BattleTech: Grey Watch Protocol Michael J. Ciaravella,2020-06-26 SURROUNDED BY THE ENEMY… In the 32nd century, the Republic of the Sphere is beset on all sides, its enemies seeking the most important weapon in the Inner Sphere: interstellar communication. As the forces of the Capellan Confederation advance toward the heart of the crumbling Republic, they are laser-focused on the one goal that will give them the upper hand and destroy the Republic once and for all: the planet of Northwind. Homeworld of the famed Northwind Highlanders mercenaries, Northwind is not only the site of a century-old betrayal, it also boasts the only working hyperpulse generator along the line of the Confederation's advance. Sang-shao Lindsey Baxter and the Fourth McCarron's Armored Cavalry have been tasked with taking Northwind at all costs, and the besieged Republic is unable to lend further support to the defending XII Hastati Sentinels. Northwind will be easy pickings, and other sharks smell blood in the water. The Highlanders' honor remains strong, but will it be enough to survive the coming storm?

BattleTech: Redemption Rites Jason Schmetzer,2022-05-06 OUT FOR BLOOD… Wolf's Dragoons, the most storied and elite mercenary unit in the Inner Sphere, has been utterly shattered for the first time in its centuries-long history. In 3151, most of the Dragoons listened to Marotta Kerensky and followed Alaric Ward to Terra. There, they helped him destroy the Republic of the Sphere and establish the ilClan. Four out of five Dragoons died in the fighting. The survivors were injured, shell-shocked, and finally, gravely insulted by Alaric Ward's token payment of thirty pieces of silver. In one brutal gesture, the ilKhan did what no other enemy had ever done: He broke Wolf's Dragoons.

The decimated survivors limped off Terra to rendezvous with their remnants that had stayed behind. Colonel Henry "Hack" Kincaid, senior striker officer, is waiting when the Dragoons convoy appears, full of wrecked machines, but depleted of personnel. Kincaid is a man of reputation in the Dragoons. His word carries weight. And he hasn't been tarnished by Terra. Three regiments and one of his irreplaceable striker battalions have all been ground to dust. All that is left now is duty. And vengeance…

BattleTech: Hunting Season Philip A. Lee,2021-08-29 KNIVES IN THE DARK… Captain-General Jessica Marik is holding the reborn Free Worlds League together by the might of her indomitable will, and has managed to keep all of the interstellar nation's foes at bay. But even the strongest and most inspiring leaders have chinks in their armor. After a personal tragedy, Jessica vanishes from the public eye, leaving no hand on the tiller of the fractious nation as multiple hostile neighbors drag them into open warfare. Beset on all sides, the League must navigate the flames of war with no direction from the top, leaving Warden-General Nikol Marik, Jessica's youngest child, in control of the League's military forces at a time when the nation needs her mother's leadership the most. Nikol steps up to the challenge, however, as this is the moment she has been preparing for her entire life. But forces in the shadows seek to capitalize on the chaos and bring the Free Worlds League to its knees from within. The threat of coups and assassins sets the League on edge as Nikol strives to maintain the unity her mother had fought so hard to achieve, even if it means putting herself in danger. But she is not alone. At her right hand stands General Wilburn Kirkland, commander of the Ducal Guard, Jessica's personal bodyguard regiment. Together they must discover who the League's true enemies are, and hunt them

to the ends of the Inner Sphere if necessary...

BattleTech: A Splinter of Hope/The Anvil Blaine Lee Pardoe,Philip A. Lee,2019-02-12 VICTORY AT ANY COST… Jump into your BattleMech cockpit, fire up your fusion engine, and charge into the fray with two all-new BattleTech novellas from Philip A. Lee and bestselling writer Blaine Lee Pardoe. A Splinter of Hope: Violent expansion of the Capellan Confederation and the Draconis Combine has cost recently crowned First Prince Julian Davion both his mentor and countless Federated Suns worlds. To rally his people, he funnels the fires of justice into an ambitious yet risky campaign to retake a vital system: New Syrtis, the occupied capital of the Capellan March. However, the Capellan people have fought dearly for their prize and will do anything in their power to hold onto it. Will Julian's gamble preserve the future of the Federated Suns, or is the invasion doomed before it even begins? The Anvil: Khan Malvina Hazen of Clan Jade Falcon is known throughout the Inner Sphere as a merciless, bloodthirsty tyrant. The next target for her scorched-earth, take-no-prisoners tactics is the Lyran Commonwealth world of Coventry: a persistent stain on the Jade Falcons' history. But not all Falcons follow Malvina's lead. Ordered to take Coventry at any cost, Galaxy Commander Stephanie Chistu wishes to see her Clan victorious, but no victory is worth the Jade Falcons losing their very soul. To stand up to tyranny and find an honorable path forward for her Clan, she must balance the razor's edge between duty and honor—or die trying.

