It is a story which will make the readers smile, cry, laugh, love and loose themselves in the beautiful journey of two persons, who met each other coincidentally and changed each other's life completely. It's nothing like out dated boring love stories and nor even over advanced modern love stories, but a love story which will redefine love as strength.

Speedrunning David Snyder,2017-10-12 More than 30 years after its 1985 release on the Nintendo Entertainment System, Super Mario Bros. continues to be one of the best-selling video games of all time. For many, completing the classic side-scrolling platformer remains challenging enough to provide many hours of entertainment. In late 2016 an American gamer known online as "darbian" completed the game in record time, rescuing Princess Peach in 4 minutes, 56 seconds. darbian practices speedrunning, a method of play in which quick reflexes and intimate familiarity with games are used to complete them in the fastest possible time. Through 10 interviews with darbian and other elite speedrunners, this book explores the history and techniques of this intense and competitive type of gaming.

Mazes in Videogames Alison Gazzard,2013-05-01 From the text adventures of Zork, to the arcade game of Pac-Man, to the corridors of Doom, and on to the city streets of Grand Theft Auto IV, the maze has often been used as a space to trap and confuse players in their navigation of gameworlds. However, the maze as a construction on the landscape has a long history before the invention of the videogame. By examining the change in the maze from the landscapes of open spaces and closed gardens through to the screen of the videogame, both mazes and labyrinths are discussed in terms of historical reference, alongside the author's personal experiences of walking and playing these structures. This book shows how our cultural experiences of real world maze landscapes may have changed, and how we negotiate videogame worlds along the various paths and meanings they so often create for us.

Smartcuts Shane Snow,2014-09-09 Entrepreneur and journalist Shane Snow (Wired, Fast Company, The New Yorker, and cofounder of Contently) analyzes the lives of people and companies that do incredible things in implausibly short time. How do some startups go from zero to billions in mere months? How did Alexander the Great, YouTube tycoon Michelle Phan, and Tonight Show host Jimmy Fallon climb to the top in less time than it takes most of us to get a promotion? What do high-growth businesses, world-class heart surgeons, and underdog marketers do in common to beat the norm? One way or another, they do it like computer hackers. They employ what psychologists call lateral thinking: to rethink convention and break rules that aren't rules. These are not shortcuts, which produce often dubious short-term gains, but ethical smartcuts that eliminate unnecessary effort and yield sustainable momentum. In Smartcuts, Snow shatters common wisdom about success, revealing how conventions like paying dues prevent progress, why kids shouldn't learn times tables, and how, paradoxically, it's easier to build a huge business than a small one. From SpaceX to The Cuban Revolution, from Ferrari to Skrillex, Smartcuts is a narrative adventure that busts old myths about success and shows how innovators and icons do the incredible by working smarter--and how perhaps the rest of us can, too.
