David Doyle

**Vought F4U Corsair** Barrett Tillman,1996 Concentrating on the Vought F-4 U Corsair, this is one of a series which provides a layman's technical analysis and review of some of the world's most exciting combat aircraft. Special emphasis is placed on the unique performance aspects of each aircraft.

**The Vought F4U Corsair** Martin W. Bowman,2019-12-27 This fully illustrated history of the iconic American fighter plane examines its development and combat experience through WWII and beyond. First flown in 1940, the Vought F4U Corsair was the fastest fighter in the world and the fastest US aircraft of any description. Powered by a huge 18-cylinder Pratt and Whitney Double Wasp engine, the first Corsairs were capable of speeds up to 417 miles per hour. This figure would rise to nearly 450mph in later versions. The F4U entered service with the US Navy in September 1942 and over time was extensively used by the US Marines, Royal Navy and Royal New Zealand Air Force. Famous squadrons that flew these planes—like VMF-214 'The Black Sheep' and VF-17 'Jolly Rogers'—maintained their superiority over the Japanese for the rest of the war. After the Second World War the Corsair was used with distinction by the French in Indo-China and again by the US Navy in Korea. Since then, Corsairs have remained a favorite among warbird enthusiasts the world over. This comprehensive book examines the engineering of the Corsairs alongside a detailed history of their development and usage in combat. Illustrated with scores of rare and previously unpublished photographs, Vought F4U Corsair is the perfect book for any fan of the 'bent wing bird'.

**Vought F4U Corsair** James D'Angina,2014-11-20 With over 12,500 produced, the Vought F4U Corsair is one of the icons of mid-20th century military aviation. It was as a Marine Corps aircraft that the Corsair was to become famous, fighting through World War II and Korea. Able to outperform its contemporaries, notably the A6M Zero, the Corsair combined speed, resilience and firepower. It also served in Indochina and Algeria, and in 1969's 'Soccer War' between Honduras and El Salvador, Corsairs were flown by both sides and fought the last propeller-aircraft dogfights in history. This highly illustrated volume recounts the design and development history of one of the most iconic fighters in military aviation history.

The Men Who Flew the Vought F4U Corsair Martin W. Bowmen,2021-09-01 First flown in 1940, the prototype Vought F4U Corsair instantly became the fastest fighter in the world and the fastest US aircraft of any description. Powered by a huge 18-cylinder Pratt and Whitney Double Wasp engine driving an enormous 13 feet 4 inch propeller, the first Corsairs were capable of 417mph. This figure would rise to nearly 450mph in later versions despite the fact that fuel load and overall weight was increased. Production began in 1941, not only by Vought but also by Goodyear and Brewster. The F4U entered service with the US Navy in September 1942, although carrier-borne operations were initiated a little later not by the Americans but by the British Fleet Air Arm. The aircraft subsequently came to be extensively used from land and sea by the US Marines, Royal Navy, and Royal New Zealand Air Force. Famous squadrons like VMF-214 'The Black Sheep' and VF-17 'Jolly Rogers', along with many others, maintained total ascendancy over the Japanese for the rest of the war - a remarkable achievement for a single type. After the Second World War, the Corsair stayed in production and was used with distinction by the French in Indo-China and again by the US Navy in Korea. Since then, Corsairs have achieved significant success in air races and more and more are being restored to fly for museums and warbird enthusiasts the world over. Martin Bowman's comprehensive new book combines technical information and detailed development history with a fascinating combat history told, in many cases, by the Second World War pilots themselves. Well researched, readable, and illustrated with dozens of rare and previously unpublished photographs, The Men Who Flew the Vought F4U Corsair is the perfect book for any fan of the 'bent wing bird'.

**Vought F4u Corsair** Karoly Bear,Marcin Giepierski,Richard Kovalcik,2021-03-23 In February 1938, the United States Navy opened a competition for a new fighter. His maximum speed and operational ceiling were to exceed all the machines that the American aviation had at the time. Among others, the Chance Vought company entered the competition. The Corsair was designed by a team of engineers led by Rex Beisel, the company's chief constructor. The prototype XF4U-1 was flown on May 29, 1940. The Corsair was powered by an eighteen-cylinder Pratt & Whitney R-2800 Double Wasp. That was the largest and the most powerful radial engine ever installed in a single-seat front fighter.

