First Contact J L Maynor,2020-12-22 In the distant future, Humanity is still alone among the stars. War ravages the superpowers of the planet in a seemingly never-ending conflict. Technological advancements to aid both sides of the war has pushed humans into the stars, in an effort for resources and colonization. Four planets were chosen by the United Federation of Nations for colonization, three were successful. Among colonization an ancient technology was discovered: the hyperdrive. Humanity had instant and unlimited access to its colonies, but the war continued to ravage. With the discovery of a new power generation technology comes to a new Faster-Than-Light traveling method, and the WarpStar is the first ship equipped with the new stardrive. No longer bound by the limitations of the Hyperdrive, the WarpStar evokes on a journey of exploration and discovery. Will they continue to be the only life out there, or will they discover a dark pas

Strange Days Landon Porter,2014-12-06 School's out and summer is officially underway! But it's not all fun and games, as it becomes clear that with the Academy gone, all new threats are popping up to try and take advantage of descendant kids. Laurel and Alexis set out to deal with this while the teens head to Dawson Bay for a weekend at the beach. Summer for the Descendants promises to be packed with fun and fulfillment. Too bad it will also be packed with magical monsters, killer robots and maybe even a super-powered team-up! They are heroes. They are people. This is their story. Styled after works from the Bronze Age of Comic Books, The Descendants is presented in a unique manner: as an all-prose comic book complete with issues, specials and annuals, each telling a complete story that ties into the overall tale of the titular superheroes. It is also written as a throwback and love letter to an earlier age of superheroes, to a time before everything was grim and gritty and when comic books were fun. Collects Issues #25-31 of the web serial The Descendants by Landon Porter.

Supernova Raymond Walter Seibert,2007-10-01 Uris, the Princess Regent of Ur, whose mother died at her birth, rules for her father who has gone to map the new neutron star Draco. Returning from a hunt, she is summoned to the ruling world of the known galaxies on Regis Xinor. It is past the time that her father can ever return into Standard Xinor time, and she must declare him as lost.

Assuming the Queen-ship of Ur, she is thrust into a political struggle arising from an atomic explosion in hyperspace that has destroyed an Ambassadorial Shuttle of the powerful Pandamon Empire, ruled by a ruthless megalomaniac, who would become God Emperor. The source of this explosion is found to be the plutonium garbage of a remote planet that orbits a star known as Sol. The planet is known as Terra, and it is soon to be very near, when the supernova remnants of the explosion of Draco have cleared. A new navigational portal will then open unexplored parts of a new galaxy to the Xinor Empire. Fleeing the megalomaniac Metastophiles, Uris, and Kurege, who has fled Pandamon to escape being imprisoned because of his genetic tendency for prescience, traverse the unsettled neutron star Draco, and emerge in the Cancer Nebula, crashing on Earth, in Louisiana. Wealthy industrialist, Stark Raven, saves Uris's life, and thus begins an unraveling of an intrigue of political subterfuge that has existed on Earth for centuries, and in modern times, involves the United States Nuclear Assembly Plant, Pantex, in Amarillo, Texas, the precious wells around Amarillo that produce the isotope helium III that is vital in the cryogenics of the anti gravity coils that make intergalactic travel possible, the old XIT property, and the gathering of a proto-fetal fluid used in making life extension shots taken by Metastophiles. At the climax, it is bone knives vs ray guns, at the end of time, for the fate of mankind.