BattleTech: A Splinter of Hope Philip A. Lee, The Federated Suns stand at the edge of a precipice… Violent expansion of the Capellan Confederation and the Draconis Combine has cost recently crowned First Prince Julian Davion more than just countless strategic

worlds. The war's toll claimed a mentor and close friend, and righteous vengeance burns bright. To rally his people and preserve the future of the Federated Suns, Julian funnels the fires of justice into an ambitious yet risky campaign to retake a vital system: New Syrtis, the lost capital of the Capellan March. Success would dislodge an ancient enemy from their strategic foothold in Suns space, but failure may cost Julian the nation he inherited. However, the Capellan people have fought dearly for their prize and will do anything in their power to hold onto it. Will Julian's gamble save the very soul of the Federated Suns, or is the invasion of New Syrtis doomed before it even begins?

Hawker Hurricane Mk I–V Martyn Chorlton,2013-02-20 At the outbreak of World War II, only 111 Squadron and a handful of others were equipped with the Hurricane. Thanks to sudden massive orders and a well-organized Hawker sub-contracting production to Gloster and General Aircraft, more squadrons rapidly became operational. Cutting their teeth during the Battle of France, it was during the Battle of Britain that the type excelled and came to form the backbone of Fighter Command. While the Hurricane was steadily overtaken by the Spitfire in the fighter defence role, it remained the fighter of choice in North Africa and the Far East. Despite a large number being shot down in these far-flung conflicts, many received hasty repairs and returned to the fray while more fragile designs were permanently grounded. The Hurricane may not have been the prettiest or, the best-performing aircraft but, as Francis Mason stated: 'The Royal Air Force was glad to get the Spitfire...it had to have the Hurricane!'

Major Piston Aero-engines of World War II Victor F. Bingham,1998 The frenzy of technological invention and improvement that accompanied each large-scale conflict

during the twentieth century has been one of the most important factors in driving the spectacular scientific advances made during the last hundred years. The half-way point of the century saw the horrors of the first truly global battle--World War II. At that time the piston aero engine was at its zenith and the world's airforces were almost entirely propeller driven. It is a period that provides the most interesting study of these engines and the aircraft they powered because the rapid change to turbojets that occurred in the post-war era saw the demise of the piston engine on almost all types of military aircraft and large airliners. This book looks at the design and development of the most famous engines used by the combatants during this great air war. Each type is studied and evaluated in historical perspective and many famous aircraft are illustrated to demonstrate installation and differing usage. One Merlin makes a Spitfire, two a Mosquito, and four a Lancaster. Engines made in America, Russia, and Germany could boast the same versatility and are described here in detail. --Book jacket.

SS Panzer Battalion Leo Kessler,2014-12-24 In Wotan's First Mission, von Dodenburg tackles the inpenetrable Fort Eben Emael. SS Assault Regiment Wotan was preparing for a mission so secret that it was known just by its codename, Zero. Only The Vulture, Major Horst Geier, knew that the objective was the key Belgian fortress guarding the junction of the River Meuse and the Albert Canal. It was the most impregnable stronghold in Europe and had to be taken, regardless of the cost in human lives, if Hitler's handpicked SS Panzer troops were to turn the flank of the Maginot line and force the phoney war to explode into the Blitzkrieg... Leo Kessler is a pseudonym of the late Charles Whiting. Over three million of his books have been sold worldwide.