**Corsair** David Doyle,2018 The F4U Corsair, designed by Vought and produced by that firm, as well as, Goodyear and Brewster Aeronautical Corporation, would not only rack up an impressive 11:1 kill ratio against its foes in WWII, but go on to serve through the Korean War as well. The iconic inverted gull wing of the aircraft, along with its distinctive whistling sound made the Corsair unmistakable to friend and foe alike. The Corsair was remarkable not only in serving the US Navy and Marine Corps in two wars, but also remaining in production through 1952. The Corsair was also the mount of some of the nation's most distinguished aces, including Gregory Pappy Boyington, Ken Walsh, and Tom Blackburn. Through carefully researched photos, many of which have never before been published and which are reproduced in remarkable clarity, the history and details of this iconic aircraft are revealed. Part of the Legends of Warfare series.

**Chance Vought F4u Corsair** Maciej Noszczak,2019-04-19 The enormous war demand for all kinds of armaments, including fighters, caused the Vought factory to be overloaded with production. Therefore, it was extended to Brewster and Goodyear factories, where the production of F4U fighters began. Ultimately, 12,500 Corsairs were built in 16 different variants.The first production version of the Corsair - F4U-1 - had a characteristic built-in fairing cabin, so-called birdcage, which also forced to lower the position of the pilot's seat. There were many visible changes compared to the XF4U-1 prototype. First of all, the cockpit was moved 81 cm to the rear due to the installation of a much larger fuel tank in front of the cabin. The whole fuselage was then extended by 43 cm. Cockpit armor and a bulletproof windshield were also used. To improve visibility from the cabin, a windows behind the pilot's headboard were added on both sides. The F4U-1 version was powered by the

Pratt & Whitney R-2800-8 twin wasp engine. Another variant was the F4U-1A, in which more or less from mid to the end of the production a higher and wider canopies were used - very similar to the British Malcolm hood. The pilot's seat was raised by 18 cm, which in addition with a new canopy and lengthening the tailwheel leg by 15 cm improved the visibility from the cockpit over the enormous nose of the machine. An important improvement was the introduction of much better oil shock absorbers on the main undercarriage, which eliminated the problem of kangaroos during landings. This had a considerable impact on Corsair service on board of aircraft carriers.

**Vought F4u Corsair-Wbt Vol. 4** Barrett Tillman, 1996-07 The photos in this edition are black and white. Filled with vintage photos of Voughts legendary F4U Corsair from assembly line to flight line, plus exploded views, cutaway and phantom drawings from tech manuals, disassembled aircraft, rare variants and experimental models. Reveals a model-by-model technical evolution from the XF4U through the massive F2G. Filled with engine details, armaments and carrier modifications. WarbirdTech Volume 4.

**Chance Vought F4u Corsair** Andrzej R. Zbiegniewski, 2010-01-05 The second part of a monograph on F4U Corsair covers changes made in their late variants from F4U-1D to F4U-7 and their camouflage and markings. Each variant is specified and described. The book discusses the combat use of F4Us in FAA units, late U.S. Navy campaigns in the PT0 during WW2 and the battles against Soviet MiG-15s during the Korean War. The subsequent chapters are devoted to French use of Corsairs in Indochina and F4U's service in the Honduran and Salvadoran air forces during the Soccer War in 1969. The book includes technical data, lists of F4U squadrons as of September 1945, USMC & USN Corsair aces and many more. Free 1:48 and 1:72 decals for 7 schemes: F4U-1D, flown by 2/Lt. Marvin S. Bristow of VMF-224, Okinawa, May 1945. F4U-4 (BuNo 80715) of VF-82, USS Randolph (CV-15), 1946. F4U-5N (BuNo 124715), flown by Cpt. Fernando Soto Henriquez of the FAH, Honduras, Summer 1969. F4U-7 (BuNo 133657) of Flotille 14F Aeronavale, Cuers, France, October 1963. FG-1D (BuNo 88242), flown by Lt. Joseph P. Lynch of VMF-224, Okinawa, July 1945. Corsair Mk.II, flown by Lt. Cole of No. 1830 Sqn FAA, HMS Illustrious, April 1945. Corsair Mk.IV (KD748) of No. 1853 Sqn FAA, HMS Venerable, 1945. About the Series Monographs focuses on an individual type of aircraft. Each monograph contains descriptions of the aircraft's origin, its variants and combat history. Each volume includes several hundred archive photographs, technical scale drawings and color profile artwork. Each book also has free extras for modelers, with decals and masking foil.

