in the opening chapter. A separate chapter is devoted to camouflage and markings of British and New

Zealand's Corsairs, with a brief resume of the aircraft's service in the two air forces. The book is further supplemented by numerous data in tabular form, color profiles of five representative aircraft and 1/48 scale drawings of various versions.

**Corsair** David Doyle, 2018 The F4U Corsair, designed by Vought and produced by that firm, as well as, Goodyear and Brewster Aeronautical Corporation, would not only rack up an impressive 11:1 kill ratio against its foes in WWII, but go on to serve through the Korean War as well. The iconic inverted gull wing of the aircraft, along with its distinctive whistling sound made the Corsair unmistakable to friend and foe alike. The Corsair was remarkable not only in serving the US Navy and Marine Corps in two wars, but also remaining in production through 1952. The Corsair was also the mount of some of the nation's most distinguished aces, including Gregory Pappy Boyington, Ken Walsh, and Tom Blackburn. Through carefully researched photos, many of

which have never before been published and which are reproduced in remarkable clarity, the history and details of this iconic aircraft are revealed. Part of the Legends of Warfare series.

*Modelling the F4U Corsair* Brett Green, 2012-02-20 The F4U Corsair's combat career was longer than that of almost any other World War II fighter aircraft. Its success led to its service around the globe, and it was employed by the US Navy, British Fleet Air Arm and the Royal New Zealand Air Force. After the war, the Corsair also served with the French Navy, in various Latin American Air Forces, and with forces fighting in Korea. This book showcases seven separate Corsair variants modelled across 1/32, 1/48 and 1/72 scales. Among the aircraft featured are an F4U-1 Birdcage, an F4U-1A from VF-17 'Jolly Rogers', a Fleet Air Arm Corsair Mk.II, a Korean War F4U-4 and an F4U-7 French Corsair.

Chance Vought F4u Corsair Maciej Noszczak, 2019-04-19 The enormous war demand for all kinds of armaments, including fighters, caused the Vought factory to be overloaded with production. Therefore, it was extended to Brewster and Goodyear factories, where the production of F4U fighters began. Ultimately, 12,500 Corsairs were built in 16 different variants. The first production version of the Corsair - F4U-1 - had a characteristic built-in fairing cabin, so-called birdcage, which also forced to lower the position

of the pilot's seat. There were many visible changes compared to the XF4U-1 prototype. First of all, the cockpit was moved 81 cm to the rear due to the installation of a much larger fuel tank in front of the cabin. The whole fuselage was then extended by 43 cm. Cockpit armor and a bulletproof windshield were also used. To improve visibility from the cabin, a windows behind the pilot's headboard were added on both sides. The F4U-1 version was powered by the Pratt & Whitney R-2800-8 twin wasp engine. Another variant was the F4U-1A, in which more or less from mid to the end of the production a higher and wider canopies were used - very similar to the British Malcolm hood. The pilot's seat was raised by 18 cm, which in addition with a new canopy and lengthening the tailwheel leg by 15 cm improved the visibility from the cockpit over the enormous nose of the machine. An important improvement was the introduction of much better oil shock absorbers on the main undercarriage, which eliminated the problem of kangaroos during landings. This had a considerable impact on Corsair service on board of aircraft carriers.