Android Paul J. Ward,2012-11 Humans and androids are learning to co-exist as equals, but there are many opposers who seek to subvert their own creations and rule with absolute power ...Humans, with their android creations loyally at their side, have colonised the Moon and Mars. The Earth and Colonies Defence Service (ECDS) keeps the colonies and space lanes safe. On Earth, the Android Protectorate League, led by the enigmatic android leader Traviod Selius, campaign for android rights legislation. However, they are strongly opposed by the Anti-Android Faction (AAF). Following the approval of the Human and Android Cohabitation Act, ECDS Chief of Operations Nakaar Bacvor and co-conspirators form the military wing of the AAF. The AAF attack the Moon and Mars colonies, but are repulsed by ECDS forces. On Earth, with the AAF seemingly defeated, humans and androids unite to create the city of Utopia. Threats from a reformed, more powerful AAF emerges and the crew of the ECDS flagship Harmonia must formulate a defence. The mysterious Evolved Androids appear on Earth with a sytoid child called Eirini, who has strange powers. Utopian Enforcement officer Rul Calibra becomes her unlikely guardian and protector.Humankind's destiny hangs in the balance in the first series installment ANDROID: Earth - Book One of the ANDROID Saga. Paul J. Ward was born in 1969 in Lincolnshire, England, on the day of the historic Apollo 11 moon landing. He has been fascinated by space exploration and technological developments his whole life. This is his first novel. Publisher's website: http: //sbpra.com/PaulJWar

Forced March Leo Kessler,2014-12-24 Read the first installment from Leo Kessler's infamous fictional series, DOGS OF WAR. It is 1942, and the Vulture's eyes gleamed as he watched the exhausted men crawling up the slope through the slippery mud. The SS

Assault Regiment Wotan was training and recuperating after its gruelling struggle in Russia and they were glad to be out of the fray for a bit, but it would not be for long. What none of those men, straining up the grassy slope under the eyes of their commander, knew was that already they had been singled out for a new mission. The German High Command knew that the British would launch an attack on Dieppe and the crucial element was time. There was only one regiment that could be trusted to get there fast enough to defend the vital coastal battery: the Soldiers of Wotan were on the move again. Leo Kessler is the pseudonym of the late writer Charles Whiting. More than three million of his books have been sold worldwide.

Spitfire Jeffrey Quill,2022-01-04 This is the personal account of an exceptional Spitfire test pilot and RAF and Fleet Air Arm fighter pilot. Starting with lively descriptions of the pre-war Airforce in the mid-1930s, Jeffrey Quill moves on to cover his fascination test flying experiences. He took charge of some of the most important military aircraft of the time and, in particular, the immortal Spitfire, from its experimental, prototype stage in 1936 when he worked with its chief designer, R.J. Mitchell, to the end of its production in 1948.

BattleTech: Elements of Treason: Honor Craig. A. Reed, Jr.,2023-06-01 A HERD DIVIDED… For the entirety of its existence, Clan Hell's Horses has been underestimated by its fellow Clans. The inclusion of tanks and infantry alongside their BattleMech forces has often unfairly forced the Horses into lopsided alliances with other Clans. As competing

Clans race headlong to conquer Terra, the birthplace of humanity, the Horses must focus on survival rather than the glory of conquest. But many Horses want more, and they refuse to be shouldered aside as Clans Jade Falcon and Wolf reap the rewards of their campaign toward Terra. Star Captain Peter Cobb, a controversial rising star and military scholar, sees a new trail for the Hell's Horses to blaze. This path would put the Clan on a fiery trajectory to earn the victories and respect they rightfully deserve, and push the Clan toward a prosperous future. But few embrace his controversial ideas and, divided by distrust and ambition, the leadership of his Clan lacks the will to ensure that the Hell's Horses will be strong enough to survive the tumultuous conflicts ahead. Caught between the bloody agendas of two rival Khans—a political maneuverer and a bellicose warmonger—Peter must find a way to restore the soul of the Hell's Horses without sullying his honor, or risk dooming his entire Clan to extinction in the face of a rising power unlike any the Inner Sphere has ever seen…

Tempest Squadrons of the RAF Chris Thomas,2016-11-17 Hawker's charismatic Tempest V entered RAF service just in time to be the most successful counter to the V1 flying bomb assault on southern England in the summer of 1944. With more than 800 of the robot missiles to its credit, Tempest V units then crossed the Channel to lock horns with the best the Luftwaffe had to offer – Fw 190D-9s, Ta 152s, Me 262s and Bf 109G/Ks – achieving an impressive kill/loss ratio in aerial combat. With incredibly detailed aircraft profiles and exciting combat reports this title covers the full history of Tempest squadrons, from their initial design and combat experience in World War 2 through to their post-war role and the eventual decline of this iconic British fighter.