**Vought F4u Corsair: Volume 2** Tomasz Szlagor, Leszek Wieliczko, 2014-10-19 The second volume carries on the story of the F4U Corsair by examining its development and operational service in later stages of the World War Two. By early 1944 the Corsair well proved its worth in combat. Finally qualified for carrier operations, it began to challenge the Hellcat's status of the US Navy's primary fighter aircraft. The F4U-1D, capable of carrying nearly a ton of bombs and eight rocket missiles, excelled both in aerial combat and ground attacks. It's fighter-bomber capabilities were put to good use during the little-known campaigns in the Marshalls, Marianas and Palau Islands, as well as in the Philippines, which are related here in unparalleled detail. Much attention is dedicated to the initial deployment of the Corsair (both night and day fighters) aboard US Navy carriers, spanning the period between February 1944 and March 1945, which culminated in the first raids against Japan. Meanwhile, Vought and Goodyear engineers continued to improve and refine the Corsair. New, more powerful engines enabled them to develop two more versions before the war's end - the ultimate Corsair (Vought F4U-4) and the Super Corsair (Goodyear F2G-1/2). Their story is related in the opening chapter. A separate chapter is devoted to camouflage and markings of British and New Zealand's Corsairs, with a brief resume of the aircraft's service in the two air forces. The book is further supplemented by numerous data in tabular form, color profiles of five representative aircraft and 1/48 scale drawings of various versions.

**Vought F4U Corsair** Rafe Morrissey, Joe Hegedus, 2010-11-01 The Vought F4U Corsair remains one of the most distinctive and popular aircraft of World War II. Its inverted gull wing design and the colourful characters of some of the aces who gained fame flying it in combat have added to its mystique.

**Vought F4u Corsair** Tomasz Szlagor, Leszek Wieliczko, 2013-10-19 Vought F4U Corsair was one of the best and most famous fighters of World War Two era. Developed since 1938, it didn't see serial production until mid-1942. Initially disqualified for carrier operations, it was handed over to land-based US Marine Corps fighter units. The first volume deals with the design and development phase from the XF4U-1 prototype through F4U-1, F4U-1A and F4U-1D models to F4U-2 night fighter version and the high-altitude XF4U-3 prototype. A separate chapter has been devoted to camouflage and markings of the Corsairs serving with the US Navy and US Marine Corps between 1942 and 1945. Another chapter, based on hundreds of pages from original war diaries of Marine squadrons operating Corsairs, details their operational service during the Solomons campaign and the aerial offensive against the Japanese fortress of Rabaul, covering the period between February 1943 and early 1944. It was in the South Pacific that Corsairs proved their worth and earned a well deserved fame.

**Profiles of Flight** Dave Windle, Martin Bowman, 2011-07-01 The Vought F4U was the best carrier based fighter of WW2. 12,571 aircraft were built and downed 2,140 enemy aircraft for the loss of only 189 Corsairs. It was developed early in 1938 for the US Navy. The designer, Tex Beisel, worked on the principle of the largest engine in the smallest airframe. Britain received 2012 of the type. This book contains the world famous color profiles created by Dave Windle of the type in different operational modes, configurations and color schemes. Martin Bowman has written detailed descriptions and photographs to create the perfect enthusiasts reference.

**An Aeronautical Engineer's View, the Vought F4U Corsair and Its Contemporaries** Thomas Brinkman, 2011

**Modelling the F4U Corsair** Brett Green, 2012-02-20 The F4U Corsair's combat career was longer than that of almost any other World War II fighter aircraft. Its success led to its service around the globe, and it was employed by the US Navy, British Fleet Air Arm and the Royal New Zealand Air Force. After the war, the Corsair also served with the French Navy, in various Latin American Air Forces, and with forces fighting in Korea. This book showcases seven separate Corsair variants modelled across 1/32, 1/48 and 1/72 scales. Among the aircraft featured are an F4U-1 Birdcage, an F4U-1A from VF-17 'Jolly Rogers', a Fleet Air Arm Corsair Mk.II, a Korean War

F4U-4 and an F4U-7 French Corsair.

**F4U Corsair vs Ki-84 “Frank”** Edward M. Young,2016-05-19 The Vought Corsair was the first American single-engined fighter to exceed 400 mph and establish dominance over the legendary Mitsubishi Type Zero-sen. The Ki-84 Hayate was introduced by the Japanese specifically to counter this growing American dominance of the skies over the Pacific. Built in greater numbers than any other late war Japanese fighter, nearly 3000 were completed between 1944 and 1945. This volume examines the clashes between the Corsair and Ki-84 in the closing stages of the war, revealing how Corsair pilots had to adapt their techniques and combat strategies to adapt to these newer types. It also reveals how the kill rate was largely driven by the reduced quality of fighter pilots after the high casualty rates inflicted on the Japanese air force during the air battles over the Solomon Islands.