Canadian Warplanes Harold A. Skaarup,2009-11 This aviation handbook is designed to be used as a quick reference to the classic military heritage aircraft that have been flown by members of the Canadian Air Force, Royal Canadian Air Force, Royal Canadian Navy, Canadian Army and the present-day Canadian Forces. The interested reader will find useful information and a few technical details on most of the military aircraft that have been in service with active Canadian squadrons both at home and overseas. 100 selected photographs have been included to illustrate a few of the major examples in addition to the serial numbers assigned to Canadian service aircraft. For those who like to actually see the aircraft concerned, aviation museum locations, addresses and contact phone numbers have been included, along with a list of aircraft held in each museum's current inventory or on display as gate guardians throughout Canada and overseas. The aircraft presented in this edition are listed alphabetically by manufacturer, number and type. Although many of Canada's heritage warplanes have completely disappeared, a few have been carefully collected, restored and preserved, and some have even been restored to flying condition. This guide-book should help you to find and view Canada's Warplane survivors.

The Aviation History Relly Victoria Petrescu,Florian Ion Petrescu,2013-02 According to Aulus Gellius, Archytas, the Ancient Greek philosopher, mathematician, astronomer, statesman, and strategist, was reputed to have designed and built, around 400 BC, the first artificial, self-propelled flying device, a bird-shaped model propelled by a jet of what was probably steam, said to have actually flown some 200 metres. This machine, which its inventor called The Pigeon, may have been suspended on a wire or pivot for its flight. The

9th century Muslim Berber inventor, Abbas Ibn Firnas's glider is considered by John Harding to be the first attempt at heavier-than-air flight in aviation history. In 1010 AD an English monk, Eilmer of Malmesbury purportedly piloted a primitive gliding craft from the tower of Malmesbury Abbey. Eilmer was said to have flown over 200 yards (180 m) before landing, breaking both his legs. He later remarked that the only reason he did not fly further was because he forgot to give it a tail, and he was about to add one when his concerned Abbot forbade him any further experiments. Bartolomeu de Gusmão, Brazil and Portugal, an experimenter with early airship designs. In 1709 demonstrated a small airship model before the Portuguese court, but never succeeded with a full-scale model. Pilâtre de Rozier, Paris, France, first trip by a human in a free-flying balloon (the Montgolfière), built by Joseph-Michel and Jacques-Étienne Montgolfier, . 9 km covered in 25 minutes on October 15, 1783. (see Le Globe below for first unmanned flight, 2 months earlier) Professor Jacques Charles and Les Frères Robert, two French brothers, Anne-Jean and Nicolas-Louis, variously shared three milestones of pioneering flight: Le Globe, the first unmanned hydrogen gas balloon flew on 26 August 1783. On 1 December 1783 La Charlière piloted by Jacques Charles and Nicolas-Louis Robert made the first manned hydrogen balloon flight. In 1951, the Lockheed XFV-1 and the Convair XFY tailsitters were both designed around the Allison YT40 turboprop engine drivin

Avro Lancaster - Handley Page Halifax - Short S.29 Stirling Mantelli - Brown - Kittel - Graf,2017-03-09 The Avro Lancaster was a four-engine heavy bomber used by the RAF in 1942 and, together with the Handley Page Halifax, was the main strategic bomber of the RAF and other air forces of the Commonwealth countries. It was mainly used as a night bomber. Around 7,378 were realized Lancaster (excluding prototypes), 430 of them in Canada and they were lost in action 3,932. The Handley Page Halifax was a major British four-engined heavy bombers, remaining in service until the end of the conflict, with numerous tasks in addition to bombing. Halifax's career began in November 1940 and continued until the end of the war. These four engine, however, continued to operate, albeit in minor roles, until 1954-56. In practice, however, the Lancaster showed better performance and as soon as it was available in sufficient numbers, he replaced the Halifax. The Short S.29 Stirling was a British heavy bomber, the first in its class. Along with Lancaster and the Halifax constitute the three main bombers used by Britain in World War II with capacity of bombs from 6,000 kg to 10,000 kg Bomb Grand Slam, one of the heaviest bombs ever built.
